Inside the California Food Revolution Joyce Goldstein, 2013-09-06 In this authoritative and immensely readable insider s account celebrated cookbook author and former chef Joyce Goldstein traces the development of California cuisine from its formative years in the 1970s to 2000 when farm to table foraging and fusion cooking had become part of the national vocabulary Interviews with almost two hundred chefs purveyors artisans winemakers and food writers bring to life an approach to cooking grounded in passion bold innovation and a dedication to flavor first Goldstein explains how the counterculture movement in the West gave rise to a restaurant culture characterized by open kitchens women in leadership positions and a surprising number of chefs and artisanal food producers who lacked formal training The new cuisine challenged the conventional kitchen hierarchy and French dominance in fine dining leading to a more egalitarian and informal food scene In weaving Goldstein s views on California food culture with profiles of those who played a part in its development from Alice Waters to Bill Niman to Wolfgang Puck Inside the California Food Revolution demonstrates that while fresh produce and locally sourced ingredients are iconic in California what transforms these elements into a unique cuisine is a distinctly Western culture of openness creativity and collaboration Engagingly written and full of captivating anecdotes this book shows how the inspirations that emerged in California went on to transform the experience of eating throughout the United States and the world

Culinary Man and the Kitchen Brigade Jordan Fallon, 2024-09-23 *Culinary Man and the Kitchen Brigade* offers an exploration of the field of normative subjectivity circulated within western fine dining traditions, presenting a theoretical analysis of the governing relationship between the chef who embodies the Culinary Man and the fine dining brigade. The book offers a unique treatment of western haute cuisine's interlocking regime of labor and aesthetics and theorizes the underexplored kitchen brigade as a model of disciplinary formation. It deploys a heterogeneous set of disciplinary discourses and practices which have the effect of consolidating monopolies on epistemic authority and governance. Each position within the brigade's hierarchy is subject to distinct though related disciplinary practices. Thus, chapters identify the specific practices pertinent to each brigade subject while also illuminating how they fit together as a coherent hegemonic project. The application of Wynterian and Foucauldian insight to the fine dining brigade offers a political theory of culinary work which departs from other food studies texts. Notably, this work offers an in depth treatment of the brigade's colonial dimensions which resonate with emerging critiques, scholarly and general, of the race and gender politics of restaurant labor. The concluding chapters seek to identify where extant modes of resistance or alternative forms of culinary organization may hold the potential to move beyond the hegemonic overrepresentation of Culinary Man. This book will be of great interest to students and scholars from across the social sciences and humanities interested in critical food studies, political and cultural theory, and popular culinary culture.

Taking the Heat Deborah A. Harris, Patti Giuffre, 2015-05-20 A number of recent books magazines and television programs have emerged that promise to take viewers inside the exciting world of professional chefs While media suggest that the occupation is undergoing a transformation one thing remains clear being a chef is a decidedly male dominated job Over the past six years the prestigious James Beard Foundation has presented 84 awards for excellence as a chef but only 19 were given to women Likewise Food and Wine magazine has recognized the talent of 110 chefs on its annual Best New Chef list since 2000 and to date only 16 women have been included How is it that women the gender most associated with cooking have lagged behind men in this occupation Taking the Heat examines how the world of professional chefs is gendered what conditions have led to this gender segregation and how women chefs feel about their work in relation to men Tracing the historical evolution of the profession and analyzing over two thousand examples of chef profiles and restaurant reviews as well as in depth interviews with thirty three women chefs Deborah A Harris and Patti Giuffre reveal a great irony between the present realities of the culinary profession and the traditional cultural associations of cooking and gender Since occupations filled with women are often culturally and economically devalued male members exclude women to enhance the job's legitimacy For women chefs these professional obstacles and other challenges such as how to balance work and family ultimately push some of the women out of the career Although female chefs may be outsiders in many professional kitchens the participants in Taking the Heat recount advantages that women chefs offer their workplaces and strengths that Harris and Giuffre argue can help offer women chefs and women in other male dominated occupations opportunities for greater representation within their fields Click here to access the Taking the Heat teaching guide http://rutgerspress.rutgers.edu/pages/teaching_guide_for_taking_the_heat.aspx
