Wits Guide 2015 For Undergraduatr Application:

Understanding the Higher Education Market in Africa Emmanuel Mogaji, Felix Maringe, Robert Ebo Hinson, 2020-03-06
This book offers theoretical and practical insights into the marketing of higher education in Africa. It explores the key players, challenges, and policies affecting higher education across the continent, their marketing strategies, and the students' selection process. While acknowledging the vast size of the continent, this book aims to provide an understanding of the dynamics of higher education in Africa. This book recognises the private and government involvement in higher education provision and students and staff as stakeholders in the marketisation process. Strategic efforts are directed by universities to attract prospective students. This book further addresses issues such as the responses of higher education sectors to the notion of markets and marketing, consumerism, and competition in higher education in Africa, conceptions of the commodification of higher education in Africa, and the dominance of Western epistemologies and their influence in transforming higher education sectors. Students as consumers in increasingly marketised higher education sectors in Africa are also discussed. Though primarily for marketing students and academic researchers, the book's feature of blended theoretical and practical knowledge means that it will also be of interest to marketing practitioners and university managers. Shadow Libraries Joe Karaganis, 2018-05-04
How students get the materials they need as opportunities for higher education expand but funding shrinks. From the top down, *Shadow Libraries* explores the institutions that shape the provision of educational materials from the formal sector of universities and publishers to the broadly informal ones organized by faculty copy shops, student unions, and students themselves. It looks at the history of policy battles over access to education in the post World War II era and at the narrower versions that have played out in relation to research and textbooks from library policies to book subsidies to more recently the several open publication models that have emerged in the higher education sector. From the bottom up, *Shadow Libraries* explores how simply students get the materials they need. It maps the ubiquitous practice of photocopying and what are in many cases the more marginal ones of buying books, visiting libraries, and downloading from unauthorized sources. It looks at the informal networks that emerge in many contexts to share materials from face-to-face student networks to Facebook groups and at the processes that lead to the consolidation of some of those efforts into more organized archives that circulate offline and sometimes online: the shadow libraries of the title. If Alexandra Elbakyan's Sci-Hub is the largest of these efforts to date, the more characteristic part of her story is the prologue: the personal struggle to participate in global scientific and educational communities and the recourse to a wide array of ad hoc strategies and networks when formal authorized means are lacking. If Elbakyan's story has struck a chord, it is in part because it brings this contradiction in the academic project into sharp relief: universalist in principle and unequal in practice. *Shadow Libraries* is a study of that tension in the digital era. Archaeology and Anthropology of Rock Art Bruno David, Ian J. McNiven, 2018 Rock art is one of the most visible and geographically widespread of cultural expressions and it spans much of the period of our species existence Rock art also provides rare and often unique insights into the minds and visually creative capacities of our ancestors and how selected rock outcrops with distinctive images were used to construct symbolic landscapes and shape worldviews Equally important rock art is often central to the expression of and engagement with spiritual entities and forces and in all these dimensions it signals the diversity of cultural practices across place and through time Over the past 150 years archaeologists have studied ancient arts on rock surfaces both out in the open and within caves and rock shelters and social anthropologists have revealed how people today use art in their daily lives The Oxford Handbook of the Archaeology and Anthropology of Rock Art showcases examples of such research from around the world and across a broad range of cultural contexts giving a sense of the art's regional variability its antiquity and how it is meaningful to people in the recent past and today including how we have ourselves tended to make sense of the art of others replete with our own preconceptions It reviews past present and emerging theoretical approaches to rock art investigation and presents new cutting edge methods of rock art analysis for the student and professional researcher alike

Work 4 0 *Trade, Investment and Economic Development in Asia* Debashis Chakraborty, Jaydeep Mukherjee, 2016-05-26

In an era of globalization, trade in goods and cross border services and capital flows play a key role in determining the economic growth path of countries. Over the last two decades, countries have embarked on several alternate tracks to liberalize and deepen their linkage with the world economy. The growing trade investment nexus and the emerging developments lead to deeper international production networks, rise in cross border trade in services and in regional trade agreements and so on. The debate of whether it is possible to empirically validate the potential benefits of this deepening trade investment linkage is ongoing. The evidence in literature is however ambiguous. This book contributes to the literature by looking at Asian economies and at the EU, Maghreb countries and Pacific Island economics. It examines the issues under four broad areas: namely 1. trade, theoretical and policy issues; 2. factor flows, impact on trade and welfare; 3. impact of trade and factor flows on environment; and 4. institutions, international trade and policy issues.
