The Winner Effect The Neuroscience Of Success And Failure:

The Winner Effect Ian Robertson,2012-01-01 What makes a winner Why do some succeed both in life and in business and others fail And why do a few individuals end up supremely powerful while many remain powerless Are men more likely to be power junkies than women The winner effect is a term used in biology to describe how an animal that has won a few fights against weak opponents is much more likely to win later bouts against stronger contenders As Ian Robertson reveals it applies to humans too Success changes the chemistry of the brain making you more focused smarter more confident and more aggressive The effect is as strong as any drug And the more you win the more you will go on to win But the downside is that winning can become physically addictive By understanding what the mental and physical changes are that take place in the brain of a winner how they happen and why they affect some people more than others Robertson answers the question of why some people attain and then handle success better than others He explains what makes a winner or a loser and how we can use the answers to these questions to understand better the behaviour of our business colleagues employees family and friends

The Winner Effect Ian H. Robertson,2012-10-16 **The Winner Effect** Ian H. Robertson,2012-10-16 Robertson shows how success causes dramatic changes to brains that make people smarter more focused and more ruthless He reveals how power can be as physically addictive as any drug and able to make people worse not better at succeeding in the future

Fail Brilliantly Shelley Davidow, Paul Williams, 2017-09-05. An immensely intriguing new approach that can successfully combat the shame, anxiety, and blame that failing induces too readily in our society. Laurie Hollman, PhD, author of *Unlocking Parental Intelligence*. We spend much of our lives trying to cope with failure. For many of us, adults and children alike, the prospect of failure looms as a debilitating concept in our minds. It can not only stop us from succeeding, it can stop us from even trying. *Fail Brilliantly* proposes a radical shift: erase the word and concept of failure from the realms of education and human endeavors. Replace it with new words and concepts. This shift in position has the potential to transform our lives and ultimately reshape our definition of success.

The Oxford Handbook of Virtue Nancy E. Snow, 2018. The late twentieth and early twenty-first centuries have seen a renaissance in the study of virtue, a topic that has prevailed in philosophical work

since the time of Aristotle Several major developments have conspired to mark this new age Foremost among them some argue is the birth of virtue ethics an approach to ethics that focuses on virtue in place of consequentialism the view that normative properties depend only on consequences or deontology the study of what we have a moral duty to do The emergence of new virtue theories also marks this new wave of work on virtue Put simply these are theories about what virtue is and they include Kantian and utilitarian virtue theories Concurrently virtue ethics is being applied to other fields where it hasn't been used before including bioethics and education In addition to these developments the study of virtue in epistemological theories has become increasingly widespread to the point that it has spawned a subfield known as virtue epistemology This volume therefore provides a representative overview of philosophical work on virtue It is divided into seven parts conceptualizations of virtue historical and religious accounts contemporary virtue ethics and theories of virtue central concepts and issues critical examinations applied virtue ethics and virtue epistemology Forty two chapters by distinguished scholars offer insights and directions for further research In addition to philosophy authors also deal with virtues in non western philosophical traditions religion and psychological perspectives on virtue

Psychology of Career Adaptability, Employability and Resilience Kobus Maree,2017-12-05 This book examines how the career counselling profession should respond to the changes in the world of work that have resulted from the increasing need to communicate faster and disseminate information more efficiently It emphasizes the twin aims of enhancing a persons career adaptability and helping them to become more employable rather than linearly trying to find a job and remaining in one organisation for their entire career lives The book shows that to achieve these aims people need to acquire career resilience especially since the world of work no longer provides workers with work holding environments for the duration of their career lives It takes into account historical analyses which show that whenever major technological change has occurred and widespread job losses have ensued people have managed to use the new technology to create new employment opportunities Readers from career psychology and management research vocational and professional career coaching and students of career psychology will find this book delivers sound updated theory demonstrating how perceived threats in the 21st century can conceivably be turned into opportunities

Minority Party Misery Jacob F.H. Smith,2021-03-30 This book examines the role of minority party status on politicians engagement in electoral politics Jacob Smith argues that politicians are more likely to be engaged in electoral politics when they expect their party to be in the majority in Congress after the next election and less likely when they anticipate their party will be in the minority This effect is particularly likely to hold true in recent decades where parties disagree on a substantial number of issues Politicians whose party will be in the majority have a clear incentive to engage in electoral politics because their preferred policies have a credible chance of passing if they are in the majority In contrast it is generally difficult for minority party lawmakers to get a hearing on much less advance their preferred policies particularly when institutional rules inside Congress favor the majority party Instead minority party lawmakers spend most of their time fighting losing battles against policy proposals from the majority party Minority Party Misery examines the consequences of the powerlessness that politicians feel from continually losing battles to the majority party in Congress Its findings have important consequences for democratic governance as highly qualified minority party politicians may choose to leave office due to their dismal circumstances rather than continue to serve until their party eventually reenters the majority

The African American Male School Adaptability Crisis (Amsac) Joe L. Rempson,2016-03-12 The African American Male School Adaptability Crisis AMSAC cannot be solved by the school alone It is a race problem which can only be solved if we black males provide the leadership in tackling our three major demons which now mainly account for the problem IQ lag fatherless families crime AMSAC had its origin about 100 years ago when after the death of Washington DuBois gained ascendancy in our African American Garden of Eden and replaced Washingtons brains property and character gospel with a civil rights agenda That agenda has led to a civil rights fixation and our second bondage Victimology wherein being the victim has become part of our core identity and made us psychological slaves Rather than being proud and self reliant disproportionately we have come to see ourselves as victims who are entitled to system help and special treatment This bondage and it is a bondage vitiates our manhood and the energy and drive required to pursue the adaptation pathway paved by Washington but demonized by DuBois Return to that pathway

and we can confront and conquer AMSAC and our three major demons Guided by history and the research evidence this book details how Its 20 chapters make for long reading but just by reading the first and last chapters you can get the message The motto of the proposed evidence based experimental program the African American Male Career Pathway Program AMCAP A special appeal is made to black athletes and entertainers to help propagate this motto and support the proposed high school student clubs Student AMCAPs in its implementation *Career Assessment* Mary McMahan,Mark Watson,2015-07-21

Explores the experience of one young man and the concerns about CTE he helped to illuminate and the cultural allure of football in America that keeps boys trying to make the team despite the dangers Award winning journalist Vicki Mayk raises a critical question for football players and their communities does loving a sport justify risking your life This is the insightful and deeply human story of Owen Thomas a star football player at Penn who took his own life when he was 21 the result of the pain and anguish caused by chronic traumatic encephalopathy CTE It was Owen s landmark case which demonstrated that a player didn t need years of head bashing in the NFL or even multiple sustained brain concussions to cause the mind altering life threatening degenerative disease known as CTE And Owen s case could not have come to light without Dr Ann McKee the neuropathologist who bucked conventional wisdom and the football establishment as she examined Owen s brain and its larger significance building an ever stronger case that said at the very least football should not be played by children under the age of 14 With its focus on a single life and the community touched by it Owen s family his teammates and friends his teachers and coaches and later Dr McKee *Growing Up on the Gridiron* explores the place of football in our lives It doesn t make a heavy handed argument to abandon the sport

Rather it explores why football matters so deeply to many young men and why they continue to take risks despite the evidence of serious long term harm Engaging Higher Education Teachers and Students With Transnational Leadership Morris, Gareth Richard, Kozuch, Shayna, 2024-04-26 Higher education is at a crossroads facing unprecedented challenges threatening its traditional models and practices The COVID 19 pandemic coupled with shifts towards self reliance and restricted student mobility has created a dichotomy of factors impacting the sector Institutions must find new ways to attract students and remain competitive in a rapidly changing landscape Additionally leaders and managers are grappling with issues such as employee wellbeing digital transformation and the need to foster a culture of learning and diversity Engaging Higher Education Teachers and Students With Transnational Leadership provides a comprehensive roadmap for navigating the future of higher education from a leadership and management perspective Drawing on real world examples and concrete advice it offers insights into critical topics such as employee wellbeing AI digital transformation and student engagement The book equips leaders and managers with the tools they need to adapt and thrive in uncertainty by exploring new education models institutional governance and the impact of new technologies **Eight Propositions** Joe L. Rempson, 2020-11-19 Rempson takes issue with those who lay the plight of African Americans on racism not seeing it today as a major obstacle to black progress Rather he traces the origin back to what he terms the African American Garden of Eden In it W E B Dubois outlasted Booker T Washington and fathered a tradition which Rempson argues has produced a victim identity and an emphasis on the system rather than the self Only black males offer a way out he declares because it is entirely our black males who are keeping us down and curtailing our progress in contrast to black females who are doing OK They are plagued by what Rempson calls the African American Male School Adaptability Crisis AMSAC Their academic performance ranks at the bottom alone below black female students and below white Asian and Hispanic male students In large urban areas their high school dropout rate is 59 percent and nationally they lag behind in college attendance and graduation rates The outcome Rempson argues is dysfunctionality and the existence of hedonistic norms which hinder family and community stability But while black males are the problem Rempson contends it is nevertheless only they who can solve it because research and experience show that it takes males to bring up and change other males Though intended for everyone he therefore writes his book to his fellow advantaged black males and makes a passionate plea for them to step up and with the help of black females and of the nation take the lead As their guide he has formulated eight propositions Arrived at through an examination of impressively extensive data from numerous sources and disciplines they are a marked departure from the customary Most strikingly delicate matters such as those which pertain to intelligence quotient IQ and culture are openly confronted and dealt with But Rempson writes unless confronted we will not solve our problems Nor he continues can we solve them unless we cut the umbilical cord to white America We have no right to expect it to be our savior nor are we justified in perceiving it as our oppressor Forcefully and finely written Rempson s book is a singular and courageous
