Women And Friendship Women And Friendship:

Best Friends Terri Apter, Ruthellen Josselson, 1999-10-26 Best Friends provides the missing link to understanding and recognizing the impact of some of the most important relationships in girls and women's lives. Every woman remembers the sting of betrayal of a girlfriend and every parent of a daughter has seen her come home from school in tears because a girl she thought was her best friend suddenly and inexplicably became her enemy. While boys hash out differences with fists and kicks, girls' societies are marked by secrets and whispers and shifting affection. The lessons learned as an adolescent girl are often carried into adulthood, making women fear confrontation especially with other women. But the intensity of the struggles reflects the support and healing to be found within these friendships. Girls find themselves in the mirror of other girls; hence the power each has to influence the other. Ruthellen Josselson and Terri Apter's many years of working with hundreds of girls and women have given them insight into the emotionally important relationships that are integral to a girl's self image. Best Friends explores the bonds of friendship between girls and between women and the sorrows and joys they experience together from early adolescence and throughout their lives.

Women and Friendship Joel D. Block, Diane Greenberg, 2002-08 The authors reveal that women's friendships are deeper and more enduring than those between men. Based on firsthand interviews, original studies, and extensive research, Women and Friendship is a pioneering work that offers a contemporary portrait of these ties.

Friendships Between Women Pat O'Connor, 1992 Reviews the issues and themes which indicate the importance and limitations of friendships between women. The author explores the meaning of friendship to women at different stages in their lives and suggests an agenda for future research.

The Power of Female

Friendship Paul Dobransky, 2008 The psychiatrist author of The Secret Psychology of How We Fall in Love takes a close-up look at female friendships and their implications, revealing why women have fewer friends than they used to, examining the primal codes of friendship, and offering advice on how to become a better friend, cultivate new friendships, and build deeper relationships.

The F Word Lily Pebbles, 2018-03-08 If there's one piece of invaluable advice for women and girls of all ages, it is that there is nothing more important than creating and maintaining strong, positive, and happy friendships with other women. In a culture that largely pits women against each other, I want to celebrate female friendships, all strings attached. If my 1998 diary is anything to go by, female friendships are incredibly complex and emotional, but they're the mini love stories that make us who we are. For many women, friends are our partners in crime through life; they are the ones who move us into new homes, out of bad relationships, through births and illnesses. In The F Word, I've set out to explore and celebrate the essence of female friendship at different life stages and in its many wild and wonderful forms.

Girl Talk Jacqueline Mroz, 2018-11-13 A veteran science reporter's investigation into the fascinating and distinctive nature of women's friendships. In Girl Talk, New York Times science reporter Jacqueline Mroz takes on the science of female friendship, a phenomenon that's as culturally powerful as it is individually mysterious. She examines friendship from a range of angles.

from the historical to the experiential with a scientific analysis that reveals new truths about what leads us to connect and build alliances and then break up when a friendship no longer serves us Mroz takes a new look at how friendship has evolved throughout history showing how friends tend to share more genetic commonalities than strangers and that the more friends we have the more empathy and pleasure chemicals are present in our brains Scientists have also reported that friendship directly influences health and longevity women with solid supportive friendships experience fewer fight or flight impulses and stronger heart function and women without friendships tend to develop medical challenges on par with those associated with smoking and excessive body weight With intimate reporting and insightful analysis Mroz reveals new awareness about the impact of women's friendships and how they shape our culture at large
