## **The Vital Landscape The Vital Landscape:**

*P'ungsu* Hong-key Yoon, 2017-12-04 The first scholarly book to address Korean geomancy through an interdisciplinary lens This book is a milestone in the history of academic research on the development and role of geomancy fengshui in Chinese and p ungsu in Korean in Korean culture and society As the first interdisciplinary work of its kind it investigates many topics in geomancy studies that have never been previously explored and contains contributions from a number of disciplines including geography historical studies environmental science architecture landscape architecture religious studies and psychoanalysis While almost all books in English about geomancy are addressed to general readers as practical guides for divining auspicious locations P ungsu is a work of rigorous scholarship that documents analyzes and explains past and current practices of geomancy Its readers will better understand the impact of geomancy on the Korean cultural landscape and appreciate the significant ecological principles embedded in the geomantic traditions of Korea while researchers will discover new insights and inspirations for future research on geomancy not only in Korea but in China and elsewhere

**The Vital Landscape** William M. Taylor, 2004 The Vital Landscape explores the arrival of the biological sciences most notably the sciences of life entailed in studies of botany and zoology ecology and evolutionary science physiology and psychology in the nineteenth century and their impact on architecture and landscape architecture in Great Britain Specifically the book explores the idea of the contrived or artificial environment as an object of both scientific speculation and aesthetic reflection Unlike specialist histories of biological science or environmental thought this book is unique in locating one source for present day concerns for the environment and human well being in debates over proper housing and the growing popularity of domestic and public gardens in the nineteenth century The book skilfully interweaves architecture and garden history the history and philosophy of science plant and animal physiology and human psychology works of literature popular science and domestic economy in a story that opens new opportunities for the study of architecture and gardens Provided by publisher

[The Remittance Landscape](#) Sarah Lynn Lopez, 2015-01-12 Crossing anthropology with urban studies and architecture this is the first book to explore how Mexican migrants are building houses and other structures in Mexico with the money they earn in the US The author defines this as the development of remittance space a phenomenon that is changing the landscapes and economies of villages and towns throughout Mexico and not incidentally of several US cities as well including LA and Chicago While remittance building is not unique to Mexico the remittance corridor from the US to our southern neighbor is the largest in the world a flow of about 22 billion dollars in 2010 alone Lopez has identified a correspondence between this monetary flow and the construction boom in rural Mexico In fact she proposes that a Mexican s capacity to build in rural villages itself motivates migration and changes social and cultural life for migrants and their families Through careful ethnographic and architectural analysis Lopez brings migrant hometowns to life and positions them in larger critical debates about migration The research was conducted on both sides of the border

Lopez worked and lived with migrants in Los Angeles and Chicago and she pursued her subject throughout the south of Jalisco not far from Guadalajara This is a dangerous area drug wars are raging and it takes courage and care to spend time there a matter covered in the book Understanding Cultural Landscapes Rachel Hunt,Ben Garlick,2025-11-27

Understanding Cultural Landscapes provides an introduction to the range of approaches characterising the study of landscape and culture This textbook discusses the origins underpinnings and practical applications of social science and humanities scholarship concerning landscape and its theorisation The book offers an easy to digest introduction to relevant approaches and ideas in the study of landscape The text includes practical real world examples drawn from a range of social science and humanities disciplines to showcase the interpretation of landscape by different means and to different ends Pauses for thought encourage the reader to reflect and connect ideas and debates to examples encountered in their own life and work Suggested activities support independent study and aid the design and delivery of university teaching Each chapter also includes suggested readings and the textbook includes discussion of research methods for those developing their own research projects This book will be valuable for both students and educators encountering or teaching the study of landscape within the humanities and social sciences for the first time The incorporation of practical exercises and suggested reading enables the book to supplement independent study or be used as a teaching aid Agroubanism Enrico Gottero,2018-08-03

This book provides a much needed overview of the agroubanism topic in the context of territorial studies It carefully looks at rural urban periurban farming in both professional and unprofessional capacities as one of the main sustainable forms of land use and management This cutting edge text explores the various forms of agricultural and urban planning as well as the main innovations that the agro urban approach entails in terms of governance spatial dimensions and functions Agroubanism provides a breadth of information and serves as a practical study of concerns facing policy and decision makers planners and landscape managers as well as farmers managers of protected areas local authorities and local action groups As such this book is suitable as a course accompaniment to provide an overview of the complexity of agro urban issues William

Wordsworth and the Ecology of Authorship Scott Hess,2012 In William Wordsworth and the Ecology of Authorship Scott Hess explores Wordsworth s defining role in establishing what he designates as the ecology of authorship a primarily middle class nineteenth century conception of nature associated with aesthetics high culture individualism and nation Instead of viewing Wordsworth as an early ecologist Hess places him within a context that is largely cultural and aesthetic The supposedly universal Wordsworthian vision of nature Hess argues was in this sense specifically male middle class professional and culturally elite factors that continue to shape the environmental movement today Models for Planning Wildlife Conservation in Large Landscapes Joshua Millspaugh, Frank R. Thompson,2011-04-28 A single resource volume of information on the most current and effective techniques of wildlife modeling Models for Planning Wildlife Conservation in Large Landscapes is appropriate for students and researchers alike The unique blend of conceptual methodological and

application chapters discusses research applications and concepts of modeling and presents new ideas and strategies for wildlife habitat models used in conservation planning The book makes important contributions to wildlife conservation of animals in several ways 1 it highlights historical and contemporary advancements in the development of wildlife habitat models and their implementation in conservation planning 2 it provides practical advice for the ecologist conducting such studies and 3 it supplies directions for future research including new strategies for successful studies Intended to provide a recipe for successful development of wildlife habitat models and their implementation in conservation planning the book could be used in studying wildlife habitat models conservation planning and management techniques Additionally it may be a supplemental text in courses dealing with quantitative assessment of wildlife populations Additionally the length of the book would be ideal for graduate student seminar course Using wildlife habitat models in conservation planning is of considerable interest to wildlife biologists With ever tightening budgets for wildlife research and planning activities there is a growing need to use computer methods Use of simulation models represents the single best alternative However it is imperative that these techniques be described in a single source Moreover biologists should be made aware of alternative modeling techniques It is also important that practical guidance be provided to biologists along with a demonstration of utility of these procedures Currently there is little guidance in the wildlife or natural resource planning literature on how best to incorporate wildlife planning activities particularly community based approaches Now is the perfect time for a syntheistic publication that clearly outlines the concepts and available methods and illustrates them Only single resource book of information not only on various wildlife modeling techniques but also with practical guidance on the demonstrated utility of each based on real world conditions Provides concepts methods and applications for wildlife ecologists and others within a GIS context Written by a team of subject area experts

*From Light to Dark* Tim Edensor, 2017-03-21 Light pervades the world and when it is not light darkness emerges and is combated by electric illumination Despite this globally shared human experience in which spaces appear radically different depending on time season and weather social science investigation on the subject is meager *From Light to Dark* fills this gap focusing on our interaction with daylight illumination and darkness Tim Edensor begins by examining the effects of daylight on our perception of landscape drawing on artworks particular landscapes and architectural practice He then considers the ways in which illumination is often contested and can be used to express power looking at how capitalist class ethnic military and state power use lighting to reinforce their authority over space Edensor also considers light artists such as Olafur Eliasson and festivals of illumination before turning a critical eye to the supposedly dangerous sinister associations of darkness In examining the modern city as a space of fantasy through electric illumination he studies how we are seeking and should seek new forms of darkness in reaction to the perpetual glow of urban lighting Highly original and absorbingly written *From Light to Dark* analyzes a vast array of artistic interventions diverse spaces and lighting technologies to explore these most basic human experiences

Subcommittee on National Parks, Forests, and Public Lands (2007- ),2009      Landscape History ,2006      Unsettling Nature Taylor Eggan,2022-03-24 The German poet and mystic Novalis once identified philosophy as a form of homesickness More than two centuries later as modernity s displacements continue to intensify we feel Novalis s homesickness more than ever Yet nowhere has a longing for home flourished more than in contemporary environmental thinking and particularly in eco phenomenology If only we can reestablish our sense of material enmeshment in nature so the logic goes we might reverse the degradation we humans have wrought and in saving the earth we can once again dwell in the nearness of our own being *Unsettling Nature* opens with a meditation on the trouble with such ecological homecoming narratives which bear a close resemblance to narratives of settler colonial homemaking Taylor Eggan demonstrates that the Heideggerian strain of eco phenomenology along with its well trod categories of home dwelling and world produces uncanny effects in settler colonial contexts He reads instances of nature s defamiliarization not merely as psychological phenomena but also as symptoms of the repressed consciousness of coloniality The book at once critiques Heidegger s phenomenology and brings it forward through chapters on Willa Cather D H Lawrence Olive Schreiner Doris Lessing and J M Coetzee Suggesting that alienation may in fact be natural to the human condition and hence something worth embracing instead of repressing *Unsettling Nature* concludes with a speculative proposal to transform eco phenomenology into exo phenomenology an experiential mode that engages deeply with the alterity of others and with the self as its own Other      **Sources, Sinks and Sustainability** Jianguo Liu,Vanessa Hull,Anita T. *Encyclopaedia of the History of Science, Technology, and Medicine in Non-Western Cultures* Helaine Selin, 1997-07-31 The Encyclopaedia fills a gap in both the history of science and in cultural studies Reference works on other cultures tend either to omit science completely or pay little attention to it and those on the history of science almost always start with the Greeks with perhaps a mention of the Islamic world as a translator of Greek scientific works The purpose of the Encyclopaedia is to bring together knowledge of many disparate fields in one place and to legitimize the study of other cultures science Our aim is not to claim the superiority of other cultures but to engage in a mutual exchange of ideas The Western academic divisions of science technology and medicine have been united in the Encyclopaedia because in ancient cultures these disciplines were connected This work contributes to redressing the balance in the number of reference works devoted to the study of Western science and encourages awareness of cultural diversity The Encyclopaedia is the first compilation of this sort and it is testimony both to the earlier Eurocentric view of academia as well as to the widened vision of today There is nothing that crosses disciplinary and geographic boundaries dealing with both scientific and philosophical issues to the extent that this work does xi
