The Vanishing Hectare The Vanishing Hectare:

The Vanishing Hectare Katherine Verdery, 2003 In most countries in Eastern Europe and the former Soviet Union the fall of communism meant individuals could acquire land Based on fieldwork between 1990 and 2001 the author explores the importance of land and land ownership in one Transylvanian community *The Vanishing Hectare* Katherine Verdery, 2003 In most countries in Eastern Europe and the former Soviet Union the fall of communism meant individuals could acquire land Based on fieldwork between 1990 and 2001 the author explores the importance of land and land ownership in one Transylvanian community ***The Vanishing Hectare*** Katherine Verdery, 2018-05-31 In most countries in Eastern Europe and the former Soviet Union the fall of communism opened up the possibility for individuals to acquire land Based on Katherine Verdery's extensive fieldwork between 1990 and 2001 *The Vanishing Hectare* explores the importance of land and land ownership to the people of one Transylvanian community Aurel Vlaicu Verdery traces how collectivized land was transformed into private property how land was valued what the new owners were able to do with it and what it signified to each of the different groups vying for land rights Verdery tells this story about transforming socialist property forms in a global context showing the fruitfulness of conceptualizing property as a political symbol as a complex of social relations among people and things and as a process of assigning value This book is a window on rural life after socialism but it also provides a framework for assessing the neo liberal economic policies that have prevailed elsewhere such as in Latin America Verdery shows how the trajectory of property after socialism was deeply conditioned by the forms property took in socialism itself this is in contrast to the image of a tabula rasa that governed much thinking about post socialist property reform

The Walls Came Tumbling Down Gale Stokes, 2012 Gale Stokes *The Walls Came Tumbling Down* offered one of the most respected interpretations of the East European revolutions of 1989 for many years It provides a sweeping yet vivid narrative of the two decades of developments that led from the Prague Spring of 1968 to the collapse of communism in 1989 Highlights of that narrative include among other things discussions of Solidarity and civil society in Poland Charter 77 and the Velvet Revolution in Czechoslovakia and the bizarre regime of Romania's Nicolae Ceaușescu and his violent downfall In this second edition now appropriately subtitled *Collapse and Rebirth in Eastern Europe* Stokes not only has revised these portions of the book in the light of recent scholarship but has added three new chapters covering the post communist period including analyses of the unification of Germany and the collapse of the Soviet Union narratives of the admission of many of the countries of the region to the European Union and discussion of the unfortunate outcomes of the Wars of Yugoslav Succession in the Western Balkans *Scaling the Balkans* Maria N. Todorova, 2018-09-11 *Scaling the Balkans* puts in conversation several fields that have been traditionally treated as discrete Balkan studies Ottoman studies East European studies and Habsburg and Russian studies By looking at the complex interrelationship between countries and regions demonstrating how different perspectives and different methodological approaches inflect interpretations and conclusions it

Akerman, 2017-06-16 Almost universally newly independent states seek to affirm their independence and identity by making the production of new maps and atlases a top priority For formerly colonized peoples however this process neither begins nor ends with independence and it is rarely straightforward Mapping their own land is fraught with a fresh set of issues how to define and administer their territories develop their national identity establish their role in the community of nations and more The contributors to *Decolonizing the Map* explore this complicated relationship between mapping and decolonization

while engaging with recent theoretical debates about the nature of decolonization itself These essays originally delivered as the 2010 Kenneth Nebenzahl Jr Lectures in the History of Cartography at the Newberry Library encompass more than two centuries and three continents Latin America Africa and Asia Ranging from the late eighteenth century through the mid twentieth contributors study topics from mapping and national identity in late colonial Mexico to the enduring complications created by the partition of British India and the racialized organization of space in apartheid and post apartheid South Africa A vital contribution to studies of both colonization and cartography Decolonizing the Map is the first book to systematically and comprehensively examine the engagement of mapping in the long and clearly unfinished parallel processes of decolonization and nation building in the modern world **South Koreans in the Debt Crisis** Jesook Song,2009-08-18 Examines the rise of neoliberal social welfare policy in South Korea during the period of the Asian Debt Crisis the ultimate consequences of which include the reinforcing of traditional gender roles *The Nature of Soviet Power* Andy Bruno,2016-04-11 This in depth exploration of five industries in the Kola Peninsula examines Soviet power and its interaction with the natural world *The Old Faith and the Russian Land* Douglas Rogers,2016-02-04 The Old Faith and the Russian Land is a historical ethnography that charts the ebbs and flows of ethical practice in a small Russian town over three centuries The town of Sepych was settled in the late seventeenth century by religious dissenters who fled to the forests of the Urals to escape a world they believed to be in the clutches of the Antichrist Factions of Old Believers as these dissenters later came to be known have maintained a presence in the town ever since The townspeople of Sepych have also been serfs free peasants collective farmers and now shareholders in a post Soviet cooperative Douglas Rogers traces connections between the town and some of the major transformations of Russian history showing how townspeople have responded to a long series of attempts to change them and their communities tsarist era efforts to regulate family life and stamp out Old Belief on the Stroganov estates Soviet collectivization drives and antireligious campaigns and the marketization religious revival and ongoing political transformations of post Soviet times Drawing on long term ethnographic fieldwork and extensive archival and manuscript sources Rogers argues that religious political and economic practice are overlapping arenas in which the people of Sepych have striven to be ethical in relation to labor and money food and drink prayers and rituals religious books and manuscripts and the surrounding material landscape He tracks the ways in which ethical sensibilities about work and prayer hierarchy and inequality gender and generation have shifted and recombined over time Rogers concludes that certain expectations about how to be an ethical person have continued to orient townspeople in Sepych over the course of nearly three centuries for specific identifiable and often unexpected reasons Throughout he demonstrates what a historical and ethnographic study of ethics might look like and uses this approach to ask new questions of Russian Soviet and post Soviet history T&T Clark Handbook of Anthropology and the Hebrew Bible Emanuel Pfoh,2022-12-15 This handbook presents an overview of the main approaches from social and cultural anthropology to the Hebrew Bible Since the late 19th century

biblical scholarship has addressed issues and themes related to biblical stories from a perspective which could now be considered socio anthropological It is however only since the 1960s that biblical scholars have started to produce readings and incorporate analytical models drawn directly from social anthropology to widen the interpretive scope of the social and historical data contained in the biblical sources The handbook is arranged into two main thematic parts Part 1 assesses the place of the Bible in social anthropology examines the contribution of ethnoarchaeology to the recovery of the social world of Iron Age Palestine and offers insights from the anthropology of the Mediterranean for the interpretation of the biblical stories Part 2 provides a series of case studies on anthropological themes arising in the Hebrew Bible These include kinship and social organisation death cultural and collective memory and ritualism Contributors also examine how the biblical stories reveal dynamics of power and authority gender and honour and shame and how socio anthropological approaches can reveal these narratives and deepen our knowledge of the human societies and cultural context of the texts Bringing together the expertise of scholars of the Hebrew Bible and Biblical Archaeology this ethnographic introduction prompts new questions into our understanding of anthropology and the Bible

Behind the Glass Michael Lambek, 2022-10-03 The Villa Tugendhat designed by Mies van der Rohe in 1928 is an icon of architectural modernism and a UNESCO World Heritage site Behind the Glass tells the true story of the large family connected to it who rose to prominence through industrial textile manufacturing The book traces the transformations in the life of the family from their roots in a Jewish ghetto to part of the wealthy bourgeoisie in the Austro Hungarian Empire to adaptation in interwar independent Czechoslovakia and flight in the face of Nazi invasion Michael Lambek examines the generation born in the first decade of the twentieth century especially Grete Tugendhat Lambek's maternal grandmother who commissioned inhabited championed and relinquished the distinctive modern house An exploration of life in and surrounding the Villa Tugendhat offers a factual portrait that runs counter to the fictional one portrayed in Simon Mawer's *The Glass Room* The book also provides unpublished correspondence between Martin Heidegger and Ernst Tugendhat Grete's son as well as a description of the impact of a 2017 family reunion Behind the Glass reflects on the meaning of a family and suggests that it is more than a nuclear household a family reproduces itself over generations a product of how it represents itself and is represented by others

The Value of Labor Martha Lampland, 2016-09-15 At the heart of today's fierce political anger over income inequality is a feature of capitalism that Karl Marx famously obsessed over the commodification of labor Most of us think wage labor economics is at odds with socialist thinking but as Martha Lampland explains in this fascinating look at twentieth century Hungary there have been moments when such economics actually flourished under socialist regimes Exploring the region's transition from a capitalist to a socialist system and the economic science and practices that endured it she sheds new light on the two most polarized ideologies of modern history Lampland trains her eye on the scientific claims of modern economic modeling using Hungary's unique vantage point to show how theories policies and techniques for commodifying agrarian labor that were born in the

capitalist era were adopted by the socialist regime as a scientifically designed wage system on cooperative farms Paying attention to the specific historical circumstances of Hungary she explores the ways economists and the abstract notions they traffic in can both shape and be shaped by local conditions and she compellingly shows how labor can be commodified in the absence of a labor market The result is a unique account of economic thought that unveils hidden but necessary continuities running through the turbulent twentieth century **The Sovietization of Rural Hungary, 1945-1980** József Ö.

Kovács,Gergely Krisztián Horváth,Gábor Csikós,2023-06-05 In this book the experiential history of the Soviet style social transformation projects between 1945 and 1980 is discussed through the example of rural Hungary The book interprets state socialism as a modernization project Existing socialism was a form of dictatorship in which authorities sought to transform the mentalities of their subjects from the individual level to the global scale This project depended on socio economic homogenization one important method of asserting state power was the transformation of property rights land redistribution collectivization Communist modernization discriminated against the inhabitants of rural areas who were the primary victims of collectivization and the discriminatory effects of the rules implemented by policymakers The resulting radical changes in peasant lifestyles would become a source of social pathologies However not the authorities but contemporary scholars considered the social costs of these actions The book aims at Weberian disenchantment and contributes to the deconstruction of the common image of Hungarian socialism the happiest barrack The intended audience includes readers at the graduate level in the fields of history political science and anthropology general readers interested in the history of communism It is hoped that the research questions inspire new research for exploring convergent and divergent elements in social transformation in former communist countries **The Handbook of Sociocultural Anthropology** James G.

Carrier,Deborah B. Gewertz,2020-06-29 he Handbook of Sociocultural Anthropology presents a state of the art overview of the subject its methodologies current debates history and future It will provide the ultimate source of authoritative critical descriptions of all the key aspects of the discipline as well as a consideration of the general state of the discipline at a time when there is notable uncertainty about its foundations composition and direction Divided into five core sections the Handbook examines the changing theoretical and analytical orientations that have led to new ways of carrying out research presents an analysis of the traditional historical core and how the discipline has changed since 1980 considers the ethnographic regions where work has had the greatest impact on anthropology as a whole outlines the people and institutions that are the context in which the discipline operates covering topics from research funding to professional ethics Bringing together leading international scholars the Handbook provides a guide to the latest research in social and cultural anthropology Presenting a systematic overview and offering a wide range of examples insights and analysis it will be an invaluable resource for researchers and students in anthropology as well as cultural and social geography cultural studies and sociology **The Problem of Order in the Global Age** A. Pickel,2006-08-06 This important contribution to the study

of the problem of order which figures prominently in today's globalization debate focuses on the role of sovereignty. It advances arguments based on psychocultural perspectives and looks at postcommunist transformations and changes in political, economic and cultural orders at all levels of social life.

Socioeconomic and Environmental Impacts on Agriculture in the New Europe Serban Scrieciu, 2011-03-13 This book looks at agriculture and the environment placed within the dynamic context of post-communist societal change and entry into the European Union. Scrieciu explores developments in eleven Central and Eastern European (CEE) countries and argues for agriculture's natural place in these societies. The history of these countries is significant in how it has shaped the institutions and influenced the outcomes. In many cases during communism, agriculture was not considered a strategic priority. An ecological consciousness did not figure high on the agendas of authoritarian regimes. After 1990, some post-communist farm economies progressed slower than others and environmental pressures mostly diminished with agricultural restructuring. In parts of CEE, increases in numbers of low-input small farms have resulted in some, though largely unintended, ecological benefits. A dual environmental challenge has nevertheless surfaced. On one hand, environmentally unsustainable practices have been attributed to some low-input farming. On the other hand, risks of farm over-intensification and resource overexploitation are on the rise. Also, environmental regulatory and institutional frameworks are not always effectively in place. EU membership is not creating the anticipated benefits for farm growth. There are a number of systemic structural barriers preventing many farmers from drawing on Common Agricultural Policy incentives and support. The presence of many vulnerable, poor farms is clearly problematic, particularly economically. However, small-scale farms could be made more acceptable and profitable by ensuring EU policies acknowledge their value and by building institutions to support alternative farm growth strategies aside from the traditional European model of individual corporate farm expansion. The voluntary uptake of grassroots rural cooperation and farm associations may represent such an alternative. Future European farm policy reforms need to reach the small and vulnerable and better tackle issues of farm equity, poverty and agricultural sustainability in the new Europe. This is a timely contribution as this type of transition has just begun. This book should be of use to students and researchers looking at agricultural and environmental economics, post-communist rural societal change, European integration and the Common Agricultural Policy.

The Emergence of a New Urban China Zai Liang, 2012-02-16 This book provides first-hand insiders' perspectives on urban issues in China, aiming to provide a theoretically informed and empirically rich discussion of the new social landscape of urban China in the 21st century. The research reported encompasses both quantitative and qualitative methodologies, with the latter based on extensive and in-depth fieldwork. The authors, most of them being native Chinese, had distinctive advantages in gaining access to study subjects and had intimate knowledge of the locations and people they studied. The book's primary geographical focus is on southern China, especially Guangdong province. This region is in the forefront of China's transition to a market economy and therefore constitutes an ideal social laboratory to study the key urban issues that have

emerged in the last two decades Combining ethnographic research along with survey based quantitative analysis this volume will appeal to students of urban issues in contemporary China and it will generate important and fresh empirical and theoretical insights for the broader scholarly communities of area studies urban studies and urban sociology It will also serve as a useful text for graduate courses and advanced undergraduate courses on China and urban sociology
