The Forgotten Officer Joe Kohler,2016-04-11 The Bible teaches that the church is the fullness of Christ on earth Eph 1:23 and that God is able to do abundantly beyond all that we ask or think according to the power at work within the church Eph 3:20 So why are so many people disappointed with their church experiences Why do so many outsiders view the church as irrelevant Why do so many hop from one church to the next looking for fulfillment Why are so many professing Christians seeking a form of Christian experience that no longer needs any connection with the organized church The truth is that we have collectively drifted away from God's blueprint for growing the body of Christ up into full maturity and attaining the fullness that he designed We have inherited a leadership model that is more influenced by pagan practices pragmatism and capitalism than by the Scriptures This cultural inheritance is extremely powerful and it has resulted in a contemporary blind spot on a biblical truth of critical importance It has led to our modern failure to properly recognize and appreciate a gift given by Jesus to his bride This is the bad news The good news is that reform is possible Learn what has been forgotten and rediscover the fullness of God's design for his church

Jesus, 2023-06-01 There is often a communication disconnect between medical caregivers including doctors nurses therapists and other assistive medical personnel and the patient While medical staff usually understand a patient s symptoms causes and treatments communicating this understanding to a patient using industry terminologies can lead to confusion and misunderstanding and similarly patients may lack the vocabulary to effectively communicate their experiences back to their caregivers A new approach to communication must be bridged between these groups by individuals who have experience on both sides of the conversation Previous studies of doctors who end up in the role of the patient reveal how these individuals have a dual perspective on illness combining their medical knowledge with their own personal medical experiences Narratives including autobiographical accounts and fictional stories can help bridge the gap between experiential and academic knowledge of illness by expanding one s limited perspective and accessing others points of view Autobiographical and fictional narratives can both play a role in developing a more comprehensive understanding of illness beyond simply treating the disease It is necessary to further examine the ethical and methodological underpinnings of narrative based interventions in the education of healthcare professionals practitioners and patients *Global Perspectives on Probing Narratives in Healthcare* offers a multidisciplinary examination of theoretical and methodological uses of narratives in healthcare by bringing together medical aspects of healthcare and the study of arts and humanities This illustrates specific applications of narratives in healthcare settings including improvement of clinical skills performance of the caring role and self efficacy for building a true partnership in the patient s health journey through varied approaches up to date tools and resources that can be transferred and adapted to specific educational and healthcare contexts This diverse collection of expert knowledge and experience is led by editors with over 20 years of teaching experience Dr Teresa Casal of the University of Lisbon Portugal and Dr Maria de Jesus Cabral of the University of Minho Portugal Expertise featured in this book includes contributions from some of the most prestigious academic institutions including Columbia University in the United States King s College in the United Kingdom University of Padua in Italy and more It is an essential resource for healthcare and social science researchers academics advanced healthcare students health training and education

The Awakening Ground David Chaim Smith, 2016-06-16 Author David Chaim Smith offers a guide to the practice of mystical contemplation from the perspective of a highly unusual form of non dual Kabbalah unfettered by both religious mythology and psychological reductionism The path articulates the ultimate quest for meaning which seeks to pass through the clutter of the mind s conceptual associations to nakedly and directly recognize the innate essentiality of all things known as the light of En no Sof end or the Infinite Most mainstream conventional schools of Kabbalah hold such a radical aspiration to be inapproachable at best and heretical at worst The work introduces six stages that articulate how the mind breaks through its own restrictive habitual reflexes to awaken to the ground of En Sof which is the mind s essential nature Each stage is illustrated by the author s own original works of art and line diagrams Draws upon obscure sources such as the 13th century Kabbalistic text Fountain of Wisdom various alchemical and gnostic texts and the writings of Isaac the Blind The author reveals how meaning never remains static its nature is to move transmit and display yet its precious potential becomes buried under layers of mental constructs He explains how the mind s habits and reflexes impose structures of containment that try to make sense out of phenomena but these very structures actually obscure their essence completely Smith s experiential path to gnostic awakening reveals how in the wake of the lesser concerns of the conceptual mind primordial purity shines in resonances of vast poetic beauty if a sensibility of wonder awe and delight is cultivated Offering a step by step analysis to the ecstatic aspects of contemplative revelation David Chaim Smith explores how to ride the razor s edge of the paradox to coax the mind from the sleep of habituation towards the culmination of gnosis Although the process is described within the traditional symbol system of kabbalah its import is a truly radical exponent of extreme mysticism

meeting intangible aspects of nature After exploring the role of ceremony in contemporary times the book concludes with an unexpected chapter on healing drawing together insights for a dynamic approach to health and wholeness as innate part of an embodied spirituality Moving seamlessly between her personal professional and academic background Kieft creates an unusual scholarship in which bodily and autobiographical narrative are neatly interwoven with interdisciplinary literature Its uniqueness lies in a radical integration of theory and practice which brings an aliveness to the material that stirs an inquisitive desire to move rooted in language that inspires confidence for personal inquiry into a rich and complex territory This inspiring book offers an intricate road map to explore and strengthen the interwovenness of various layers of self surroundings and the sacred distilling tools for a practical moving spirituality of the everyday
