European Identity Kenneth Keulman, Agnes Katalin Koós, 2014-08-20 The further evolution of the European Union is mainly dependent on how its citizens relate to their fellow Europeans speaking a score of languages and belonging to a variety of cultures This book addresses the question of whether a new sense of collective self identification labeled European identity a special form of socio territorial identities is emerging Collective identities are works in progress they entail a salient strategic activist and future oriented dimension Divergent strategic goals of the constituent groups induce a perpetual contestation and negotiation of the group identity a process that in the case of the EU is intensified by the continuously changing boundaries and institutional structure of the super polity To confront these challenges this book has a double focus The first part weighs in on the feasibility of a European identity in light of what the two main paradigms in the field primordialism and constructivism can predict The second part maps the social forces that are either favorable or inimical to the creation of a common social identity on the continent Both parts develop hypotheses about the processes we witness and test them with the available empirical data Part II distinguishes between passive and active supporters of the integration project besides the Euroskeptic segment of the public Provision of public goods by regional integration is believed to explain passive permissiveness while the main impetus for integration comes from those who may reap above average benefits from it This book contends that the groups of active supporters have historically been

changing within the Union namely the political Left and Right are changing their roles in negotiating future developments Yet the evolution of the EU is also shaped by the solutions adopted to accommodate ethnic and cultural diversity The empirical tests involve opinion survey data taken from the Eurobarometer series World Value and European Social Surveys and the International Social Survey Programme expert ratings as well as party elite documents from the Manifesto Project Database

The US-EU Security Relationship Wyn Rees,2011-04-26 A constantly evolving security agenda has become a vital part of US EU relations Contemporary security challenges such as the rise of international terrorism and the threat from states of concern have in recent years forced the US and the EU to adapt their relationship and work together in new ways Written by a leading authority this incisive and wide ranging book systematically examines the development of the transatlantic security relationship in the post Cold War era It assesses the nature of the US and EU as international actors and considers how they cooperate together Rees argues that despite divergences of interest after the end of the Cold War the complex nature of contemporary challenges is driving both sides of the Atlantic towards increased cooperation In addition the book looks in detail at how global and European issues such as EU defence and enlargement policies nuclear non proliferation and the war on terror have affected security relations **European Disintegration?** Douglas Webber,2018-11-20 This new book provides a comprehensive analysis of Europe on the brink of political disintegration Observers of the European Union EU could be forgiven for thinking that it is in a state of permanent crisis The Union has been beset with high levels of Eurozone debt Russian intervention and armed conflict in Ukraine refugees fleeing conflict zones in North Africa and the Middle East and the decision of Britain to leave the European Union This text offers a concise and readable assessment of the dynamics

character and consequences of these four crises and the increasingly real possibility of European disintegration. High levels of socio-economic interdependence and institutionalization have failed to result in an ever closer union and yet the proposed theories of disintegration also fall short. Webber instead shows that it is only by looking at the role of the EU's dominant member Germany in each crisis that the potential for an increasingly fragmented Europe becomes clear. Until now Germany has been the EU's stabilizing force but this is no longer guaranteed. The fate of the integration process will depend on whether other more inclusive forms of stabilizing leadership may emerge to fill the vacuum created by Berlin's incapacity. This text is the ideal companion for upper undergraduate and postgraduate students of the European Union as part of degrees in politics, international relations or European studies or for anyone interested in the crises of the European Union.

Europeanization and National Politics Robert Ladrech, 2010-03-10 Europeanization has become a key topic in analysis of the politics of the new Europe. This broad-ranging new text focuses centrally on the impact of the EU on its member states but also on the way in which states upload their policy priorities to the European level. The European Parliament Ariadna Ripoll Servent, 2017-11-03 This broad-ranging text examines the political dynamic of the European Parliament (EP) showing how the EP is a key component of the political system of the EU. It looks at how and how effectively the parliament translates citizen demands into policies and in so doing contributes to wider debates around democracy and legitimacy in the EU.

The European Commission Neill Nugent, Mark Rhinard, 2015-10-26 The European Commission is at the very heart of the European integration process and with the Council is one of the two central institutions of the European Union. Its activist role under Jacques Delors led to a dramatic increase in its activity and influence and contributed to a crisis of confidence in its effectiveness and its lack of adequate financial controls which culminated in the resignation of the entire Commission under Jacques Santer in 1999. What progress has the Commission made in addressing these issues under Romano Prodi? What are its prospects in face of the new challenges of Eastward enlargement? How great is its influence and how does this vary according to issues and circumstances? What are the implications of its hybrid character as a political and administrative body? How much has the Commission changed over time and how much and how does it need to change now? Written by a leading authority and author of the best-selling introductory text on the EU, this major new text provides the definitive introduction to and assessment of the Commission: its evolution, composition, organisation, character, functioning and role. Comprehensive, up to date and based on extensive original research, it will be essential reading for students of European integration, politicians, policy makers and functionaries and anyone with a serious interest in the European Union, its current character and future prospects. The European Council Wolfgang Wessels, 2015-09-29 This systematic assessment of the often opaque European Council looks at its characteristics, leaders and output as well as its impact on EU supranational and intergovernmental dynamics. Taking account of historical and contemporary developments up to and beyond the Lisbon Treaty, it encourages in-depth understanding of this key institution. Theoretical Approaches to European Integration Sabine

Saurugger,2013-08-30 This major new text provides a uniquely broad ranging introduction to and assessment of the contribution of the whole range of theoretical approaches that have been applied to the analysis of European integration It provides tools for understanding the underlying logic behind the political and economic debates that take place in the EU today

Key Controversies in European Integration Hubert Zimmermann,Andreas Dür,2021-03-03 Is the EU a success or a failure Should It Stay or Should It Go Britain and the EU The Big Waste or Essential to Feed Europe The Common Agricultural Policy Observers of the European Union could be forgiven in thinking that since its inception the EU project has been under threat from near constant crises In recent years controversial issues such as EU enlargement the fallout from the Eurozone crisis migration policies Brexit and the Corona pandemic have tested the EU to its limits and divided public opinion in the process The major third edition of this comprehensive textbook on the EU seeks to introduce the integration project by looking at the thorny debates politicians European citizens and the media contend with on a daily basis Well known for its unique and pedagogically innovative key debates format the editors have invited top names in the field to contribute a stirring contribution either for or against each of the toughest political questions the EU faces In doing so not only does it offer a broad introduction to all the key concerns of the Union but it does so in a way that is contemporary engaging and designed to spark controversy New to this Edition All chapters fully revised and updatedNew chapter on the transatlantic partnership All chapters now with key takeaway points Across all controversies more inclusion of mainstream gender and feminist approaches
