Understanding Human Dignity Proceedings Of The British Academy:

Understanding Human Dignity Christopher McCrudden, 2013-11 The concept of human dignity has become central to politics law and theology but is little understood This book presents a wide ranging collection of edited essays from specialists in law theology politics and history and seeks to define the main areas of current debates about the concept in these disciplines

Understanding Human Dignity Christopher McCrudden, 2014 The concept of human dignity has become central to politics law and theology but is little understood This book presents a wide ranging collection of edited essays from specialists in law theology politics and history and defines the main areas of current debates about the concept in these disciplines

Litigating Religions Christopher McCrudden, 2018-01-19 Religions are a problem for human rights and human rights are a problem for religions And both are problems for courts This book presents an interpretation of how religion and human rights interrelate in the legal context and how this relationship might be reconceived to make this relationship somewhat less fraught Litigating Religions an essay adapted by Christopher McCrudden from the Alberico Gentili Lectures given at the University of Macerata Italy examines how the resurgent role of religion in public life gives rise to tensions with key aspects of human rights in particular freedom of religion and anti discrimination law and how these tensions cannot be considered as simply transitional The context for the discussion is the increasingly troubled area of human rights litigation involving religious arguments such as wearing religious dress at work conscientious objections by marriage registrars admission of children to religious schools prohibitions on same sex marriage and access to abortion Christopher McCrudden argues that if we wish to establish a better dialogue between the contending views we must address a set of recurring problems identifiable in such litigation To address these problems requires changes both in human rights theory and in religious understandings

The Oxford Handbook of Law, Regulation and Technology Roger Brownsword, Eloise Scotford, Karen Yeung, 2017 The variety pace and power of technological innovations that have emerged in the 21st Century have been breathtaking These technological developments which include advances in networked information and communications biotechnology neurotechnology nanotechnology robotics and environmental engineering technology have raised a number of vital and complex questions Although these technologies have the potential to generate positive transformation and help address grand societal challenges the novelty associated with technological innovation has also been accompanied by anxieties about their risks and destabilizing effects Is there a potential harm to human health or the environment What are the ethical implications Do these innovations erode or antagonize values such as human dignity privacy democracy or other norms underpinning existing bodies of law and regulation These technological developments have therefore spawned a nascent but growing body of law and technology scholarship broadly concerned with exploring the legal social and ethical dimensions of technological innovation This handbook collates the many and varied strands of this scholarship focusing broadly across a range of new and emerging technology and a vast array of social and policy sectors

through which leading scholars in the field interrogate the interfaces between law emerging technology and regulation Structured in five parts the handbook I establishes the collection of essays within existing scholarship concerned with law and technology as well as regulatory governance II explores the relationship between technology development by focusing on core concepts and values which technological developments implicate III studies the challenges for law in responding to the emergence of new technologies examining how legal norms doctrine and institutions have been shaped challenged and destabilized by technology and even how technologies have been shaped by legal regimes IV provides a critical exploration of the implications of technological innovation examining the ways in which technological innovation has generated challenges for regulators in the governance of technological development and the implications of employing new technologies as an instrument of regulatory governance V explores various interfaces between law regulatory governance and new technologies across a range of key social domains

Rethinking Law, Regulation, and Technology Brownsword, Roger, 2022-03-04 This insightful book presents a radical rethinking of the relationship between law regulation and technology While in traditional legal thinking technology is neither of particular interest nor concern this book treats modern technologies as doubly significant both as major targets for regulation and as potential tools to be used for legal and regulatory purposes It explores whether our institutions for engaging with new technologies are fit for purpose

New Directions in European Private Law Takis Tridimas, Mateja Durovic, 2021-05-20 This book brings together leading scholars and practitioners to explore contemporary challenges in the field of European private law identify problems and propose solutions The first section reassesses the existing theoretical framework and traditional legal scholarship on which European private law has developed The book then goes on to examine important and practical topics of geo blocking and standardisation in the context of recent legislative developments and the CJEU case law The third section assesses the challenging subject of adequate regulation of online platforms and sharing economy that has been continuously addressed in the recent years by European private law A fourth section deals with the regulatory challenges brought by an increasing development of artificial intelligence and blockchain technology and the question of liability The final section examines recent European legislative developments in the area of digital goods and digital content and identifies potential future policy directions in which the European private law may develop in the future

Dignity and Human Rights Education Robert A. Bowie, 2017 This book addresses the question of human rights education in a world that is witnessing a resurgence of religion in public life and a continuation of religion across much of the globe long after secularization theories predicted its decline Promoting a universal vision of human rights while acknowledging religious diversity is a challenge for schools This book starts with the basic premise that human rights are grounded in a belief in the dignity and ultimate worth of the human person Drawing on key philosophical and theological sources for understanding dignity it builds a vision of human rights and religious education that seeks to square the impossible circle of universal human rights education in a religiously diverse world

Proceedings of the

British Academy, 1916 The Proceedings of the British Academy British Academy, 1985 A hallmark of scholarship in Great Britain The Proceedings of the British Academy annually gathers together some of the finest lectures delivered in the previous year sponsored by the Academy Volume LXXI features such eminent public lectures as the Chatterton Lecture on Poetry the Raleigh Lecture on History the Shakespeare Lecture and the Keynes Lecture in Economics as well as equally prestigious papers in art archaeology and social anthropology As always the volume concludes with obituaries of renowned members of the Academy written by fellow members this year's obituaries include Christopher Ricks writing on William Empson Douglas Gray on fellow medievalist Eric John Dobson and Nicholas Kaldor on his Cambridge colleague economist Piero Sraffa U.C.
