information you need to know Teachers students scholars historians and browsers with a passing interest in this beautiful and richly distinct region will quickly come to rely on the Encyclopedia of Appalachia as the authoritative resource on Appalachia's past and present The Encyclopedia details subjects traditionally associated with Appalachia folklore handcrafts mountain music foods and coal mining but goes far beyond regional stereotypes to treat such wide ranging topics as the aerospace industry Native American foodways ethnic diversity in the coalfields education reform linguistic variation and the contested notion of what it means to be Appalachian both inside and outside the region Researched and developed by the Center for Appalachian Studies and Services at East Tennessee State University this 1 840 page compendium includes all thirteen states that constitute the northern central and southern subregions of Appalachia from New York to Mississippi With thorough detailed yet accessible entries on everything from Adventists to zinc mining the Encyclopedia of Appalachia is an indispensable one stop guide to all things Appalachian **The Complete Walker IV** Colin Fletcher, Chip

Song of the Alpine Joyce Gellhorn, 2002 Celebrating her life long love for the land above the trees author Joyce Gellhorn takes readers on a season by season tour of the alpine tundra With clear readable prose and 140 beautiful color photographs from her collection that spans some twenty five years Gellhorn reveals the subtle wonders of this haunting landscape The plants and animals that populate this often harsh and unforgiving environment have evolved remarkable strategies for survival in their high mountain home Faced with bitter cold scouring winds and fierce storms they must somehow hold on and still find water and nourishment Gellhorn tells us how they do it and the intricacies and precariousness of these strategies are astonishing The high country of the Colorado Rocky Mountains has been a destination and a home for Joyce Gellhorn for more than fifty years including some twelve years spent living with her family at the University of Colorado's research station Science Lodge a log cabin at 9 500 feet Like the snow that would sift through the chinks in the cabin the alpine despite its harshness captured her heart She writes The clear mountain air the scenery the invigorating feeling of physical activity and the fascinating plants animals and insects captivated me Through the years these wind blown forlorn places continue to excite me It is their wildness untamed and unpredictable No matter how many times I visit the alpine even areas I know intimately it always shows a different face
