Gangale, 2018-11-26 In *How High the Sky* jurist Thomas Gangale explores the oldest and most important controversy in space law how far up does national airspace go and where does the international environment of outer space begin Even though nations did not object to the first satellites flying over their sovereign territory after more than six decades there is still no international agreement on how low the right of space object overflight extends nor are there agreed legal definitions of space object and space activity Dr Gangale brings his background as an aerospace engineer to bear in exploding long held beliefs of the legal community and he offers a draft international convention to settle the oldest and most intractable problems in space law *Empires of the Sky* Alexander Rose, 2021-05-25 The Golden Age of Aviation is brought to life in this story of the giant Zeppelin airships that once roamed the sky a story that ended with the fiery destruction of the Hindenburg Genius a definitive tale of an incredible time when mere mortals learned to fly Keith O'Brien The New York Times At the dawn of the twentieth century when human flight was still considered an impossibility Germany's Count Ferdinand von Zeppelin vied with the Wright Brothers to build the world's first successful flying machine As the Wrights labored to invent the airplane Zeppelin fathered the remarkable airship sparking a bitter rivalry between the two types of aircraft and their innovators that would last for decades in the quest to control one of humanity's most inspiring achievements And it was the airship not the airplane that led the way In the glittery 1920s the count's brilliant protégé Hugo Eckener achieved undreamed of feats of daring and skill including the extraordinary Round the World voyage of the Graf Zeppelin At a time when America's airplanes rickety deathtraps held together by glue screws and luck could barely make it from New York to Washington D C Eckener's airships serenely traversed oceans without a single crash fatality or injury What Charles Lindbergh almost died doing crossing the Atlantic in 1927 Eckener had effortlessly accomplished three years before the Spirit of St Louis even took off Even as the Nazis sought to exploit Zeppelins for their own nefarious purposes Eckener built his masterwork the behemoth Hindenburg a marvel of design and engineering Determined to forge an airline empire under the new flagship Eckener met his match in Juan Trippe the ruthlessly ambitious king of Pan American Airways who believed his fleet of next generation planes would vanquish Eckener's coming airship armada It was a fight only one man and one technology could

win Countering each other's moves on the global chessboard each seeking to wrest the advantage from his rival the struggle for mastery of the air was a clash not only of technologies but of business diplomacy politics personalities and the two men's vastly different dreams of the future Empires of the Sky is the sweeping untold tale of the duel that transfixed the world and helped create our modern age **The Sky Soldiers** Victor R.
