Encyclopedia of Feminist Literature Kathy J. Whitson, 2004-12-30 Many women writers have secured a solid place in the literary canon while others have remained marginalized This reference includes alphabetically arranged entries on roughly 70 women writers whose works are widely read in English and on some 20 related topics While some of the writers profiled are widely known others have not yet received as much attention And while most of the writers are from England and America the volume also profiles Chilean Brazilian Indian South African Australian French and German authors The writers selected are feminist in that their works have challenged traditional gender roles explored female oppression or critiqued patriarchal social structures In addition to providing biographical information the entries include interpretative summaries of major works Each author entry includes biographical information an extensive summary treatment of at least one of her works an list of her other major works cross references to related entries and a list of works for further reading What distinguishes this encyclopedia from the many other volumes addressing feminist literature or literature by women is the interpretative summary in each entry The volume closes with a list of works cited Entries are clearly written and are accessible to high school students and undergraduates Reception History, Tradition and Biblical Interpretation Robert Evans, 2014-08-28 This study seeks to make a contribution to current debates about the nature of *Wirkungsgeschichte* or reception history and its place in contemporary Biblical Studies The author addresses three crucial questions the relationship between reception history and historical critical exegesis the form of reception history itself with a focus on the issue of which acts of reception are selected and valorized and the role of tradition pre judgements and theology in relation to reception history Disagreements about these matters contribute to what many characterise as the fragmentation of the discipline of biblical studies The study champions the hermeneutics of Hans Georg Gadamer as a theoretical resource for understanding biblical interpretation and a way of holding together with integrity the varied activities undertaken within the discipline Each aspect of the argument is illustrated tested and further explored with reference to the post history of exhortations in the New Testament to be subject These have been widely cited and applied for 2 000 years in literature law

and politics as well as in theological traditions In this way the study makes a contribution not just to the theory but also the practice of reception history Novel Institutions Mary L. Mullen, 2019-07-02 Intro Series Editor's Preface
