

A group of women in early 20th-century attire, likely from the 1910s or 1920s, are performing a synchronized dance or exercise routine in a gymnasium. They are wearing dark, long-sleeved dresses with white collars and cuffs. They are holding long, thin sticks or poles, which they are raising high above their heads. The women are in a dynamic pose, with one leg extended forward and the other back, suggesting a dance or exercise movement. The background shows a large, open space with a wooden floor and a dark, possibly brick, wall.

The New Yugoslav Woman Branka

Bogdan, 2025-09-30 From 1945 to 1989 the Yugoslav state connected its claims of progressive politics and gender equality to its support of free healthcare sex education and contraception and laws that supported reproductive choice Yugoslav men and women internalized these messages proclaiming their homeland's superior care for its citizens in comparison to postwar Europe and the United States Even as Yugoslav women faced stigma and abuse for their usage of contraceptives and medical practitioners grappled with new regulations and technology alongside personal ideologies Yugoslavs celebrated their own

reformation into new politically minded citizens who carefully navigated tradition and modernity as they reconstructed the nation The New Yugoslav Woman provides a social and cultural history of how Yugoslav communists used reproductive regulation to build a platform of socialism through self management and to position the country as a conduit between the global North and South Author Branka Bogdan traces reproduction as a central facet of socialist Yugoslavia's state formation through the nation's laws medical infrastructure technological growth and state run sex education programs Bringing this history to the present day with a discussion of more than two dozen interviews with Yugoslav patients and medical professionals Bogdan reveals how these recollections show key continuities with the past rather than an abrupt break between the socialist and post socialist worlds Drawing Yugoslav women's experiences into the geopolitical history of reproduction and the Cold War era state The New Yugoslav Woman reveals the centrality of reproduction contraception and abortion to socialist Yugoslavia's self conception as the developed leader of the developing world **Black Woman's**

Experiencing Architecture in the Nineteenth Century Edward Gillin, H. Horatio Joyce, 2018-10-18 Bringing together fourteen original essays this collection opens up new perspectives on the architectural history of the nineteenth century by examining the buildings of the period through the lens of experience With a focus on the experience of the ordinary building user rather than simply on the intentions of the designer the book shows that new and important insights can be brought to our understanding of Victorian architecture The chapters present a range of ideas and new research some examining individual building case studies from grand hotels and clubhouses in New York to the parliament buildings of Westminster and others exploring conceptual questions about the nature of architectural experience whether sensory or otherwise Yet they share the premise that the idea of the experience of architecture took on a new and particular significance with the rise of industrial modernity and they examine what contemporary people both architects and non architects understood by this idea The insights in this volume extend beyond the study of Victorian architecture Together they suggest how experience might be used as a framework to produce a more convincingly historical account of the artefacts of architectural history

Nurse-midwifery Laura Elizabeth Ettinger, 2006 In a unique and detailed historical study *Nurse Midwifery The Birth of a New American Profession* Laura E Ettinger fills a void with the first book length documentation of the emergence of American nurse midwifery This occupation developed in the 1920s involving nurses who took advanced training in midwifery In *Nurse Midwifery* Ettinger shows how nurse midwives in New York City eastern Kentucky Santa Fe New Mexico and other places both rebelled against

and served as agents of a nationwide professionalization of doctors and medicalization of childbirth Nurse Midwifery reveals the limitations that nurses physicians and nurse midwives placed on the profession of nurse midwifery from the outset because of the professional interests of nursing and medicine The book argues that nurse midwives challenged what scholars have called the male medical model of childbirth but the cost of the compromises they made to survive was that nurse midwifery did not become the kind of independent autonomous profession it might have been *Contesting Medical Confidentiality* Andreas-Holger Maehle,2016-10-18 This book for the first time offers a comparative study of the origins of professional and public debates on medical confidentiality in the US Britain and Germany during the late nineteenth and early twentieth centuries In this period traditional medical secrecy began to be seriously contested by demands for disclosure in the name of public health and the law Andreas Holger Maehle examines three representative debates Do physicians and surgeons have a privilege to refuse to give evidence in court about confidential patient details Can doctors breach patient confidence in order to prevent the spread of disease And is there a medical duty to report illegal procedures to the authorities The comparative approach reveals significant differences and similarities among the three countries concerned and the book s historical perspective illuminates the fundamental ethical issues at stake that continue to give rise to public debate **Dangerous Pregnancies** Leslie J.
