The Inclusive Economy: Criteria, Principles and Ubuntu Arno J van Niekerk, 2022-01-01 There is one serious missing link at the center of today's capitalism It is a disequilibrium between increased economic interconnectedness and increased isolation exclusion This unique challenge in the 21st century calls for a unique solution Ubuntu Africa might be the last place where experts would look for an economic solution but it ironically holds the secret to restoring the right equilibrium in the economy Ubuntu's ability to reconnect the marginalised with the mainstream by putting emphasis on our humanness connectedness collective growth through expansion and improved efficiency creates new capacity for the economy to rebalance itself towards genuine and sustainable progress Ubuntu encapsulates that which is the opposite of economic exclusion i.e. inequality poverty unsustainable growth limited profits etc namely economic inclusion However only a small window of opportunity exists in and after the COVID 19 pandemic to implement Ubuntu as a fundamental economic principle in order for it to be an effective remedy The global economy and most local economies have entered the phase of rebuilding with a serious drawback after the previous global financial crisis both the economy and government's capacity to recover are severely limited as unemployment levels debt levels and natural resource depletion levels keep soaring resulting in dangerous levels of economic exclusion and social instability To this and more the inclusive economy presents tangible solutions

Migration and Urbanization: Local Solutions for Global Economic Challenges Ushakov, Denis, 2019-08-16 International migration and urbanization as economic processes can provide great opportunities to solve local and regional economic and social problems and lead to the leveling of global economic unfairness and multi complexity However uncontrolled migration and urbanization can easily destroy market stability and create many new social and economic problems both in developed due to migration and developing due to urbanization countries Migration and Urbanization Local Solutions for Global Economic Challenges is a collection of innovative research that sets basic rules and patterns for state regulation of urbanization and international migration and for increasing the economic efficiency of developed and developing countries Additionally the book evaluates the economic impact of urbanization and international migration at the global national and regional levels While highlighting topics including economic security modern mechanisms and migration policy this book is ideally designed for government officials economists educators policymakers industry leaders business managers academicians researchers and students

The Digital Transformation of Labor Anthony Larsson, Robin Teigland, 2019-11-11 Through a series of

studies the overarching aim of this book is to investigate if and how the digitalization digital transformation process causes or may cause the autonomy of various labor functions and its impact in creating or stymieing various job opportunities on the labor market This book also seeks to illuminate what actors groups are mostly benefited by the digitalization digital transformation and which actors groups that are put at risk by it This book takes its point of departure from a 2016 OECD report that contends that the impact digitalization has on the future of labor is ambiguous as on the one hand it is suggested that technological change is labor saving but on the other hand it is suggested that digital technologies have not created new jobs on a scale that it replaces old jobs Another 2018 OECD report indicated that digitalization and automation as such does not pose a real risk of destroying any significant number of jobs for the foreseeable future although tasks would by and large change significantly This would affects welfare as most of its revenue stems from taxation and particularly so from the taxation on labor directly or indirectly For this reason this book will set out to explore how the future technological and societal advancements impact labor conditions The book seeks to provide an innovative enriching and controversial take on how various aspects of the labor market can be and are affected the ongoing digitalization trend in a way that is not covered by extant literature As such this book intends to cater to a wider readership from a general audience and students to specialized professionals and academics wanting to gain a deeper understanding of the possible future developments of the labor market in light of an accelerating digitalization digital transformation of society at large

Local Content in Oil and Gas Law Eduardo G. Pereira,Damilola S. Olawuyi,Allan Ingelson,2025-09-18 This book explores the development and effective implementation of local content policies in the global petroleum industry providing a comprehensive overview of the foundations and drivers of local content in oil and gas Against the backdrop of a growing focus on sustainable development and economic diversification this comprehensive book addresses the challenges and opportunities of increasing local participation in the oil and gas sector The book navigates complex topics such as regulatory frameworks stakeholder engagement indigenous rights capacity building and the intersection of local content with sustainability and gender equality Through detailed case studies and global examples the book identifies obstacles such as funding resource curse corruption transparency strategic planning and adherence to international standards and regulations while also exploring the critical role of local content in the energy transition and circular economy The book not only enriches academic discourse but also serves as a pragmatic guide to aligning local development goals with global industry demands The book links national development aspirations with global industrial realities offering a practical guide to successful local content policy development and execution Offering a practical roadmap for policymakers industry leaders and scholars to design implement and monitor impactful local content strategies the book will be of interest to researchers in oil and gas law and policy

Three foundations: A competitive, sustainable, inclusive Europe European Investment Bank,2019-11-11 Europe faces a historic opportunity We need to reimagine European unity as a collective endeavour as the only way in which we can turn

threats to our way of life into the possibility to create a better life for all This report focuses on three core areas where EU wide political ambition and investment are truly necessary Rapid technological change amid increasing global competition Increasing breakdown of the global climate and other ecosystems due to our economic system Growing threats to social cohesion and social sustainability from multiple trends Competitiveness sustainability and inclusion have to be addressed together holistically This is why this report addresses all three with a focus on the complex interlinkages between them The vital role of far sighted investment is a key theme that emerges from this investigation The critical role of European level collaboration is another Instead of merely adapting to change we need to be proactive through timely reform and investment that sets us on a pathway towards a society that is productive sustainable and inclusive by design
