The Whooping Cough Germ That Became A Hero:

The Whooping Cough Germ that Became a Hero Richard G. Macdonald, 2013-02-12 This book is based on a true story In 1933 a medical article was written in the Journal of Infectious Diseases by the author's parents Hugh Macdonald MD and Edith Jersild Macdonald RN The article explained the testing of the whooping cough vaccine on the author's four brothers This book shows the importance of children getting vaccinated for childhood disease The Song of My Life Maud-Key Shelton Rock, 2002-04-01 The autobiography of a remarkable woman whose life and singing career have extended well into her nineties Following her own star through devotion to art family and religion she lived a rich and colorful life The song of this life is an inspiration for all *How to Make a Vaccine* John Rhodes, 2021-04-12 Distinguished expert in vaccine development John Rhodes tells the story of the first approved COVID 19 vaccines and offers an essential up to the minute primer on how scientists discover test and distribute vaccines As the COVID 19 pandemic has affected every corner of the world changing our relationship to our communities to our jobs and to each other the most pressing question has been when will it end Researchers around the globe are urgently trying to answer this question by racing to test and distribute a vaccine that could end the greatest public health threat of our time In *How to Make a Vaccine* an expert who has firsthand experience developing vaccines tells an optimistic story of how three hundred years of vaccine discovery and a century and a half of immunology research have come together at this powerful moment and will lead to multiple COVID 19 vaccines Dr John Rhodes draws on his experience as an immunologist including working alongside a young Anthony Fauci to unravel the mystery of how vaccines are designed tested and produced at scale for global deployment Concise and accessible this book describes in everyday language how the immune system evolved to combat infection how viruses responded by evolving ways to evade our defenses and how vaccines do their work That history and the pace of current research developments make Rhodes hopeful that multiple vaccines will protect us Today the complex workings of the immune system are well understood The tools needed by biomedical scientists stand ready to be used and more than 160 vaccine candidates have already been produced But defeating COVID 19 won't be the end of the story Rhodes describes how discoveries today are also empowering scientists to combat future threats to global health including a recent breakthrough in the development of genetic vaccines which have never before been used in humans As the world prepares for a vaccine Rhodes offers a current and informative look at the science and strategies that deliver solutions to the crisis **FDA Consumer** ,1991 Journal of the American Medical Association ,1914 The Shorthand Writer ,1914 Living with Germs ,2004-11-11 The word germ is defined as a microbe that causes disease The vast majority of microbes do not infect us at all it is pathogens that make us ill These include bacteria viruses protozoa fungi worms and prions *Living with Germs* not only looks at all of these in detail but also at the defence mechanisms by which we come to terms with them whether by eliminating them stopping them from eliminating us or simply learning to live with them This is the first book to look at the subject of immunology in a relevant and approachable

style Using anecdotal and autobiographical material John Playfair has produced a lively well written and up to date look at immunology Timely and topical this will appeal to all those who want to know the facts behind the germ scare stories

Landscapes of Fraud Thomas E. Sheridan, 2016-05-26 From the actions of Europeans in the seventeenth century to the real estate deals of the modern era people making a living off the land in southern Arizona have been repeatedly robbed of their way of life History has recorded more than three centuries of speculative failures that never amounted to much but left dispossessed people in their wake This book seeks to excavate those failures to examine the new social spaces the schemers struggled to create and the existing social spaces they destroyed *Landscapes of Fraud* explores how the penetration of the evolving capitalist world system created and destroyed communities in the Upper Santa Cruz Valley of Arizona from the late 1600s to the 1970s Thomas Sheridan has melded history anthropology and critical geography to create a penetrating view of greed and power and their lasting effect on those left powerless Sheridan first examines how O odham culture was fragmented by the arrival of the Spanish telling how autonomous communities moving across landscapes in seasonal rounds were reduced to a mission world of subordination Sheridan then considers the fate of the Tumacacori grant and Baca Float No 3 another land grant He tells the unbroken story of land fraud from Manuel Mar a G ndara s purchase of the abandoned Tumacacori grant at public auction in 1844 through the bankruptcy of the shady real estate developers who had fraudulently promoted housing projects at Rio Rico during the 1960s and 70s As the Upper Santa Cruz Valley underwent a wrenching transition from a landscape of community to a landscape of fraud the betrayal of the O odham became complete when land that most elemental form of human space was transformed from a communal resource into a commodity bought and sold for its future value Today Mission Tumacacori stands as a romantic icon of the past while the landscapes that supported it lay buried under speculative schemes that continue to haunt our history *Life on Earth* Bruce Oakley Ph.D., 2025-03-04

Exciting insights await the reader of the book *Life on Earth* scientific and religious views Here we lay out the historical search for God and the DNA code of life The chemicals of life are best understood by examining cells because all creatures are composed of one or more cells The genes in each cell are long stretches of DNA used to link amino acids together into proteins RNA may critically adjust the activity of each gene and may have even been responsible for the emergence of life Clear illustrations make it easy to grasp how these molecular codes govern the life of cells *Life on our planet* is robust having persisted for nearly four billion years with evolutionary diversification into multitudes of microbes fungi plants and animals Survival of the fittest is not only a hallmark of the evolution of organisms but also of religions For example during the two centuries after Jesus Christian leaders cast aside numerous Gospels like the Gospel of Judas as unsuitable for the New Testament even actively suppressing the most shocking Gospels In addition to hoisting a powerful God the major religions deploy priests to provide moral guidance and compassion while touting a Heavenly fate after we die The briefness of our lives adds appeal to Christianity and other religions that offer immortality It is this hope of a sublime afterlife as touted in revered

texts and animated by claims of miracles and saints that keeps religion afloat Scientific evidence can run counter to some religious notions framed to stir devotion Undercut by fresh genetic evidence and spectacular sequences of dated fossils Intelligent Design of all species by God fails to account for the slow evolutionary descent of species And so it is that the roles of science and religion conflict Science seeks mysteries to explain Religion relies on mysteries to sustain Women are significant beneficiaries of the last two hundred years of biological research that has dramatically elevated our understanding about life while correcting several theological propositions The final chapter of Life on Earth indicates how climate change threatens our lives as it undercuts advances in public health that have doubled the human lifespan Successful and equitable solutions to worsening climate changes will not occur without a massive boost in the use and storage of solar and wind power a virtual elimination of carbon released into the atmosphere and ultimately a smaller human population

The Remarkable Story of Vaccines Norman Begg, 2022-08-18 Key Features Explores a highly topical concept of vaccines in a comprehensive and easy to read manner Engages the readers with relatable and interesting anecdotes Provides a balanced factual counter to the huge amount of current vaccine misinformation **The Nation and Athenæum**, 1910

Everybody Was So Young Amanda Vaill, 1999-04-20 A dazzling biography for readers of The Great Gatsby and other Lost Generation authors Gifted artist Gerald Murphy and his elegant wife Sara were icons of the most enchanting period of our time handsome talented and wealthy expatriate Americans they were at the very center of the literary scene in Paris in the 1920s In *Everybody Was So Young* Amanda Vaill brilliantly portrays both the times in which the Murphys lived and the fascinating friends who flocked around them Whether summering with Picasso on the French Riviera or watching bullfights with Hemingway in Pamplona Gerald and Sara inspired kindred creative spirits like Dorothy Parker Cole Porter and F Scott Fitzgerald Fitzgerald even modeled his main characters in *Tender is the Night* after the couple Their story is both glittering and tragic and in this sweeping and richly anecdotal portrait of a marriage and an era Amanda Vaill has brought them to life as never before Chicago Tribune *Literary Digest: a Repository of Contemporaneous Thought and Research as Presented in the Periodical Literature of the World* Edward Jewett Wheeler, Isaac Kaufman Funk, William Seaver Woods, 1901

Morbidity and Mortality, 1954 **Isandlwana** Adrian Greaves, 2014-04-19 The historian and founder of the Anglo Zulu War Historical Society presents his groundbreaking account of the Battle of Isandlwana The story of the British Army's defeat at Isandlwana in 1879 has been much written about but never with the detail and insight revealed by the research of Dr Adrian Greaves In reconstructing the dramatic and fateful events Greaves draws on newly discovered letters diaries and papers of survivors and other contemporaries These include the contemporary writings of central figures such as Henry Harford Lt Henry Carling of the Royal Artillery August Hammar and young British nurse Janet Wells These historical documents coupled with Greaves's own detailed knowledge of Zululand enable him to paint the most accurate picture yet of this cataclysmic battle that so shamed the British establishment We learn for the first time of the complex Zulu decoy the

attempt to blame Colonel Durnford for the defeat Greaves uncovers evidence of another Fugitives Trail escape route taken by battle survivors as well as the identity of previously unknown escorts for Lieutenants Coghill and Melville both awarded Victoria Crosses for trying to save the Colors **The Hallegram** ,1922 *Normal Instructor and Teachers World* ,1928

Miracle Cure William Rosen,2018-05-08 The epic history of how antibiotics were born saving millions of lives and creating a vast new industry known as Big Pharma As late as the 1930s virtually no drug intended for sickness did any good doctors could set bones deliver babies and offer palliative care That all changed in less than a generation with the discovery and development of a new category of medicine known as antibiotics By 1955 the age old evolutionary relationship between humans and microbes had been transformed trivializing once deadly infections William Rosen captures this revolution with all its false starts lucky surprises and eccentric characters He explains why given the complex nature of bacteria and their ability to rapidly evolve into new forms the only way to locate and test potential antibiotic strains is by large scale systematic trial and error experimentation Organizing that research needs large well funded organizations and businesses and so our entire scientific industrial complex built around the pharmaceutical company was born Timely engrossing and eye opening Miracle Cure is a must read science narrative a drama of enormous range combining science technology politics and economics to illuminate the reasons behind one of the most dramatic changes in humanity s relationship with nature since the invention of agriculture ten thousand years ago **Johnson's Universal Cyclopaedia** ,1895 **In the Name of Science** Andrew Goliszek,2003-11-15 As Goliszek demonstrates in this chilling book science has been called upon to kill people as often as it has to cure them The grim catalogue of inhumanities committed culminated with the Nazi experiments but in recent history the U S government has sponsored experiments on human subjects without their full knowledge
