

FOUR DIMENSIONS OF SOCIAL SUSTAINABILITY

By <https://Diversity.Social>

EQUALITY & DIVERSITY

Equality is the act to reduce disadvantages to certain groups, or helping certain groups to remove barriers to have more control of their lives.

QUALITY OF LIFE

affordable housing, physical & mental medical support, education training opportunities, employment opportunities, access to support, and of course safety and security

SOCIAL COHESION

Social Cohesion means increasing participation by individual in a target group, as well as helping target groups to access public and civic institutions.

DEMOCRACY & GOVERNANCE

Governance is to make sure budget and resources are adequate to sustain sustainability programs and the ability to measure it.

Economic Survey of Latin America and the Caribbean United Nations. Economic Commission for Latin America and the Caribbean, 2015-01-29

The Economic Survey of Latin America and the Caribbean 2014 looks at how economic growth in the region has been slowing since 2011 and the data available for the first six months of 2014 indicate that the region will not match the growth rate of 2.5% recorded in 2013 Growth has been muted over the first few months of the year owing to stagnant gross fixed capital formation and faltering private consumption Government consumption on the other hand has picked up and the net contribution of exports has been more positive than during the same period of the previous year A regional growth rate of 2.2% is forecast for 2014

Environment, Society and Natural Resource Management Geoffrey Lawrence, Vaughan Higgins, Stewart Lockie, 2001

As greater significance is placed on the relationship between people and their environment it is increasingly acknowledged that few environmental problems can be solved without considering the

social context in which they arise But what does it mean to incorporate the social and what types of social sciences are needed This incisive book critically reviews the theoretical perspectives that underlie social scientific contributions to natural resource management and argues for both a greater social science presence and for conceptual and methodological clarity within the social sciences themselves The expert contributors explore how new concepts and approaches can contribute positively to natural resource management They demonstrate how the social sciences can be used as a vehicle to highlight social concerns as well as to foster greater participation co operation and integration among community members natural resource managers and researchers Through detailed case studies from Australasia and the Americas the authors illustrate how different social science perspectives can be utilised The range and variety of views provide a basis for the evaluation of various and often competing disciplinary paradigms within the social sciences This book will undoubtedly contribute to a more sophisticated debate about the place of the social in environmental research It will prove to be of great worth to students and researchers of environmental and social issues to those involved in environmental decision making and community planning as well as environmental policymakers and natural resource managers
