Wolves Behavior Ecology And Conservation:

Wolves L. David Mech, Luigi Boitani, 2010-10-01 Wolves are some of the world's most charismatic and controversial animals capturing the imaginations of their friends and foes alike. Highly intelligent and adaptable, they hunt and play together in close knit packs sometimes roaming over hundreds of square miles in search of food. Once teetering on the brink of extinction across much of the United States and Europe, wolves have made a tremendous comeback in recent years thanks to legal protection, changing human attitudes, and efforts to reintroduce them to suitable habitats in North America. As wolf populations have rebounded, scientific studies of them have also flourished. But there hasn't been a systematic comprehensive overview of wolf biology since 1970. In *Wolves*, many of the world's leading wolf experts provide state-of-the-art coverage of just about everything you could want to know about these fascinating creatures. Individual chapters cover wolf social ecology, behavior, communication, feeding habits, and hunting techniques, population dynamics, physiology, and pathology, molecular genetics, evolution, and taxonomy, interactions with nonhuman animals such as bears and coyotes, reintroduction, interactions with humans, and conservation and recovery efforts. The book discusses both gray and red wolves in detail and includes information about wolves around the world from the United States and Canada to Italy, Romania, Saudi Arabia, Israel, India, and Mongolia. *Wolves* is also extensively illustrated with black and white photos, line drawings, maps, and fifty color plates. Unrivalled in scope and comprehensiveness, *Wolves* will become the definitive resource on these extraordinary animals for scientists and amateurs alike. An excellent compilation of current knowledge with contributions from all the main players in wolf research. It is designed for a wide readership and certainly the language and style will appeal to both scientists and wolf enthusiasts alike. This is an excellent summary of current knowledge and will remain the standard reference work for a long time to come. Stephen Harris, *New Scientist*. This is the place to find almost any fact you want about wolves. Stephen Mills, *BBC Wildlife Magazine*.

Picturing the Wolf in Children's Literature Debra Mitts-Smith, 2012-12-06 From the villainous beast of Little Red Riding Hood and The Three Little Pigs to the nurturing wolves of Romulus and Remus and Rudyard Kipling s The Jungle Book the wolf has long been a part of the landscape of children s literature Meanwhile since the 1960s and the popularization of scientific research on these animals children s books have begun to feature more nuanced views In Picturing the Wolf in Children s Literature Mitts Smith analyzes visual images of the wolf in children s books published in Western Europe and North America from 1500 to the present In particular she considers how wolves are depicted in and across particular works the values and attitudes that inform these depictions and how the concept of the wolf has changed over time What she discovers is that illustrations and photos in works for children

impart social cultural and scientific information not only about wolves but also about humans and human behavior First encountered in childhood picture books act as a training ground where the young learn both how to decode the symbolic wolf across various contexts and how to make sense of real wolves Mitts Smith studies sources including myths legends fables folk and fairy tales fractured tales fictional stories and nonfiction highlighting those instances in which images play a major role including illustrated anthologies chapbooks picture books and informational books This book will be of interest to children s literature scholars as well as those interested in the figure of the wolf and how it has been informed over time

Mechanistic Home Range Analysis Paul R. Moorcroft,Mark A. Lewis,2013-10-31 Spatial patterns of movement are fundamental to the ecology of animal populations influencing their social organization mating systems demography and the

spatial distribution of prey and competitors However our ability to understand the causes and consequences of animal home range patterns has been limited by the descriptive nature of the statistical models used to analyze them In *Mechanistic Home Range Analysis* Paul Moorcroft and Mark Lewis develop a radically new framework for studying animal home range patterns based on the analysis of correlated random walk models for individual movement behavior They use this framework to develop a series of mechanistic home range models for carnivore populations The authors analysis illustrates how in contrast to traditional statistical home range models that merely describe pattern mechanistic home range models can be used to discover the underlying ecological determinants of home range patterns observed in populations make accurate predictions about how spatial distributions of home ranges will change following environmental or demographic disturbance and analyze the functional significance of the movement strategies of individuals that give rise to observed patterns of space use By providing researchers and graduate students of ecology and wildlife biology with a more illuminating way to analyze animal movement *Mechanistic Home Range Analysis* will be an indispensable reference for years to come

Owned, An Ethological Jurisprudence of Property Johanna Gibson, 2019-12-06 This book draws upon domestication science to undertake a radical reappraisal of the jurisprudence of property and intellectual property Bringing together animal studies and legal philosophy it articulates a critique of dominant property models and relationships from the perspective of cognitive ethology domestication science and animal behaviour In doing so a radical new picture of property emerges Focusing on the emergence of property models through prevailing ideas of human domestication and settlement the book challenges the anthropocentrism that informs standard approaches to ownership and to authorship Utilising a wide range of examples from ethology and animal studies the book thus rethinks the very nature of property as uniquely human This highly original contribution to the fields of property and intellectual property will appeal not only to legal scholars in these areas as well as in animal law but also to legal theorists and others working in the social sciences with interests in posthumanism and animal studies

Social Strategies of Carnivorous Mammalian Predators Mridula Srinivasan, Bernd Würsig, 2023-09-18 The book offers a comparative look at the social strategies of five carnivorous social predators four terrestrial and one marine that make them successful hunting units The focus is on mammalian predators hunting largely mammalian prey Each chapter with separate authors devoted to a particular species explores the versatile hunting techniques and social dynamics of these top predators as they attempt to survive defend and reproduce in challenging habitats Each chapter also delves into how the social fabric and ecology of each species influence their ability to deal with natural and man made threats and shifting baselines

Nathalie Pettorelli, Sarah M. Durant, Johan T. du Toit, 2019-01-31 Through a global and interdisciplinary lens this book discusses analyzes and summarizes the novel conservation approach of rewilding The volume introduces key rewilding definitions and initiatives highlighting their similarities and differences It reviews matches and mismatches between the current state of ecological knowledge and the stated aims of rewilding projects and discusses the role of human action in rewilding initiatives Collating current scholarship the book also considers the merits and dangers of rewilding approaches as well as the economic and socio political realities of using rewilding as a conservation tool Its interdisciplinary nature will appeal to a broad range of readers from primary ecologists and conservation biologists to land managers policy makers and conservation practitioners in NGOs and government departments Written for a scientifically literate readership of academics researchers students and managers the book also acts as a key resource for advanced undergraduate and graduate courses

The Domestic Dog James Serpell, 2017 Second edition of a classic text on canine science and behavior incorporating two decades of new evidence and discoveries *A Wolf Called Romeo* Nick Jans, 2014 A Wolf Called Romeo is the remarkable story of a wolf who returned again and again to interact with the people and dogs of Juneau living on the edges of their community engaging in an improbable awe inspiring interspecies dance and bringing the wild into sharp focus At first the people of Juneau were guarded torn between shoot first ask questions later instincts and curiosity But as Romeo began to tag along with cross country skiers on their daily jaunts play fetch with local dogs or simply lie near Nick and nap under the sun they came to accept Romeo and he them For Nick it was about trying to understand Romeo then it was about winning his trust and ultimately it was about watching over him for as long as he or anyone could *Hybrid Communities* Charles Stépanoff, Jean-Denis Vigne, 2018-08-06 Domestication challenges our understanding of human environment relationships because it blurs the dichotomy between what is artificial and what is natural In domestication biological evolution environmental change techniques and practices anthropological trajectories and sociocultural choices are inextricably interconnected Domestication is essentially a hybrid phenomenon that needs to be explored with hybrid scientific approaches Hybrid Communities Biosocial Approaches to Domestication and Other Trans species Relationships attempts for the first time to explore domestication viewed from across disciplines both in its origins and as an ongoing process This edited collection proposes new biosocial approaches and concepts which integrate the methods of social sciences archaeology and biology to shed new light on domestication in diachrony and in synchrony This book will be of great interest to all scholars working on human environment relationships and should also attract readers from the fields of social anthropology archaeology genetics ecology botany zoology history and philosophy *Recovery of Gray Wolves in the Great Lakes Region of the United States*

Adrian P. Wydeven, Timothy R. van Deelen, Edward Heske, 2009-02-27 In this book we document and evaluate the recovery of gray wolves *Canis lupus* in the Great Lakes region of the United States. The Great Lakes region is unique in that it was the only portion of the lower 48 states where wolves were never completely extirpated. This region also contains the area where many of the first modern concepts of wolf conservation and research were developed. Early proponents of wolf conservation such as Aldo Leopold, Sigurd Olson, and Durward Allen lived and worked in the region. The longest ongoing research on wolf-prey relations (see Vucetich and Peterson Chap 3) and the first use of radio telemetry for studying wolves (see Mech Chap 2) occurred in the Great Lakes region. The Great Lakes region is the first place in the United States where endangered wolf populations recovered. All three states (Minnesota, Wisconsin, and Michigan) developed ecologically and socially sound wolf conservation plans, and the federal government delisted the population of wolves in these states from the United States list of endangered and threatened species on March 12, 2007 (see Refsnider Chap 21). Wolf management reverted to the individual states at that time. Although this delisting has since been challenged, we believe that biological recovery of wolves has occurred and anticipate the delisting will be restored. This will be the first case of wolf conservation reverting from the federal government to the state conservation agencies in the United States.
