his focus is concentrated on the major figures of the Middle Ages and the Renaissance especially Shakespeare the last and greatest of medieval artists His intention is always to draw together and compare medieval Renaissance and contemporary attitudes so that the reader can see the past becoming the present how and when this transformation occurred and for what reasons Originally published in 1973 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905

The War Within - Between Good and Evil Bhimeswara Challa, The human has always prided himself as an exceptional moral species but has always been haunted by two questions Why am I not good when I want to be why do I do bad when I don't want to This is at the heart of what scriptures and sages have long alluded to as the eternal internal struggle between good and evil that wages in the human consciousness The book posits that much of our confusion and angst stems from our inability to recognize the ramifications of this war between two sides of our own self It is because we are ignoring this war between two sides of our own self It is because we are ignoring this war that we are losing all other wars of the world That ignorance is the primary source of all the horrors malevolence and violence that fill us with so much dread But a favorable outcome is possible only if the forces of goodness are aided to get an upper hand consistently and that calls for two cathartic changes consciousness change by inducing a turn from the mind to the heart and contextual change by radically reconstructing the roles of morality money and mortality in our everyday lives The book offers a menu of insights and options we all can use to tilt the scales in the war waging inside each of us

MIND and LOVE: The Human Experience Lloyd Fell,2011-01-04 The new scientific paradigm of embodied mind or situated cognition is percolating into popular mind science but its fundamentals autopoiesis and structural coupling have never been thoroughly explained Combines the paradigm shift in biology initiated by Maturana and Varela with the recent rush of ideas in social neuroscience to create what hopes to be a refreshingly new explanation of the way our mind works in our everyday experience and reveals the most common blind spots in what we thought we knew about our mind These blind spots are spoiling our individual lives and harming our prospects for peaceful coexistence and care of our environment e g the mistaken ideas that meaning is transferable that decisions come from conscious awareness or that knowledge is a commodity The biological significance of love and the value of embracing uncertainty and respecting the unknown point to a very hopeful vision for our future This is a scientific explanation of mind leavened with process philosophy also invoking spirituality without any religious connotation
