The Vital Question Why Is Life The Way It Is:

The Vital Question Nick Lane, 2016 A game changing book on the origins of life called the most important scientific discovery since the Copernican revolution in The Observer

Vital Question Nick Lane, 2015-07-13 One of the deepest most illuminating books about the history of life to have been published in recent years The Economist The Earth teems with life in its oceans forests skies and cities Yet there s a black hole at the heart of biology We do not know why complex life is the way it is or for that matter how life first began In The Vital Question award winning author and biochemist Nick Lane radically reframes evolutionary history putting forward a solution to conundrums that have puzzled generations of scientists For two and a half billion years from the very origins of life single celled organisms such as bacteria evolved without changing their basic form Then on just one occasion in four billion years they made the jump to complexity All complex life from mushrooms to man shares puzzling features such as sex which are unknown in bacteria How and why did this radical transformation happen The answer Lane argues lies in energy all life on Earth lives off a voltage with the strength of a lightning bolt Building on the pillars of evolutionary theory Lane s hypothesis draws on cutting edge research into the link between energy and cell biology in order to deliver a compelling account of evolution from the very origins of life to the emergence of multicellular organisms while offering deep insights into our own lives and deaths Both rigorous and enchanting The Vital Question provides a solution to life s vital question why are we as we are and indeed why are we here at all

The Vital Question Nick Lane, 2015 A biochemist building on the pillars of evolutionary theory and drawing on cutting edge research into the link between energy and genes argues that the evolution of multicellular life was the result of a single event

Unlocking the Nature of Human Aggression Adrian Perkel, 2023-12-12 Unlocking the Nature of Human Aggression is a neuropsychanalytic and scientific exploration of aggression and argues for its central role in psychopathology and the genesis of individual symptoms as well as in broader systemic conflicts and violence Adrian Perkel creates a unique theoretical approach to the various manifestations we encounter of individual group and geo political aggression and destructiveness Based on psychoanalytic investigations of this dynamic and Freud s incomplete exploration of this human drive this book seeks to understand the science of aggression that Freud himself suggested would be possible with time and scientific development Perkel investigates the commonplace inversion of the perpetrator and victim narratives navigating through the complexity of how the aggressive drive often driven by feelings aimed at homeostatic regulation challenges the perception of any objective view of who is perpetrator and who victim He includes his own personal experiences of South African Apartheid as well as historical and contemporary data such as speeches from historical figures during times of war including the Second World War and the Ukrainian Russian conflict Offering a fresh and innovative insight into the nature of this paradoxical drive in humans this book integrates the psychology psychodynamics and neuroscience of modern research into a coherent exposition of this key aspect of psychic functioning in humans It is an

essential read for analysts in practice and training psychologists and other mental health professionals and students looking for a modernised theoretical model of the destructive and aggressive drive of the psyche to facilitate better interventions for individual and couple patients and for interventions at systemic and organisational levels **Neuroscience and the Death Drive**

Adrian Perkel, 2025-07-24 In this book Adrian Perkel seeks to expand upon Freud's theory of the death drive by locating it within modern neuroscience arguing for the centrality of the aggressive drive in the formation of mind and the genesis of symptoms and psychopathology Neuroscience and the Death Drive reformulates the function of defence mechanisms as they link to the aggressive drive and their role in the binding of free energy Filling an important gap in both formulation and treatment this book completes Freud's self confessed incomplete theory of aggression through the lens of modern psychoanalysis and neuroscience updating these concepts with current scientific insights and introduces a refreshed view on psychotherapeutic treatment implications based on these developments Perkel explores the treatment of patients experiencing eating disorders anxiety depression addiction personality disorders and sexual dysfunction This invigorating and approachable book will be of interest to all psychoanalysts psychiatrists psychotherapists and counsellors and will help readers reach new understandings of this key theory of the mind Language in Deep Human History Richard J.

Watts, 2024-02-19 Understanding the evolution of language within the context of deep human history requires interdisciplinary work between linguists and scientists from a wide range of academic disciplines e.g. archaeology molecular biology anthropology genetics biochemistry etc The book aims to calibrate work on human evolution with current linguistic theory in an attempt to trace out a scientific story of how human language emerged and developed that has plausibility while remaining open to change through new linguistic and non linguistic research **The Third Law of Evolution and The Future of Life**

Gerard A. J. M. Jagers op Akkerhuis, 2024-11-25 This book offers a step by step introduction to an integrated theory of physical and biological evolution from the early universe to the world we know today To this end the well known laws of variation and selection are supplemented by a third law This law describes the increase in complexity based on the transitions from quarks to hadrons to atoms to molecules to bacteria to eukaryotic cells and so on These insights revolutionize existing theoretical frameworks for analyzing organization in nature accelerating developments in natural philosophy In this way the author develops a basic framework for thinking about evolution which can be applied to current debates in various research fields For example the new approach finally helps to find the systems based definitions of organism and life that have been sought for so long By extrapolating the framework one can even hypothesize about future evolution and our place as humans in it An exciting read for both philosophers and scientists **A Matter of Energy: Biology From First Principles**

Conversations About Biology

Howard Burton, 2020-10-01 Conversations About Biology include the following five carefully edited Ideas Roadshow Conversations featuring leading researchers with a detailed preface highlighting the connections between the different books

I Autism A Genetic Perspective A conversation with Jay Gargus Professor of Physiology Biophysics and Pediatrics and Director of the Center for Autism Research and Translation at UC Irvine This wide ranging conversation examines the recent explosion in our genetic understanding of autism and its implications for the future of medicine together with the importance of understanding the underlying molecular mechanisms in order to successfully treat a wide range of genetic disorders Jay Gargus focuses on autism dispelling myths associated with the condition advocating why a treatment should be actively pursued and illustrating what we can learn from the recent breakthrough in cystic fibrosis research

II Learning and Memory A conversation with Alcino Silva Distinguished Professor of Neurobiology Psychiatry and Psychology at the David Geffen School of Medicine and Director of the Integrated Center for Learning and Memory at UCLA This book is based on an in depth filmed conversation between Howard Burton and Alcino Silva who runs a learning and memory lab at UCLA that is focused on a vast number of topics from schizophrenia and autism to learning and memory This fascinating conversation explores how he and his colleagues focus on understanding the specific molecular mechanisms of neurobiology with the goal of being able to intervene and repair these mechanisms when they go awry

III A Matter of Energy Biology From First Principles A conversation with Nick Lane Professor of Evolutionary Biochemistry at University College London This book is based on an in depth filmed conversation between Howard Burton and Nick Lane After an inspiring story of Nick Lane's

career path this wide ranging conversation covers his bioenergetic view of early evolutionary history the origin of life and how all complex life is composed of a very particular cell type that we all share and more IV Our Human Variability A conversation with Stephen Scherer the GlaxoSmithKline Research Chair in Genome Sciences at the Hospital for Sick Children and University of Toronto This book is based on an in depth filmed conversation between Howard Burton and Stephen Scherer who discusses his lifelong passion for science that culminated in his groundbreaking discovery of copy number variation This conversation also covers his exciting work in autism research and how copy number variation brings us a deeper understanding of both human variability and disease V Sleep Insights A conversation with Matthew Walker Professor of Neuroscience and Psychology and Founder and Director of the Center for Human Sleep Science at UC Berkeley This book is based on an in depth filmed conversation between Howard Burton and Matthew Walker This extensive conversation gives a clear and compelling picture of our recent understanding of sleep s essential role in our daily lives from reinforcing learning and memory to regulating emotion Howard Burton is the creator and host of Ideas Roadshow and was the Founding Executive Director of Perimeter Institute for Theoretical Physics

Health Care in the Information Society David Ingram, 2023-11-17 In this fascinating book David Ingram traces the history of information technology and health informatics from its pioneers in the middle of the twentieth century to its latest developments The book is distinctive in its broad scope and coverage and as the eyewitness account of an author who became the first UK professor appointed with the mission to bridge information technology with everyday medicine health and care In this role he has been a co founder and leader of two rapidly growing initiatives openEHR and OpenEyes which stem from international collaborations of universities health services and industries These open source and open platform technologies have struck a widely resonant chord worldwide through their focus on community interest endeavours and open access to their methods and outputs Set against the history of extremely costly burdensome and serially unsuccessful top down attempts of governments to tackle the domain the book argues for a greater focus on shared endeavours of this kind contributing towards a standardized care information utility that incorporates methods and resources evolved shared and sustained in the public domain As information technologies are now at the very core of health care shaping the relationship between medical services and communities professions organisations and industries this book is important reading for politicians health care academics administrators and providers and to anybody interested in the future of health services in the digital age

The Mystery of Life What's It All About? David E. Peeples, 2018-03-15 Have you ever seriously considered the most difficult and puzzling questions presented to our minds during this mortal sojourn through an often difficult and challenging existence Who am I Where did I come from Why am I here Where am I going And perhaps the most important question of all What is my purpose for living In this ultra modern digital world of today many people have become so preoccupied with the daily pursuits of life and the addictive overuse of time consuming technology that many of them rarely pause to seriously consider what life is actually all

about In writing *The Mystery of Life* it has been my hope and my goal to personally challenge each reader to consider many relevant facts and to follow a line of evidence pointing toward a worldview that is often overlooked and too easily marginalized We live in an aggressive technology driven world where the wild pursuit of power prestige possession and pleasure has become the driving influence ruling over many of our lives What does your worldview look like Is there enough evidence to support it beyond reasonable doubt If not then I invite you to consider a vast body of mounting evidence that could lead toward a more accurate discernment of an often confusing existence The view of life that we have each come to know will strongly influence everything we do say and become in this world Based on a remarkable consensus of evidence perhaps we should consider a worldview understanding that will ultimately avail our hearts and minds of the personal fulfillment and satisfaction we have always longed for and often dreamed of We owe it to ourselves to seriously consider where the evidence is leading us Isn't it about time to discover the answers to our most persistent and pressing questions *The Mystery of Life* is presented as a literary expose addressing the questions of origin meaning morality and destiny

Metals, Microbes, and Minerals - The Biogeochemical Side of Life Peter Kroneck, Martha Sosa Torres, 2021-01-18 One of the biggest questions in today's biochemistry is how biological molecules became essential for the processes that occur within living cells This new book from outstanding Metal Ions in Life Science series gives an overview about biochemical evolution of organic molecules and metabolic pathways in living systems and outlines the vital biochemical processes in microbial cells in which metals are involved

Breathing Life into Biology John Stewart, 2019-05-16 This book shows that contemporary biology is focused almost exclusively on genes and molecules This approach despite giving rise to exciting developments such as DNA sequencing and genetic engineering does not take into account the living organisms themselves This text redresses this imbalance firstly by providing a sketch of a fully fledged theory of what living organisms are and then putting this theory to work by recounting the story of the evolution of living organisms on Earth

Suddenly Something Clicked Walter Murch, 2025-05-06 Highly lauded film editor director writer and sound designer Walter Murch reflects on the six decades of cinematic history he has been a considerable contributor to and on what makes great films great Together with Francis Coppola and George Lucas Murch abandoned Hollywood in 1969 and moved to San Francisco to create the Zoetrope studio Their vision was of a new kind of cinema for a new generation of film goers Murch's subsequent contributions in film editing rooms and sound mixing theatres were responsible for ground breaking technical and creative innovations In this book Murch invites readers on a voyage of discovery through film with a mixture of personal stories meditations on his own creative tactics and strategies and reminiscences from working on *The Godfather* films *Apocalypse Now* Lucas American Graffiti and Anthony Minghella's *The English Patient* and *The Talented Mr Ripley* *Suddenly Something Clicked* is a book that will change the way you watch movies

Thinking of Questions Peter Limm, 2015-09-23 This is not a conventional book It is designed to stimulate and challenge all people who are curious to find out about the world they inhabit and their place within

it It does this by suggesting questions and lines of questioning on a wide range of topics The book does not provide answers or model arguments but prompts people to create their own questions and a reading log or journal To this end almost all questions have a list of books or articles to provide a starter for stimulating further reading Once you start you will be hooked Never stop questioning **Raw Real Talk (The Mystery) "Life, Death, And Everything In-Between..."**

Lovering,Jerry L. Sumney,2017-09-12 This significant volume draws together an exceptional list of contributors to honor the life and work of Victor Paul Furnish Doing credit to the focus and character of Furnish s career as a scholar educator and churchman the

individual essays and the volume as a whole have been written in a way that renders them accessible to seminary students in the classroom and that builds substantially on Furnish's own work. The book is structured in three parts: 1 Theology and Ethics in Paul focusing on individual Pauline texts and on the broader themes foundations and context of Paul's theological and ethical thought; 2 Theology and Ethics in Paul's Earliest Interpreters both in the NT and in the church which came to accept Paul's letters as canonical; and 3 Paul in Contemporary Theology and Ethics engaging Furnish's own work as well as that of his colleagues and students in the area of Pauline theology and ethics.

Women, the Family, and Freedom Susan G. Bell, Karen M. Offen, 1983. This is the second book in a two-part collection of 264 primary source documents from the Enlightenment to 1950 chronicling the public debate that raged in Europe and America over the role of women in Western society. The present volume looks at the period from 1880 to 1950. The central issues: motherhood, women's legal position in the family, equality of the sexes, the effect on social stability of women's education and labor, extended to women the struggle by men for personal and political liberty. These issues were political, economic, and religious dynamite. They exploded in debates of philosophers, political theorists, scientists, novelists, and religious and political leaders. This collection emphasizes the debate by juxtaposing prevailing and dissenting points of view at given historical moments: e.g., Madame de Staël vs. Rousseau, Eleanor Marx vs. Pope Leo XIII, Strindberg vs. Ibsen, Simone de Beauvoir vs. Margaret Mead. Each section is preceded by a contextual headnote pinpointing the documents' significance. Many of the documents have been translated into English for the first time.
