**Society And Climate: Transformations And Challenges** Nico Stehr, Amanda Machin, 2019-07-30 Climate has for a long time been a taken for granted background against which social political and economic interactions have taken place But this taken for granted background is cleaving It is becoming hard to ignore the potential repercussions of a changing climate and the uneven impact of certain forms of human society and energy cultures that risk undermining their own environmental conditions In a comprehensive and accessible way this book

*The Nature of Tomorrow* Michael Rawson, 2021-11-16 An examination of how Western visions of endless future growth have contributed to the global environmental crisis For centuries the West has produced stories about the future in which humans use advanced science and technology to transform the earth Michael Rawson uses a wide range of works that include Francis Bacon's *New Atlantis* the science fiction novels of Jules Verne and even the speculations of think tanks like the RAND Corporation to reveal the environmental paradox at the heart of these narratives the single minded expectation of unlimited growth on a finite planet Rawson shows how these stories which have long pervaded Western dreams about the future have helped to enable an unprecedentedly abundant and technology driven lifestyle for some while bringing the threat of environmental disaster to all Adapting to ecological realities he argues hinges on the ability to create new visions of tomorrow that decouple growth from the idea of progress

**The Reason for the Darkness of the Night** John Tresch,2021-06-15 Finalist for the Los Angeles Times Book Prize Finalist for the 2022 Edgar Award Winner of the 2021 Quinn Award An innovative biography of Edgar Allan Poe highlighting his fascination and feuds with science Decade after decade Edgar Allan Poe remains one of the most popular American writers He is beloved around the world for his pioneering detective fiction tales of horror and haunting atmospheric verse But what if there was another side to the man who wrote *The Raven* and *The Fall of the House of Usher* In *The Reason for the Darkness of the Night* John Tresch offers a bold new biography of a writer whose short tortured life continues to fascinate Shining a spotlight on an era when the lines separating entertainment speculation and scientific inquiry were blurred Tresch reveals Poe's obsession with science and lifelong ambition to advance and question human knowledge Even as he composed dazzling works of fiction he remained an avid and often combative commentator on new discoveries publishing and hustling in literary scenes that also hosted the era's most prominent scientists semi scientists and pseudo intellectual rogues As one newspaper put it Mr Poe is not merely a man of science not merely a poet not merely a man of letters He is all combined and perhaps he is something more Taking us through his early training in mathematics and engineering at West Point and the tumultuous years that followed Tresch shows that Poe lived thought and suffered surrounded by science and that many of his most renowned and imaginative works can best be understood in its company He

cast doubt on perceived certainties even as he hungered for knowledge and at the end of his life delivered a mind bending lecture on the origins of the universe that would win the admiration of twentieth century physicists Pursuing extraordinary conjectures and a unique aesthetic vision he remained a figure of explosive contradiction he gleefully exposed the hoaxes of the era s scientific fraudsters even as he perpetrated hoaxes himself Tracing Poe s hard and brilliant journey The Reason for the Darkness of the Night is an essential new portrait of a writer whose life is synonymous with mystery and imagination and an entertaining erudite tour of the world of American science just as it was beginning to come into its own

**The Mistral** Catherine Tatiana Dunlop,2024-10-14 An in depth look at the hidden power of the mistral wind and its effect on modern French history Every year the chilly mistral wind blows through the Rh ne valley of southern France across the Camargue wetlands and into the Mediterranean Sea Most forceful when winter turns to spring the wind knocks over trees sweeps trains off their tracks and destroys crops Yet the mistral turns the sky clear and blue as it often appears in depictions of Provence The legendary wind is central to the area s regional identity and has inspired artists and writers near and far for centuries This force of nature is the focus of Catherine Dunlop s The Mistral a wonderfully written examination of the power of the mistral wind and in particular the ways it challenged central tenets of nineteenth century European society order mastery and predictability As Dunlop shows while the modernizing state sought liberation from environmental realities through scientific advances land modification and other technological solutions the wind blew on literally crushing attempts at control and becoming increasingly integral to regional feelings of place and community

from everyday aesthetics to geoengineering this book argues that an aesthetics of weather inflected by greater knowledge and the taking of a critical stance towards aestheticism can become a valuable ally to climate ethics in the Anthropocene
