The Uses Of Argument The Uses Of Argument:

The Uses of Argument Stephen E. Toulmin, 2003-07-07 In spite of initial criticisms from logicians and fellow philosophers The Uses of Argument has been an enduring source of inspiration and discussion to students of argumentation from all kinds of disciplinary background for more than forty years Frans van Eemeren University of Amsterdam *The uses of argument* Stephen Toulmin, 2003 A central theme throughout the impressive series of philosophical books and articles Stephen Toulmin has published since 1948 is the way in which assertions and opinions concerning all sorts of topics brought up in everyday life or in academic research can be rationally justified Is there one universal system of norms by which all sorts of arguments in all sorts of fields must be judged or must each sort of argument be judged according to its own norms In The Uses of Argument 1958 Toulmin sets out his views on these questions for the first time In spite of initial criticisms from logicians and fellow philosophers The Uses of Argument has been an enduring source of inspiration and discussion to students of argumentation from all kinds of disciplinary background for more than forty years **The Uses of Argument** Stephen E. Toulmin, 1958-01-02 Traditionally logic has been claimed to be the science of rational argument but the relevance to our everyday disputes of the formal logician's results has remained unclear The abstract character of traditional logic cuts the subject off from practical considerations Mr Toulmin enquires why this is so and shows how an alternative conception can be of more general value Starting from an examination of the actual procedures in different fields of argument the practice as opposed to the theory of logic he discloses a richer variety than is allowed for by any available system He argues that jurisprudence rather than mathematics should be the logician's model in analysing rational procedures and that logic should be a comparative and not a purely formal study These suggestions lead to conclusions which many will consider controversial though they will also be widely recognized as interesting and illuminating This book extends into general philosophy lines of enquiry already sketched by Mr Toulmin in his earlier books on ethics and the philosophy of science The ordinary reader will find in it the same clarity and intelligibility and the professional philosopher will acknowledge the same power to break new ground and circumvent old difficulties by posing fresh and stimulating questions **The Uses of Argument** Stephen Edelston Toulmin, 1958 **The Uses of argument** Stephen Edelston Toulmin, 1980 **The Uses of Argument, by**

Freeman,2011-09-20 No detailed description available for *Dialectics and the Macrostructure of Arguments* *Groundwork in the Theory of Argumentation* J. Anthony Blair,2011-10-20 J Anthony Blair is a prominent international figure in argumentation studies He is among the originators of informal logic an author of textbooks on the informal logic approach to argument analysis and evaluation and on critical thinking and a founder and editor of the journal *Informal Logic* Blair is widely recognized among the leaders in the field for contributing formative ideas to the argumentation literature of the last few decades This selection of key works provides insights into the history of the field of argumentation theory and various related disciplines It illuminates the central debates and presents core ideas in four main areas Critical Thinking Informal Logic Argument Theory and Logic Dialectic and Rhetoric **Arguing on the Toulmin Model** David Hitchcock,Bart Verheij,2007-01-24 Summarizing in *The Uses of Argument* Toulmin emphasized a number of points that are by now familiar but still deserve attention 1 Reasoning and argument involve not only support for points of view but also attack against them 2 Reasoning can have qualified conclusions 3 There are other good types of argument than those of standard formal logic 4 Unstated assumptions linking premisses to a conclusion are better thought of as inference licenses than as implicit premisses 5 Standards of reasoning can be field dependent and can be themselves the subject of argumentation Each of these points is illustrated by his layout of arguments The rebuttal illustrates the first point the qualifier the second point and the warrant and backing the last three points 2 RECEPTION OF TOULMIN S BOOK As Toulmin himself notes in his essay in this volume which was delivered as an address in 2005 his fellow philosophers we re initially hostile to the ideas in his book They were taken up however by specialists in fields like jurisprudence and psychology who found that they fit the form s of argument and reasoning that they were studying And Toulmin s model was embraced by the field of speech communication in the United States whose textbooks on argumentation now include an obligatory chapter on the Toulmin model of micro arguments *The Process of Argument* Alfred Sidgwick,1893 Argument Structure: James

B. Freeman, 2011-03-23 This monograph first presents a method of diagramming argument macrostructure synthesizing the standard circle and arrow approach with the Toulmin model A theoretical justification of this method through a dialectical understanding of argument a critical examination of Toulmin on warrants a thorough discussion of the linked convergent distinction and an account of the proper reconstruction of enthymemes follows The Uses of Argument Daniel

Farr, Ontario Society for the Study of Argumentation, 2005 **Argumentation across Communities of Practice** Cornelia Ilie, Giuliana Garzone, 2017-11-15 Featuring multidisciplinary and transcultural investigations this volume showcases state of the art scholarship about the impact of argumentation based discourses and field specific argumentation practices in a wide range of communities of practice belonging to the media social legal and political spheres The investigations make use of integrative wide ranging theoretical perspectives and empirical research methodologies with a focus on argumentation strategies in real life environments both private and public and in constantly growing virtual environments This book brings together linguists argumentation scholars philosophers and communication specialists who convincingly show how interpersonal and or intergroup interactions shape challenge or change the argumentative practices of users what argumentation skills and strategies become critical and consequential how argumentative discourse contexts may stimulate or prevent critical reflection and debate and what are the wider implications at personal institutional and societal levels Reaching beyond the boundaries of linguistics and argumentation sciences this book should be a valuable resource for researchers as well as practitioners in the fields of pragmatic linguistics argumentation studies rhetoric discourse analysis political sciences and media studies **Argument Evaluation and Evidence** Douglas Walton, 2015-08-04 This monograph

poses a series of key problems of evidential reasoning and argumentation It then offers solutions achieved by applying recently developed computational models of argumentation made available in artificial intelligence Each problem is posed in such a way that the solution is easily understood The book progresses from confronting these problems and offering solutions to them building a useful general method for evaluating arguments along the way It provides a hands on survey explaining to the reader how to use current argumentation methods and concepts that are increasingly being implemented in more precise ways for the application of software tools in computational argumentation systems It shows how the use of these tools and methods requires a new approach to the concepts of knowledge and explanation suitable for diverse settings such as issues of public safety and health debate legal argumentation forensic evidence science education and the use of expert opinion evidence in personal and public deliberations **The Pragmatics of Straw Man Fallacies: An Experimental Approach**

Jennifer Schumann, 2025-07-25 This open access book provides the first experimental pragmatic investigation of the straw man uncovering a variety of factors that increase or decrease the acceptability of this fallacy The book starts with an overview of the primarily theoretical frameworks on argumentation fallacies and the straw man The aim is to provide a synthetic review of the research conducted in argumentation and the study of fallacies with a strong focus on modern

approaches and the role of language within these approaches. It is followed by an overview of the empirical methods in argumentation which leads the reader to the core part of the book, i.e. the experimental pragmatic approach to the straw man fallacy. This part of the book presents several original studies assessing the role of different linguistic factors in the perception of straw men. The book is structured as follows: Chapter 1 introduces the book. The reader will be familiarised with the topic of the straw man as a fallacious argument and the research axes of the book. Chapter 2 provides an overview of argumentation and fallacy theory and the role of language in the selected approaches. Chapter 3 discusses various theoretical approaches to the straw man fallacy. Chapter 4 provides an overview of empirical methodologies in argumentation. Chapter 5 presents a series of exploratory studies discussing three pragmatic factors. Chapter 6 addresses the question of information structure for the communication of straw man fallacies. Chapter 7 presents a more detailed analysis of the role of causal connectives used to introduce an argument. Chapter 8 presents a cross linguistic examination of the role of causal connectives with attributive functions. Chapter 9 focuses on the refutational dimension of the straw man fallacy. The previous chapters have mainly investigated factors related to the misrepresentational dimension of the straw man. Chapter 10 provides a summary of the main findings and opens toward future lines of investigation. The book targets young and senior scholars interested in research on straw man fallacies, experimental approaches to the study of fallacies and argumentation in general.
