K. Tracy, Hannah Dahlen, Lesley Dixon, 2018-10-01 Now available in two volumes for ease of use Book 1 focuses on the context of midwifery practice Book 2 focuses on midwifery practice New and significantly updated chapters include man rights in childbirth Midwifery as primary healthcare Birth place and birth space Social and environmental determinants of women s health Contraception Variations in normal Endorsed by the Australian College of Midwives ACM and the New Zealand College of Midwives NZCOM NEW to the Evolve resources a suite of 18 videos featuring interviews with midwifery lecturers and students who share inspirational insights advice challenges and opportunities for learning Now includes an eBook with all print purchases Traditional Midwives Robbie Davis-Floyd, Betty-Anne Daviss, Inayat Ali, 2025-10-30 Traditional Midwives Cross Cultural Perspectives is a pioneering work that delves deeply into the worlds of traditional midwives shedding light on their practices roles and the immense cultural value they hold within their respective communities wherever they are still allowed to practice This book not only champions the significance of traditional midwifery but also critiques the often misguided global and national initiatives that seek to move all childbirths into biomedical facilities These facilities as clearly shown by the chapters in this book are frequently underequipped and under staffed often providing substandard care that can often be obstetrically violent and abusive The push to move all births into such facilities disregards the quality of care that traditional midwives provide and undermines the trust and rapport they have built within their respective communities This global push is particularly detrimental to rural women because biomedical facilities are often located far away from such communities This geographical distance makes access to maternity care difficult if not impossible especially for rural women Furthermore almost none of the biomedical practitioners are willing to live and practice in such remote areas thereby leaving thousands of especially rural women without any maternity care provision Other critical points that this book addresses are the failures of the governmental efforts to train traditional midwives in higher level skills As the chapters in this book also clearly demonstrate the essence of traditional midwifery lies in experiential learning where skills are passed down through observation practice and mentoring By bringing to light the multiple challenges that are currently being faced by traditional midwives and the shortcomings of biomedical facilities this book serves as a crucial reminder of the need for culturally safe and sensitive community based maternity care that traditional midwives are fully able to provide It is an essential read for policymakers healthcare professionals students and for anyone who is interested in traditional midwives and their practices Supporting Physiological Birth Choices in Midwifery Practice Claire Feeley, 2023-02-28 Highlighting the experiences of midwives who provide care to women opting outside of guidelines in the pursuit of physiological birth Claire Feeley looks at the impact on midwives themselves and explores how teams and organisations support or discourage women s birth choices This book investigates the processes experiences and sociocultural political influences upon midwives who support women s alternative birthing choice and argues for a shift in perspective from notions of an individual s professional responsibility to deliver woman centred care to a broader collective responsibility The book

begins by contextualising the importance of quality midwifery care with an exploration of the current debates to demonstrate how hegemonic birth discourse and maternity practices have detrimentally affected physiological birth rates and the wellbeing of women who opt outside of maternity guidelines. It provides real life examples of how midwives can facilitate a range of birthing decisions within mainstream midwifery services. Moreover, an exploration of midwives' experiences of delivering such care is presented, revealing deeply polarised accounts from moral injury to job fulfilment. The polarised accounts are then presented within a new model to explore how a midwife's socio-political working context can significantly mediate or exacerbate the vulnerability, conflict and stigmatisation that they may experience as a result of supporting alternative birth choices. Finally, this book explores the implications of the findings, looking at how team and organisational culture can be developed to better support women and midwives, making recommendations for a systems approach to improving maternity services. Discussing the invisible nature of midwifery work, what it means to deliver woman-centred care and the challenges and benefits of doing so, this is a thought-provoking read for all midwives and future midwives. It is also an important contribution to interprofessional concerns around workforce development, sustainability, moral distress and compassion in health and social care.
