Degrammaticalization Muriel Norde, 2009-09-17 Muriel Norde shows that linguistic change via the well

attested process of grammaticalization is reversible and that degrammaticalization can occur on all levels semantic morphological syntactic and phonological Her careful analysis of the process makes a significant contribution to methods of linguistic reconstruction and language change *The Dawn of Dutch* Michiel de Vaan, 2017-12-14 The Low Countries are famous for their radically changing landscape over the last 1 000 years Like the landscape the linguistic situation has also undergone major changes In Holland an early form of Frisian was spoken until very roughly 1100 and in parts of North Holland it disappeared even later The hunt for traces of Frisian or Ingvaemonic in the dialects of the western Low Countries has been going on for around 150 years but a synthesis of the available evidence has never appeared The main aim of this book is to fill that gap It follows the lead of many recent studies on the nature and effects of language contact situations in the past The topic is approached from two different angles Dutch dialectology in all its geographic and diachronic variation and comparative Germanic linguistics In the end the minute details and the bigger picture merge into one possible account of the early and high medieval processes that determined the make up of western Dutch *The Changing English Language* Marianne Hundt, Sandra Mollin, Simone E. Pfenninger, 2017-07-20 Experts from psycholinguistics and English historical linguistics address core factors in language change **Cognitive Sociolinguistics Revisited** Gitte Kristiansen, Karlien Franco, Stefano De Pascale, Laura Rosseel, Weiwei Zhang, 2021-11-22 Cognitive Sociolinguistics draws on the rich theoretical framework of Cognitive Linguistics and focuses on the social factors that underlie the variability of meaning and conceptualization In the last decade the field has expanded in various way The current volume takes stock of current and emerging advances in the field in short academic contributions The studies collected in this book have a usage based approach to language variation and change drawing on the theoretical framework of Cognitive Linguistics and are sensitive to social variation be it cross linguistic or language internal Three types of contributions are collected in this book First it contains theoretical overview papers on the domains that have witnessed expansion in recent years Second it presents novel research ideas in proof of concept contributions aimed at blue sky research and out of the box linguistic analyses Third it showcases recent empirical studies within the field By combining these three types of contributions the book provides an encompassing overview of novel developments in the field of Cognitive Sociolinguistics *Derivational Networks Across Languages* Livia Körtevelyessy, Alexandra Bagasheva, Pavol Štekauer, 2020-06-08 This pioneering research brings a new insight into derivational processes in terms of theory method and typology Theoretically it conceives of derivation as a three dimensional system Methodologically it introduces a range of parameters for the evaluation of derivational networks including the derivational role combinability and blocking effects of semantic categories the maximum derivational potential and its actualization in relation to simple underived words and the maximum and average number of orders of derivation Each language specific chapter has a unified structure which made it possible to identify in the final typologically oriented chapter the systematicity and regularity in developing derivational networks in a sample of forty European languages and in

a few language genera and families This is supported by considerations about the role of word classes morphological types and the differences and similarities between word formation processes of the languages belonging to the same genus family

Category Change from a Constructional Perspective Kristel Van Goethem, Muriel Norde, Evie Coussé, Gudrun Vanderbauwhede, 2018-03-15 Category change broadly defined as the shift from one word class to another is often studied as part of other changes such as grammaticalization or lexicalization but not in its own right This volume offers a survey of different types of category change and their properties e g abrupt versus gradual changes morphological versus syntactic changes or context independent versus context sensitive changes The purpose of this collection of papers is to explore the concepts of linguistic category and category change from the perspective of Construction Grammar Using data from a variety of languages the authors address a number of themes that are central to current theorizing about category change such as the question of whether or not categories should be considered discrete entities how new categories arise or whether category change can be considered as the emergence of a new construction i e a new form meaning pairing The novel approach advanced in this volume will be of interest to historical linguists as well as to general linguists working on the nature of linguistic categories [The Naxos Papers, Volume I](#) Nikolaos Lavidas, Alexander Bergs, Elly van

Gelderen, 2020-09-18 This volume synthesizes recent approaches to the study of historical English and long established philological scholarship Using this synthesis it casts doubt upon the old antagonisms between modern linguistics and traditional approaches and makes the historical study of English accessible to scholars and students of both backgrounds This book brings together 10 studies on various characteristics of the historical development of English and mainly Old and Middle English first presented in workshops at the Old and Middle English and Language Variation and Change in Ancient and Medieval Europe summer schools organized in Naxos Greece It includes studies derived from the first four workshops New Approaches to the History of Early English es I II and III and Language Change in Indo European I The first part of the volume emphasizes the synchronic description of syntactic morphological and semantic features of Old English while the second section emphasizes explanations of the development of various features of English starting with Old English

schatkist voor historici en liefhebbers van de geschiedenis van de Nederlandse Opstand Het biedt een intiem portret van het bewogen leven van een Brabantse familie in Londen in tijden van burgeroorlog en laat zien hoe de pater familias Emanuel probeert zijn waarden op zijn kinderen over te dragen Het bevat onbekende gedichten tal van nieuwe gegevens en fascinerende anekdotes en spectaculaire geschilderde portretten van Emanuel en zijn vrouw Hester van den Corput
