Understanding Human Development A Lifespan Course:

Understanding Human Development Ursula M. Staudinger, Ulman E.R. Lindenberger, 2012-12-06 K Warner Schaie I am pleased to write a foreword for this interesting volume particularly as over many years I have had the privilege of interacting with the editors and a majority of the contributors in various professional roles as a colleague mentor or research collaborator The editors begin their introduction by asking why one would want to read yet another book on human development They immediately answer their question by pointing out that many developmentally oriented texts and other treatises neglect the theoretical foundations of human development and fail to embed psychological constructs within the multidisciplinary context so essential to understanding development This volume provides a positive remedy to past deficiencies in volumes on human development with a well organized structure that leads the reader from a general introduction through the basic processes to methodological issues and the relation of developmental constructs to social context and biological infrastructure This approach does not surprise After all the editors and most of the contributors at one time or another had a connection to the Max Planck Institute of Human Development in Berlin whether as students junior scientists or senior visitors That institute under the leadership of Paul Baltes has been instrumental in pursuing a systematic lifespan approach to the study of cognition and personality Over the past two decades it has influenced the careers of a generation of scientists who have advocated long term studies of human development in an interdisciplinary context
