Things Human and Divine Donald Phillip Verene, 2008-10-01 This is the first book to examine in full the interconnections between Giambattista Vico's new science and James Joyce's *Finnegans Wake*. Maintaining that Joyce is the greatest modern interpreter of Vico, Donald Phillip Verene demonstrates how images from Joyce's work offer keys to Vico's philosophy. Verene presents the entire course of Vico's philosophical thought as it develops in his major works, with Joyce's words and insights serving as a guide. The book devotes a chapter to each period of Vico's thought, from his early orations on education to his anti-Cartesian metaphysics and his conception of universal law culminating in his new science of the history of nations. Verene analyzes Vico's major works, including all three editions of the *New Science*. The volume also features a detailed chronology of the philosopher's career, historical illustrations related to his works, and an extensive bibliography of Vico scholarship and all English translations of his writings. Knowledge Systems in Africa Toyin Falola, Nicole Griffin, 2021-09-21 Key to African studies is understanding the knowledge systems of the continent and her diaspora. The representation and understanding of Africa are dependent on the observer's definition of knowledge. Afrocentric knowledge is comprised of a collection of political, religious, and indigenous belief systems. *Religious Beliefs and Knowledge Systems in Africa* begins with deconstructing the Western philosophy of knowledge, before defining and exploring the epistemic disciplines of Africa. It transcends postcolonial critique through an Afrocentric approach to knowledge, divided into three key themes. The first of these is the African worldview, exploring knowledge through eldership, witchcraft, and divination. This is followed up by kingship ideology and epistemologies, exploring how politics, religion, and belief shape African society. Finally, the world religion chapter examines Christianity, Islam, and Pentecostalism in their impact on African ways of knowing. This book calls to action new fields of study in universities, encouraging a greater understanding of African ways of knowing through more nuanced disciplines. **The**

of knowing from an Islamic perspective Mutahhari does not limit himself to the Islamic source texts and continuously engages with the views of a wide range of philosophers including Ghazali Ibn Sina Kant and Hegel Mutahhari's epistemological discussion covers a range of issues including whether it is possible to know the nature of knowledge stages of knowing the unconscious mind and truth He also examines materialism and provides a spiritual approach to some of these questions about knowledge which are vital to the human experience
