Women Astronomers Reaching For The Stars Discovering Women In Science:

Women Astronomers Mabel Armstrong, 2008 Recounts the participation of women in the field of astronomy from ancient history to the present day **Making the Invisible Visible** M. J. Hardman, Anita Taylor, Catherine Wright, 2013-09-04 All that is human is mediated through language And because we learned the process of being human in a culture as we learned the language of that culture much that we learned remains invisible to us But even though invisible it guides what and how we learn and remember our perceptions our behaviors including communicative behaviors Throughout our lives that early language culture learning affects us all too often without our realizing The discoveries about that early learning that this book makes possible enable readers to see through their language and learn to live productively and engage fully in mutually fulfilling relationships This book talks back to the old adage Sticks and stones can break my bones but words can never hurt We show how words do hurt of course not by breaking bones but by damaging self confidence reputations livelihoods or provoking people to the point of breaking bones or worse We focus on the roles of gender in language in effective or failed communication We direct attention to invisible impacts of daily language use When the invisible becomes visible readers can see the many ways daily talk and interactions create and reinforce genders We explore how language functions its sources of power and why it resists change even when negative impacts are clear We explore how in part through hidden gendering English disadvantages many of its users and point to how the problems emerge in the ways gender functions in this supposedly non gendered language We describe how gendered language guides us to create and reinforce behaviors and relationships we do not intend We conclude with suggestions of how to use English to reflect egalitarian values Space Science and Astronomy Theatre Margaret Boone Rappaport, Christopher J. Corbally, 2017-08-09 If youre a teacher or parent struggling to get youngsters or young adults interested in space science and astronomy or an inquisitive student then youll love this fun filled book of theatrical scenes In addition to astronomers and astronauts the scenes also feature engineers accountants graphic artists public relations practitioners biologists meteorologists and others who play a critical role in space adventures Scenarios will take you into the past and into the future and include A cosmologist and a computer graphics artist are preparing a presentation for public television on theories about the distribution of galaxies in the universe and the placement of voids where no galaxies are found An astrobiologist and an engineer discover the first positive biosignature data from an exoplanet near Earth The findings provide a big surprise Two recent high school graduates explore a star factory nebula in the constellation Orion and using a video arcade game they make speculations about the future While the props and costumes needed for scripts are minimal the scenes promote deep learning Get ready to be entertained and informed with Space Science and Astronomy Theatre *A History of Women in 101 Objects* Annabelle Hirsch, 2024-03-05 Discover the hidden history of women and the world through this visual exploration of intimate objects and the surprising sometimes shocking stories behind them I adored this book Olivia Colman This is a neglected history Not a sweeping

definitive exhaustive history of the world but something quieter more intimate and particular a single journey picked out in 101 objects through the fascinating manifold and too often overlooked histories of women With engaging prose compelling stories and a beautiful full page image of each object Annabelle Hirsch s book contains a curated and diverse compendium of women and their things uncovering the thoughts and feelings at the heart of women s daily lives The result is an intimate and stirring alternative history of humans in the world The objects date from prehistory to today and are assembled chronologically to show the evolution of how women were perceived by others how they perceived themselves how they fought for freedom Some like a sixteenth century glass dildo are objects of female pleasure some a thumbscrew of female subjugation These are artifacts of women celebrated by history and of women unfairly forgotten by it With variety and nuance *A History of Women in 101 Objects* cracks open the fissures of what we think we know in order to illuminate a much richer retelling What do handprints on early cave paintings tell us about the role of women in hunting How is a cell phone related to femicides What does Kim Kardashian s diamond ring have to do with Elena Ferrante Wide ranging subversive witty and superbly researched this is a book that upends all our assumptions about and presentations of the past proving that it has always been as complicated and fascinating as the women who peopled it

celebration of contributions and explore a legacy of courage intelligence and pioneering spirit **The Women of the Moon**

Daniel R. Altschuler, Fernando J. Ballesteros, 2019-07-04 Philosophers and poets in times past tried to figure out why the stainless moon smoothly polished like a diamond in Dante's words had stains The agreed solution was that like a mirror it reflected the imperfect Earth Today we smile but it was a clever way to understand the Moon in a manner that was consistent with the beliefs of their age The Moon is no longer the in thing We see it as often as the Sun and give it little thought we've become indifferent However the Moon does reflect more than just sunlight The Moon or more precisely the nomenclature of lunar craters still holds up a mirror to an important aspect of human history Of the 1586 craters that have been named honoring philosophers and scientists only 28 honor a woman These 28 women of the Moon present us with an opportunity to meditate on this gap but perhaps more significantly they offer us an opportunity to talk about their lives mostly unknown today
