With over four million people filing with the FCC to Free the Net one thing is abundantly clear customers know something is terribly wrong Every time you pay your bills you notice that the price of your services keeps going up you don t have a serious choice for Internet ISP broadband or cable service much less competitors fighting for your business or maybe you can t even get very fast broadband service Worse over the last few years America s ISPs and cable companies have been rated the most hated companies in America While Net Neutrality concerns detailed in Broken Promises are important the actions are only a first step and will most likely be tied up in court for the next few years More importantly it does not resolve most of the customer issues and there is nothing else on the horizon that will fix what s broken Broken Promises documents the massive overcharging and failure to properly upgrade the networks the deceptive billing practices the harms caused from a lack of competition the gaming and manipulating of the regulatory system from the states to the FCC and exposes the companies primary strategy How much can we get away with There has been little if any regard for the customers they serve From <http://newnetworks.com/book/brokenpromises> viewed on June 12 2015 *The Book of Violations & Egregious Acts*
