Unfrozen Mia Bennett, Klaus Dodds, 2025-09-12 A vital account of the state of the Arctic today emphasising the twin dangers of climate change and geopolitical competition Nowhere is the dual threat of climate change and geopolitical contest felt more strongly than in the Arctic Sea ice is declining rapidly wildfires are burning and permafrost is thawing All the while global interest is gathering

apace as the region transforms from being a frozen desert into an international waterway Mia Bennett and Klaus Dodds examine the state of the Arctic today showing how the region is becoming a space of experimentation for everything from Indigenous governance to subsea technologies Growing geopolitical competition is accompanying environmental disruption Countries including Russia China and the United States are investing in the Arctic and consolidating their interests in strategic access resource exploitation and alliance building The consequences of this emerging Arctic Anthropocene are truly global from rising sea levels due to melting glaciers to tensions between great powers determined to protect their territory and resources and the well being of Indigenous Peoples who have fought for centuries for rights and recognition **Soil**

Carbon Stabilization to Mitigate Climate Change Rahul Datta, Ram Swaroop Meena, 2021-08-25 Carbon stabilization involves capturing carbon from the atmosphere and fix it in the forms soil organic carbon stock for a long period of time it will be present to escape as a greenhouse gas in the form of carbon dioxide Soil carbon storage is an important ecosystem service resulting from interactions of several ecological processes This process is primarily mediated by plants through photosynthesis with carbon stored in the form of soil organic carbon Soil carbon levels have reduced over decades of conversion of pristine ecosystems into agriculture landscape which now offers the opportunity to store carbon from air into the soil Carbon stabilization into the agricultural soils is a novel approach of research and offers promising reduction in the atmospheric carbon dioxide levels This book brings together all aspects of soil carbon sequestration and stabilization with a special focus on diversity of microorganisms and management practices of soil in agricultural systems It discusses the role of ecosystem functioning recent and future prospects soil microbial ecological studies rhizosphere microflora and organic matter in soil carbon stabilization It also explores carbon transformation in soil biological management and its genetics microbial transformation of soil carbon plant growth promoting rhizobacteria PGPRs and their role in sustainable agriculture The book offers a spectrum of ideas of new technological inventions and fundamentals of soil sustainability It will be suitable for teachers researchers and policymakers undergraduate and graduate students of soil science soil microbiology agronomy ecology and environmental sciences **Rooted Cosmopolitanism** Will Kymlicka, 2012 Canadians take pride in being good

citizens of the world yet our failure to meet commitments on the global stage raises questions Do Canadians need to transcend national loyalties to become full global citizens Is the very idea of rooted cosmopolitanism simply a myth that encourages complacency about Canada's place in the world In this volume leading scholars assess both in theory and practice the concept of rooted cosmopolitanism using Canada as a test case They show that local identities such as patriotism and Quebec nationalism can but need not conflict with cosmopolitan principles Local ties enable and impede Canada's global responsibilities in areas such as multiculturalism climate change immigration and refugee policy and humanitarian intervention By examining how Canada has negotiated its relations to the world both within and beyond its own borders Rooted Cosmopolitanism evaluates the possibility of reconciling local ties and nationalism with commitments to human rights

global justice and international law **Environmental Management** Peter R. Mulvihill, S. Harris Ali, 2016-11-25 The field of Environmental Management EM involves a broad and evolving repertoire of practices The field originated around 1970 in response to new policy regulation and public concern about environmental issues EM has undergone many changes and improvements since then progressing from a reactive compliance based focus toward in leading cases practices reflecting strong commitment to sustainability And yet EM remains for the most part ill equipped to deal with the complex and highly uncertain implications of the ecological crisis Environmental Management offers a rigorous critique of conventional EM and explores alternative ideas frameworks and approaches that are currently considered fringe but which have the potential to transform the practice of EM This book goes beyond narrow definitions and considers questions regarding the purpose roles scope and potential of environmental management EM is situated and contextualized within the evolving and expanding realm of environment and sustainability literature The book argues that new approaches to EM need to be more flexible imaginative and better equipped to address future environmental problems of a scale and severity previously unforeseen This book will be of great interest to students and scholars of environmental management environmental planning resource management and environmental assessment *The Action Research Planner* Stephen Kemmis, Robin McTaggart, Rhonda Nixon, 2013-11-12 A fully updated and reworked version of the classic book by Stephen Kemmis and Robin McTaggart now joined by Rhonda Nixon The Action Research Planner is a detailed guide to developing and conducting a critical participatory action research project The authors outline new views on participation based on Jürgen Habermas's notion of a public sphere practice as shaped by practice architectures and research as research within practice traditions They provide five extended examples of critical participatory action research studies The book includes a range of resources for people planning a critical participatory research initiative providing guidance on how to establish an action research group and identify a shared concern research ethics principles of procedure for action researchers protocols for collaborative work keeping a journal gathering evidence reporting and choosing academic partners Unlike earlier editions The Action Research Planner focuses specifically on critical participatory action research which occupies a particular critical niche in the action research family The Action Research Planner is an essential guide to planning and undertaking this type of research **Causation in National and International Climate Change Litigation** Meike Krakau, 2025-03-05 This book presents a comprehensive analysis of causation in climate change litigation across a range of regional national and international legal jurisdictions By doing so it offers clarity and potential solutions for legal professionals scholars and courts navigating the complex legal terrain of climate change litigation Constructing causal chains in climate litigation poses significant difficulties for the judicial system Factual challenges range from causal overdetermination to the vast spatial and temporal scale of climate related cause and effect relationships Normative obstacles are posed inter alia by the multitude of greenhouse gas emitters and the wide range of climate influencing practices Drawing on diverse understandings of causation from various legal

perspectives as well as from other disciplines such as computer science metaphysics and philosophy this book provides a fundamental understanding of climatic causation in law Further it lays the groundwork and clarifies the requirements for the use and development of continuous causal chains in climate change litigation **Handbook of Climate Change**

Mitigation and Adaptation Maximilian Lackner, Baharak Sajjadi, Wei-Yin Chen, 2025-09-26 Now in its 4th extended edition this completely revised and significantly expanded handbook addresses important new research findings and the global need for action related to climate change in its two most relevant aspects mitigation and adaptation There is a growing consensus that anthropogenic activities have been driving global climate change and the consequence will be catastrophic for civilization Reducing the 37 1 billion metric tons of CO₂ produced annually 2017 global emissions along with other greenhouse gases particularly methane has become a leading grand challenge and the pursuit of sustainable energy environments and economies is a complex issue affecting the daily life of every citizen In this 4th edition readers will find new chapters covering the causes and impacts of global warming the climate change impacts on health biodiversity and the economy and emerging technologies for climate change mitigation Particular attention is given to topics such as wildfire threats ocean acidification coral bleaching sea level rise and permafrost thaw The latest research on sustainable aviation fuels carbon mineralization and smart cities is also covered in this new edition as well as topics like sustainable building design climate resistant building materials and sustainable agriculture The Handbook of Climate Change Mitigation and Adaptation collates information in this multi disciplinary area providing readers with a comprehensive overview of the scientific background and current and emerging technologies Intended for an interdisciplinary global audience of researchers and decision makers at universities and in industry it covers climate change models established mature and promising future technologies and ideas the impact of climate change strategies for dealing with global warming the related political frameworks and climate education **Green & Gold: Ireland as a Clean Energy World Leader** John

Travers, 2010-08-14 While many agree Ireland can become a world leader in clean energy there s little agreement on how John Travers captures the challenge from an Irish perspective He assesses in clear terms practical energy alternatives to meet all our needs achieve energy independence and provide an opportunity for Ireland to be a world leader and global beacon of clean energy Climate Change V Grover, 2004-01-06 The book documents the scientific facts regarding climate change and a brief overview of the key developments in the climate change regime discussing Kyoto Protocol and beyond The North South politics regarding energy markets and the emissions there from are also discussed in the book After establishing the scientific base presenting agreements and policies for climate change in general and the Kyoto Protocol in particular the Instruments and Institutions for Kyoto Protocol are reviewed The rapid and large climate changes can be expected to have far reaching and in many instances unpredictable consequences not only for only for human societies but also for all forms of life on Earth For example a rise global sea level can threaten coastal cities and settlements throughout the world The book

discusses the impact of climate change and the associated environmental and socio economic impacts in different parts of the world The book discussed science and philosophy behind Climate Change and the Kyoto Protocol

The Routledge Handbook of Applied Climate Change Ethics Donald A. Brown, Kathryn Gwiazdon, Laura Westra, 2023-09-27 The Routledge Handbook of Applied Climate Change Ethics is a powerful reference source for the identification and exploration of the underlying ethical issues in climate change law and policy Bridging theory with practice it takes ethical engagement out of the classroom and into the halls of governance The Handbook's 39 chapters written by a diverse and interdisciplinary team of experts from around the world are case studies divided into five parts Parts I-IV highlight the ethical issues that arise in climate change policy formation from duties not to harm to duties to consider the views and voices of those who will be or are being harmed from the role of human rights justice and democracy to how to identify and respond to disinformation and denialism It also raises the ethics of various policy responses such as cap and trade carbon taxing and geo engineering Part V offers a way forward with strategies on how to expressly consider ethics in climate change policy formation from negotiations to education media communication and the power and potential of shaming The volume is essential reading for students professors and practitioners who wish to better engage with government and non government organizations on climate policy to better understand the practical application of the theory and philosophy of ethics and how to more strongly draft and defend ethical action in negotiating drafting and defending climate change law and policy

Cut Super Climate Pollutants Now! Alan Miller, Durwood Zaelke, Stephen O. Andersen, 2021-04-14 Lays out an absolutely essential part of initial climate action in the US and other countries Climate policymakers need to read this book now James Gustave Speth former chair US Council on Environmental Quality We have a decade or less to radically slow global warming before we risk hitting irreversible tipping points that will lock in catastrophic climate change The good news is that we know how to slow global warming enough to avert disaster Cut Super Climate Pollutants Now explains how a 10 year sprint to cut short lived super climate pollutants primarily HFC refrigerants black carbon soot and methane can cut the rate of global warming in half so we can stay in the race to net zero climate emissions by 2050

no other source that offers such a rich array of the most current and future thinking topics from so many leaders in the field Robert Gass Ed D co founder Rockwood Leadership Institute The editors accomplish the difficult task of including theory concept and method that will appeal to the academic community as well as those who are focused on being an effective practitioner John D Carter Ph D president Gestalt OSD Center

Ignition Jonathan Isham, Sissel Waage, 2012-09-26 The evidence is irrefutable global warming is real While the debate continues about just how much damage spiking temperatures will wreak we know the threat to our homes health and even way of life is dire So why isn't America doing anything Where is the national campaign to stop this catastrophe It may lie between the covers of this book Ignition brings together some of the world's finest thinkers and advocates to jump start the ultimate green revolution Including celebrated writers like Bill McKibben and renowned scholars like Gus Speth as well as young activists the authors draw on direct experience in grassroots organization education law and social leadership Their approaches are various from building coalitions to win political battles to rallying shareholders to change corporate behavior But they share a belief that private fears about deadly heat waves and disastrous hurricanes can translate into powerful public action For anyone who feels compelled to do more than change their light bulbs or occasionally carpool Ignition is an essential guide Combining incisive essays with success stories and web resources the book helps readers answer the most important question we all face What can I do

Climate Change Joseph J. Romm, 2018 Everyone needs to understand how climate change will directly affect their lives and the lives of their family in the years to come This is the first general audience book aimed at giving you and your family the knowledge you need to know to navigate your future

A Companion to Applied Ethics R. G. Frey, Christopher Heath Wellman, 2008-04-15 Applied or practical ethics is perhaps the largest growth area in philosophy today and many issues in moral social and political life have come under philosophical scrutiny in recent years Taken together the essays in this volume including two overview essays on theories of ethics and the nature of applied ethics provide a state of the art account of the most pressing moral questions facing us today Provides a comprehensive guide to many of the most significant problems of practical ethics Offers state of the art accounts of issues in medical environmental legal social and business ethics Written by major philosophers presently engaged with these complex and profound ethical issues

Crisis of Global Sustainability Tapio Kanninen, 2013-01-04 This concise and informative text provides a critical history of the concept of sustainability and the various institutional measures taken to promote implement and enforce sustainable development proposing new organizational solutions to deal with the crisis of sustainability Crisis of Global Sustainability provides for the first time a compact insider description of the evolution and impact of the Club of Rome a global think tank that produced a groundbreaking 1972 study The Limits to Growth which highlighted the dangers of unrestrained economic growth and possible collapse of global economy during the first decades of the 21st century With recent research confirming the validity of these concerns Kanninen asks whether our overarching concept of thinking on world development today should continue

to be global sustainability which implies that we still have enough time to make adjustments in our future policies and action Or should the main paradigm of our thinking shift to global survivability a concept that stresses the absolute necessity of immediate and drastic change both in institutions and policies Many environmentalists green politicians and think tanks are speaking today more loudly than ever about the necessity for a major policy institutional and paradigm change and this work is essential reading for students and scholars alike *OECD Rural Studies Enhancing Rural Innovation in Canada*

OECD,2024-03-19 The report sets the scene for rural innovation in Canada explores the policy and governance environment for key regional innovation initiatives and includes a special topic chapter on green innovation in rural regions of Canada

Cold Desert Yves Earhart,AI,2025-02-12 Cold Desert explores the nature of surprisingly arid yet freezing polar landscapes and their importance in understanding global climate patterns It highlights the geological and climatological conditions that lead to their formation revealing their vital role as indicators of climate change Cold deserts often overlooked are critical for understanding how similar environments might develop on other planets and how these regions will evolve under the pressures of a warming Earth The book emphasizes the unexpectedly complex ecosystems these areas harbor The book progresses by first establishing the fundamental principles of desert formation with a focus on the specific conditions that lead to cold deserts Then it analyzes the specialized adaptations of life within these extreme environments including physiological morphological and behavioral strategies Finally it addresses the growing threat of climate change analyzing the potential impacts of rising temperatures and altered precipitation patterns By integrating climatology ecology geology and environmental science the book offers a holistic understanding of these unique environments
