Winning The Math Wars No Teacher Left Behind:

Winning the Math Wars Martin L. Abbott, Brian Ferriso, Karen Smith, 2011-07-01 Washington State is about to enter a new phase of the math wars Since the late 1980s the debate over how best to teach mathematics to schoolchildren has raged worldwide among educators politicians and parents The stakes are high To operate effectively in a global twenty first century economy and polity the United states must provide an education in mathematics that is both excellent and equitable In this volume four scholars at the Washington School Research Center WSRC at Seattle Pacific University present original research drawn from statistical studies of state educational data and from thousands of classroom observations carried out by The BERC Group They assess the current state of math education and review its history and development The authors also provide a dispassionate review of the extensive international national and state literature The in depth observational research in *Winning the Math Wars* confirms that the real issue is neither the approach to teaching traditional or reform nor the type of curriculum If America's goal of educational equity and excellence is to be achieved then math teachers everywhere must be fully supported in developing the specific skills that are ideal for educating all students The authors discussion focus on four principles for improving math teaching and learning fidelity to reform efforts by all involved an emphasis on instruction and instructional tools the critical nature of mathematical knowledge and the need for transformational change *Winning the Math Wars* is an important book for policy makers school leaders practitioners of mathematics education parents and anyone who wants to make sense of the math wars

The Program Evaluation Prism
Martin Lee Abbott, 2010-11-23 This book is a comprehensive treatment of correlation regression techniques and using SPSS for interpretation of findings Striking a balance between detailed coverage and approachability this book provides a thorough treatment of the elements of regression and how they can be used with real research problems in program evaluation The author begins with a basic introduction to evaluation methodology and its ability to recognize embedded patterns of meaning in research data Subsequent chapters explore the statistical tools that can be applied by researchers and evaluators irrespective of the design that was used to generate this data Topics of coverage include correlation single predictor regression multiple correlation part and partial correlation detection of extreme scores multiple regression regression with continuous predictors coding of categorical data regression with categorical predictors methods for entering predictors in multiple regression and interaction in multiple regression Each chapter is presented in the same comprehensive format an introduction to the topic followed by a discussion of its primary elements illustrations of the data through numerous tables and figures SPSS procedures for designing the analysis SPSS output of the analysis and guidance on how to interpret findings from the analyses Discover Note and Research Steps sections illustrate how using statistical processes can unveil unobserved patterns and assist readers with identifying such patterns in their own data Real world analyses are used throughout the book utilizing meaningful social issues as a catalyst for teaching statistical procedures and a related Web site

and policy makers *Tenure at a Crossroads, Again?* G.L.A. Harris, Dwight Vick, 2023-06-21 *Tenure at a Crossroads Again* goes beyond the explication of tenure to explore the contemporary challenges facing academia at the K 12 and higher education levels This edited volume is unique in the sense that it grapples issues from multiple viewpoints that of the university college administrator and professor to the K 12 educator The book examines increased expectations and how existing policies have spilled over into institutions of higher learning once high school graduates enter this domain Students educational expectations resonate with college administrators and policy makers forcing institutions to adapt to these needs This moves professors to dumb down the curricula and teaching to avoid negative evaluations and protect themselves from unwarranted retaliation This confluence of factors reverberates throughout the educational system producing unintended effects that have collectively led to an alliance between the administration and students in higher education much like those experienced by our K 12 colleagues yet now questions the rationale for tenure to re examine dilemmas that have long dogged higher education The most recent solution the corporatization of institutions but to the detriment of a quality education We offer practical strategies to mitigate this unilateral approach while incorporating innovative mechanisms for the system s survival
