Military Strategy in the 21st Century Kersti Larsdotter,2020-05-21 Military Strategy in the 21st Century explores military strategy and the new challenges facing Western democracies in the twenty first century including strategy in cyber operations and peacekeeping challenges for civil military relations and the strategic choices of great powers and small states The volume contributes to a better understanding of military strategy in the twenty first century through exploring strategy from three perspectives first the study of strategy and how our understanding of strategy has changed over time second new areas for strategic theory such as peacekeeping and cyberspace and third the makers of strategy and why states choose suboptimal strategies With the increasing number of threats challenging strategy makers such as great power rivalry terrorism intrastate wars and transnational criminal organisations Military Strategy in the 21st Century will be of great value to scholars of IR Security Studies Strategic Studies and War Studies as well as policymakers and practitioners working with military strategy in particular and international security and war in general The chapters were originally published as a special issue of the Journal of Strategic Studies The Practice of Strategy John Andreas Olsen,Colin S. Gray,2011-10-27 The Practice of Strategy focuses on grand strategy and military strategy as practiced over an extended period of time and under very different circumstances from the campaigns of Alexander the Great to insurgencies and counter insurgencies in present day Afghanistan and Iraq It presents strategy as it pertained not only to wars campaigns and battles but also to times of peace that were over shadowed by the threat of war The book is intended to deepen understanding of the phenomena and logic of strategy by reconstructing the considerations and factors that shaped imperial and nation state policies Through historical case studies the book sheds light on a fundamental question is there a unity to all strategic experience Adopting the working definition of strategy as the art of winning by purposely matching ends ways and means these chapters deal with the intrinsic nature of war and strategy and the characteristics of a particular strategy in a given conflict They show that a specific convergence of political objectives operational schemes of manoeuvre tactical moves and countermoves

technological innovations and limitations geographic settings transient emotions and more made each conflict studied unique Yet despite the extraordinary variety of the people circumstances and motives discussed in this book there is a strong case for continuity in the application of strategy from the olden days to the present Together these chapters reveal that grand strategy and military strategy have elements of continuity and change art and science They further suggest that the element of continuity lies in the essential nature of strategy and war while the element of change lies in the character of individual strategies and wars

The future of NATO and European defence Great Britain: Parliament: House of Commons: Defence Committee,2008-03-20 This report is presented prior to the NATO Summit at Bucharest in April 2008 and examines the status of NATO in dealing with the security environment that exists in Europe today The situation in Afghanistan offers a key test of the strengths and failings of the NATO Alliance To bring stability and encourage development and reconstruction in this region requires a long term military and financial commitment on the part of the Alliance Failure in Afghanistan may diminish the effectiveness of NATO and undermine allied unity perhaps pushing the United States to question the purpose of NATO itself The Bucharest Summit will have to address a number of issues in respect of Afghanistan including the need to generate sufficient military forces to carry out operations NATO faces broader questions about its role and relevance in the 21st century and the Defence Committee believes it needs to launch a far reaching review of its strategic concept setting forth a future role and purpose NATO s willingness to fulfil a global role is critical to the continued support of the United States NATO has shortfalls across a range of specific military capabilities which are seen as compromising its ability to mount and sustain the expeditionary operations that underpin the Alliance The creation of the NATO Response Force is seen as representing a significant achievement but it needs to be financed out of NATO Common Funding The Committee states that NATO s biggest shortfall is a lack of political will where a large and growing gap exists between the United States and the European members in defence spending The Committee further states that the relationship between NATO and the EU is plagued by mistrust and characterised by unhealthy competition Improving communication and coordination between the two is seen as essential The Committee views NATO as indispensable to the Alliance
