You Can Understand the Bible Dr Bob Utley, 2017-04-25 Biblical interpretation is a rational and spiritual process that attempts to understand an ancient inspired writer in such a way that the message from God may be understood and applied in our day The spiritual process is crucial but difficult to define It does involve a yieldedness and openness to God There must be a hunger 1 for Him 2 to know Him and 3 to serve Him This process involves prayer confession and the willingness for lifestyle change The Spirit is crucial in the interpretive process but why sincere godly Christians understand the Bible differently is a mystery The rational process is easier to describe We must be consistent and fair to the text and not be influenced by our personal cultural or denominational biases We are all historically conditioned None of us are objective neutral interpreters This commentary offers a careful rational process containing four interpretive principles structured to help us attempt to overcome our biases

First Principle The first principle is to note the historical setting in which a biblical book was written and the particular historical occasion for its authorship or when it was edited The original author had a purpose and a message to communicate The text cannot mean something to us that it never meant to the original ancient inspired author His intent not our historical emotional cultural personal or denominational need is the key Application is an integral partner to interpretation but proper interpretation must always precede application It must be reiterated that every biblical text has one and only one meaning This meaning is what the original biblical author intended through the Spirit's leadership to communicate to his day This one meaning may have many possible applications to different cultures and situations These applications must be linked to the central truth of the original author For this reason this study guide commentary is designed to provide a brief introduction to each book of the Bible

Second Principle The second principle is to identify the literary units Every biblical book is a unified document Interpreters have no right to isolate one aspect of truth by excluding others Therefore we must strive to understand the purpose of the whole biblical book before we interpret the individual literary units The individual parts chapters paragraphs or verses cannot mean what the whole unit does not mean Interpretation must move from a deductive approach of the whole to an inductive approach to the parts Therefore this study guide commentary is designed to help the student analyze the structure of each literary unit by paragraphs Paragraph and chapter divisions are not inspired but they do aid us in identifying thought units

Third Principle The third principle is to read the Bible in different translations in order to grasp the widest possible range of meaning

semantic field that biblical words or phrases may have. Often a phrase or word can be understood in several ways. These different translations bring out these options and help to identify and explain the manuscript variations. These do not affect doctrine but they do help us to try to get back to the original text penned by an inspired ancient writer.

Fourth Principle The fourth principle is to note the literary genre. Original inspired authors chose to record their messages in different forms, e.g. historical narrative, historical drama, poetry, prophecy, gospel, parable, letter, apocalyptic. These different forms have special keys to interpretation. This Textbook offers a quick way for the student to check his interpretations. It is not meant to be definitive but rather informative and thought provoking. These principles have helped me to overcome much of my historical conditioning by forcing me to struggle with the ancient text. My hope is that it will be a blessing to you as well.

Dr Bob Utley

Basic Biblical Interpretation Charles Koban, 2001. This book is more of a guide to Bible Study than a text on the subject. It was originally written as 36 lectures for a college course in the Bible. It is for that reason written in a conversational style rather than a bookish style. You will find this a very readable book yet a book full of serious content and lots of material for reflection and study. Each chapter focuses on one major text of the Bible such as the Creation Story, the Flood, the Covenant with Abraham, the calling of Moses in the Burning Bush episode, the Battle of Jericho, David and Goliath, the Exile in Babylon, John the Baptist's birth and preaching, the Temptation of Christ, the Parable of the Talents, Mark's teachings on the Kingdom of Heaven, Christ's teaching on the End Times, the Lord's Supper narrative, and the Resurrection of Christ. So the book surveys the Bible by focusing on the most important and most loved texts of the Bible. By working through the book and doing the Bible readings for each chapter, you will come away with an overall view of the Bible story without having to read and analyze the whole Bible, so that if in the future you want to read other texts in the Bible, you will know how they fit into the whole story of salvation. The book also gives you an introduction to the basic methods used by biblical scholars in interpreting the Bible. You will learn how to do such things as cross referencing of texts, historical background study, explication, close reading of texts, commentary analysis, topical analysis, problems analysis, and more. The book will also introduce you to the basic religious concepts in the Bible such as faith, grace, justification, law, hope, and of course love. You will learn how to explore the meanings of these concepts, doing word searches in the Bible using a concordance. And as an extra dimension of Bible study, you will learn to use the latest and most popular of the literary methods. These include such things as the exploration of levels of meaning, character study, plot analysis, and even some lessons on style and setting in the Bible. You will learn, for example, why the Lord rejected Saul as king and chose instead David. There's more to His choice than David's slaying of Goliath; a lot more. You can learn what Saul did wrong and what David did right. Such matters involve the study of the character of Saul and David. The major advantage of studying the Bible using literary methods is that it makes the Bible real for us. It brings the Bible into our world by showing us how people and their interaction helped shape the Judeo-Christian faith, and so how we can shape our faith by our actions. A major emphasis of the book is the unity of the Bible, the Old and the New Testaments, as

a unified whole Christ was a Jew and came first of all to the Jewish people The importance of that perspective is it helps us see the basic unity of Christianity and Judaism This is a view which is gaining strength in our day as Christian leaders make efforts at reconciliation with the Jewish people such as the Pope leaving an apology to the Jewish people for Christian persecution of Jews in a cleft in the Wailing Wall during his last visit to the Holy Land Past attempts to separate the faith of the Old Testament from the faith of the New Testament are now being seen as superficial and biased We can now see that a full understanding of the New Testament is possible only if we study it in the context of the Old Testament This book stresses the elements of unity in the two testaments but it does so without obscuring the important differences between Christianity and Judaism Finally this book is not locked into historical studies of the Bible but shows the reader how to apply the Bible and its messages in our daily lives There is much contemporary material in the book tying the Bible to our own troubled and stressful times There is also a lot of inspirational material in the book material taken mostly from my own life and
