Debus,2016-06-21 From their discovery in the 19th century to the dawn of the Nuclear Age dinosaurs were seen in popular culture as ambassadors of the geological past and as icons of the life through time narrative of evolution They took on a more foreboding character during the Cold War serving as a warning to mankind with the advent of the hydrogen bomb As fears of human extinction escalated during the ecological movement of the 1970s dinosaurs communicated their metaphorical message of extinction urging us from our destructive path Using an eclectic variety of examples this book outlines the three fold evolution of dinosaurs and other prehistoric monsters in pop culture from their poorly understood beginnings to the 21st century *Japanese Diplomacy in the 1950s* Makoto Iokibe,Caroline Rose,Junko Tomaru,John Weste,2008-02-19 This book provides a detailed examination of Japan s diplomatic relations in the 1950s an important decade in international affairs when new structures and systems emerged and when Japan established

patterns in its international relationships which continue today It examines the process of Japan's attempts to rehabilitate itself and reintegrate into a changing world and the degree of success to which Japan achieved its goals in the political economic and security spheres The book is divided into three parts each containing three chapters Part I looks at Japan in the eyes of the Anglo American powers Part II at Japanese efforts to gain membership of newly forming regional and international organizations and Part III considers the role of domestic factors in Japanese foreign policy making Important issues are considered including Japanese rearmament and the struggle to gain entry into the United Nations In contrast to much of the academic literature on post war Japanese diplomacy generally presenting Japan as a passive actor of little relevance or importance this book shows that Japan did not simply sit passively by but formed and attempted to instigate its own visions into the evolving regional and global structures It also shows that whilst Japan did not always figure as highly as its politicians and policy makers may have liked in the foreign policy considerations of other nation states many countries and organizations did attach a great deal of importance to re building relations with Japan throughout this period of re adjustment and transformation

Nagasaki Susan Southard, 2017-08-31 On August 9th 1945 the US dropped an atomic bomb on Nagasaki It killed a third of the population instantly and the survivors or hibakusha would be affected by the life altering medical conditions caused by the radiation for the rest of their lives They were also marked with the stigma of their exposure

to radiation and fears of the consequences for their children Nagasaki follows the previously unknown stories of five survivors and their families from 1945 to the present day It captures the full range of pain fear bravery and compassion unleashed by the destruction of a city Susan Southard has interviewed the hibakusha over many years and her intimate portraits of their lives show the consequences of nuclear war Nagasaki tells the neglected story of life after nuclear war and will help shape public debate over one of the most controversial wartime acts in history Published for the 70th anniversary of the Hiroshima and Nagasaki bombs this is the first study to be based on eye witness accounts of Nagasaki in the style of John Hersey s Hiroshima On August 9th 1945 three days after the atomic bombing of Hiroshima a 5 tonne plutonium bomb was dropped on the small coastal city of Nagasaki The explosion destroyed factories shops and homes and killed 74 000 people while injuring another 75 000 The two atomic bombs marked the end of a global war but for the tens of thousands of survivors it was the beginning of a new life marked with the stigma of being hibakusha atomic bomb affected people Susan Southard has spent a decade interviewing and researching the lives of the hibakusha raw emotive eye witness accounts which reconstruct the days months and years after the bombing the isolation of their hospitalisation and recovery the difficulty of re entering daily life and the enduring impact of life as the only people in history who have lived through a nuclear attack and its aftermath Following five teenage survivors from 1945 to the present day Southard unveils the lives they have led their injuries in the annihilation of the bomb the dozens of radiation related cancers and illnesses they have suffered the humiliating and frightening choices about marriage they were forced into as a result of their fears of the genetic diseases that may be passed through their families for generations to come The power of Nagasaki lies in the detail of the survivors stories as deaths continued for decades because of the radiation contamination which caused various forms of cancer Intimate and compassionate while being grounded in historical research Nagasaki reveals the censorship that kept the suffering endured by the hibakusha hidden around the world For years after the bombings news reports and scientific research were censored by U S occupation forces and the U S government led an efficient campaign to justify the necessity and morality of dropping the bombs As we pass the seventieth anniversary of the only atomic bomb attacks in history Susan Southard captures the full range of pain fear bravery and compassion unleashed by the destruction of a city The personal stories of those who survived beneath the mushroom clouds will transform the abstract perception of nuclear war into a visceral human experience Nagasaki tells the neglected story of life after nuclear war and will help shape public discussion and debate over one of the most controversial wartime acts in history

The Dialectics of Ecology John Bellamy

Foster,2024-04 Today the fate of the earth as a home for humanity is in question and yet contends John Bellamy Foster the reunification of humanity and the earth remains possible if we are prepared to make revolutionary changes As with his prior books The Dialectics of Ecology is grounded in the contention that we are now faced with a concrete choice between ecological socialism and capitalist exterminism and rooted in insights drawn from the classical historical materialist tradition

In this latest work Foster explores the complex theoretical debates that have arisen historically with respect to the dialectics of nature and society. He then goes on to examine the current contradictions associated with the confrontation between capitalist extractivism and the financialization of nature on the one hand and the radical challenges to these represented by emergent visions of ecological civilization and planned degrowth on the other. **Happiness is a Cool Reactor** G.J. Reed, 2021-05-12

Happiness Is a Cool Reactor A Journey in Nuclear Power Influenced by the Three Mile Island Accident
Nuclear power has been and continues to be a mystery to many people. This book tells the story of the journey of an average individual who for over forty years because of unintentional turns of events became an active member of the industry and learned to understand and support this challenging but rewarding technology. With global warming and growing demands for energy worldwide, nuclear power plants in conjunction with renewable energy sources is the most promising way to support our future generations. This book describes the fundamental concepts associated with nuclear power in a manner that can be easily understood by the average individual. It puts into perspective the risks from nuclear plant operation while using the 1979 Three Mile Island accident as a backdrop. It also explains the effects from uncontrolled reactor accidents like Chernobyl and Fukushima Daiichi in a balanced perspective and explains how the industry has learned from these tragic events to become a much safer one. You will learn about the fission process and how it is controlled as well as how unstable atoms produce radiation and heat in the reactor core. The book describes how this heat continues to be generated even after a reactor is shut down and thus systems are designed to try to keep the core cool at all times even during accidents. When a reactor cannot be kept cool then emergency plans must be activated that provide measures to provide public protection. This book describes how these plans work and are regularly tested. You will also learn about radiation exposure controls that have improved over time and how you can calculate how much exposure to radiation that you personally receive on an annual basis.

Food and War in Mid-Twentieth-Century East Asia Katarzyna J. Cwiertka, 2016-04-15
War has been both an agent of destruction and a catalyst for innovation. These two at first sight contradictory yet mutually constitutive outcomes of war waging are particularly pronounced in twentieth century Asia. While 1945 marked the beginning of peaceful recovery for Europe, military conflicts continued to play a critical role in the historical development of this part of the world. In essence all wars in twentieth century Asia stemmed from the political vacuum that developed after the fall of the Japanese Wartime Empire intricately connecting one region with another. Yet they have had often very diverse consequences shattering the homes of some and bringing about affluence to others. Disarray of war may halt economic activities and render many aspects of life insignificant. The need for food however cannot be ignored and the social action that it requires continues in all circumstances. This book documents the effects of war on the lives of ordinary people through the investigation of a variety of connections that developed between war waging and the production, distribution, preparation and consumption of food throughout Asia since the 1930s. The topics addressed range from issues at stake at the time of the conflicts such as

provisioning the troops and food rationing and food relief for civilians to long term often surprising consequences of war waging and wartime mobilization of resources on the food systems diets and tastes of the societies involved The main argument of this volume is that war has not been a mere disruption but rather a central force in the social and cultural trajectories of twentieth century Asia Due to its close connection with human nourishment and comfort food stands central in the life of the individual On the other hand owing to its connection with profit and power food plays a critical role in the social and economic organization of a society What happens to food and eating is therefore an important index of change a privileged basis for the exploration of historical processes **Britain, Australia and the Bomb** L. Arnold, M.

Smith, 2006-09-29 Britain Australia and the Bomb tells the story of the unique partnership between the two countries to develop nuclear weapons in the 1940s and 1950s This new edition includes fresh evidence about the weapons under development the effects of the tests on participants and the recent clean up of the testing range
