Working The Field Accounts From French Louisiana:

Working the Field Jacques M. Henry, Sara LeMenestrel, 2003-02-28 This book presents accounts of fieldwork conducted in French Louisiana by anthropologists and folklorists between the 1970s and 2000 and looks at the personal ethical political and scientific issues researchers need to confront and resolve when they attempt to explain a modern complex culture by using the traditional tools and methods of anthropology participant observation and interviews The study casts a critical look at the core anthropological concepts of field informants and knowledge In line with the ongoing reassessment of these concepts it proposes that the field identities and knowledge acquired through research are not set given entities but rather are a matter of construction It shows how the personal profiles of the researchers native or outsider activist or academic man or woman black or white contribute to frame the research It illustrates the shifting of these identities during and after the research in response to personal relational and political circumstances It also considers the application of the knowledge derived from research in the fields of tourism cultural activism and language policy in the context of the cultural renaissance experienced by Cajuns and Creoles over the past decades

Negotiating Difference in French Louisiana Music Sara Le Menestrel, 2014-12-19 Sara Le Menestrel explores the role of music in constructing asserting erasing and negotiating differences based on the notions of race ethnicity class and region She discusses established notions and brings to light social stereotypes and hierarchies at work in the evolving French Louisiana music field She also draws attention to the interactions between oppositions such as black and white urban and rural differentiation and creolization and local and global Le Menestrel emphasizes the importance of desegregating the understanding of French Louisiana music and situating it beyond ethnic or racial identifications amplifying instead the importance of regional identity Musical genealogy and categories currently in use rely on a racial construct that frames African and European lineage as an essential difference Yet as the author samples music in the field and discovers ways music is actually practiced she reveals how the insistence on origins continually interacts with an emphasis on cultural mixing and creative agency This book finds French Louisiana musicians navigating between multiple identifications musical styles and legacies while market forces outsiders interest and geographical mobility also contribute to shape musicians career strategies and artistic choices The book also demonstrates the decisive role of non natives enthusiasm and mobility in the validation evolution and reconfiguration of French Louisiana music Finally the distinctiveness of South Louisiana from the rest of the country appears to be both nurtured and endured by locals revealing how political domination and regionalism intertwine
