Introduction

When a company with a well-established supply chain enters the sustainability space, it is understandably with trepidation, and in the best-case scenario, with curiosity and a willingness to experiment. In order to drive sustainability changes, there are a plethora of places to start – from shifting consumer buying patterns, to farmers' production practices, to corporate culture. Commonly, large multinationals rely on multiple product streams going into multiple product lines; the task to "green" the entire supply chain is daunting, and the process iterative. A company must do two things over and over again. First, the company must find the appropriate tools to help prioritize a starting place. Second, once this prioritization process happens, the company must dig into an evolving toolbox of items which can drive sustainability down the supply chain and ensure compliance in the areas that the company is seeking sustainability. Finally, the company must follow these steps over and over again – capturing learning as the tools are applied – and then re-evaluating its sustainability priorities up and down the supply chain.

To assist Unilever with this iterative process, Unilever requested two primary tasks. First, Unilever wanted high-level strategies and frameworks with which the company can make decisions about where to begin implementing sustainability measures across its vast supply chain. Second, Unilever asked for a discussion of ways that the company could drive sustainability down the supply chain and verify supply chain sustainability compliance, particularly in cases where Unilever did not use 3rd party certification schemes. To satisfy Unilever's requests, our team began by researching background information on Unilever and its sustainability values and practices, using mainly external literature sources and the limited internal Unilever documents for which we had access. We also tapped into MIT's network of sustainability experts in the Media Lab and Center for Transportation and Logistics. After several brainstorming sessions discussing various prioritization schemes that Unilever could employ, we developed a supply chain prioritization tool called the Sustainability Stakeholder Rating Tool (SSRT). Taking into account the complex supply chain ecosystem, the tool is meant to prioritize supply chain actions based on a combination of financial, social, and environmental consideration in various product lines (dairy, oil, and vegetables) from the perspective of Unilever's main stakeholders.

The culmination of these exercises is reported below and is split into four sections. First, the paper provides a background on Unilever as a company. Second, this document discusses several lenses with which Unilever may view their options to find the most optimal starting point or points to enact sustainability measures. The paper then demonstrates one such tool, Sustainability Stakeholder Rating

Unilever And Its Supply Chain Embracing Radical Transparency:

Building Brand Equity and Consumer Trust Through Radical Transparency Practices Veselinova, Elena, Samonikov, Marija Gogova, 2017-07-13 The creation of business value and competitive advantage is crucial to any company in the modern corporate sector. By developing positive relationships with consumers, businesses can better maintain their customers' loyalty. *Building Brand Equity and Consumer Trust Through Radical Transparency Practices* is an innovative reference source for emerging scholarly perspectives on the role of branding in organizational contexts and techniques to sustain a profitable and honest relationship with consumers. Highlighting a range of pertinent topics such as risk management, product innovation, and brand awareness, this book is ideally designed for managers, researchers, professionals, students, and practitioners interested in the development of value creation in contemporary business. **ICoRD'15 - Research into Design Across Boundaries Volume 2** Amaresh Chakrabarti, 2014-12-23 This book showcases over 60 cutting edge research papers from the 5th International Conference on Research into Design, the largest in India in this area, written by eminent researchers from across the world on design process, technologies, methods, and tools, and their impact on innovation for supporting design across boundaries. The special features of the book are the variety of insights into the product and system innovation process and the host of methods and tools from all major areas of design research for the enhancement of the innovation process. The main benefit of the book for researchers in various areas of design and innovation is access to the latest quality research in this area with the largest collection of research from India. For practitioners and educators, it is exposure to an empirically validated suite of theories, models, methods, and tools that can be taught and practiced for design-led innovation. *The Innovation Blind Spot* Ross Baird, 2017-09-12 Our innovation economy is broken. But there's good news: The ideas that will solve our problems are hiding in plain sight. While big companies in the American economy have never been more successful, entrepreneurial activity is near a 30-year low. More businesses are dying than starting every day. Investors continue to dump billions of dollars into photo sharing apps and food delivery services, solving problems for only a wealthy sliver of the world's population, while challenges in health, food security, and education grow more serious. In *The Innovation Blind Spot*, entrepreneur and venture capitalist Ross Baird argues that the innovations that truly matter don't see the light of day for reasons entirely of our own making. A handful of people in a handful of cities are deciding behind closed doors which entrepreneurs get a shot to succeed. And most investors are what Baird calls "two pocket thinkers," artificially separating their charitable work from their day job of making a profit. The resulting system creates rising income inequality, stifled entrepreneurial ambition, social distrust, and political uncertainty. Our innovation problem makes all our other problems harder to solve. In this book, Baird demonstrates how and where to find better ideas by lifting up people, places, and industries that are often overlooked. What's more, Baird ultimately outlines how to create long-term success through one pocket thinking, eliminating the blind spot that separates what we do for a living and what we really care about. *El cambio climático visto*

Research Opportunities in Supply Chain Transparency ManMohan S. Sodhi, Christopher S. Tang, 2018 More firms than ever before are disclosing provenance of their products results of product testing and suppliers labor practice compliance with western norms in annual reports sustainability reports and press releases besides making it available on third party websites The problem remains however that companies find collecting and disclosing such information not only to be costly and complicated but also do not understand the benefits To motivate further research on supply chain transparency we first report recent examples of companies providing supply chain transparency We also present potential benefits of supply chain visibility and supply chain transparency separately for the company While terminology has not yet been standardized this paper distinguishes visibility managers efforts to learn more about operations upstream in their supply chains from supply chain transparency by which we mean a company disclosing information to consumers investors and other stakeholders about compliance to consumer expected norms in its supply chain operations and products Finally we propose some topics for research on supply chain transparency arranged by stakeholder

Trust Inc. Matthew Yeomans, 2018-04-25 We are entering the age of sustainability a business era where every company big and small must adapt its way of doing business to meet the realities of climate change a finite supply of natural resources evolving attitudes about inequality increasing digitisation and automation At the same time companies must meet the demands of consumers as they adjust to this rapidly changing way of life Supercharging this change in consumer behaviour is social media a communications revolution that is democratising and disrupting society in ways never seen before In this book Matthew Yeomans explains why embracing sustainability is key to helping companies articulate their sense of purpose and their reason to exist in a world where social media is eroding trust in all institutions The book shows how social media has made sustainability a mainstream concern for all society how it compelled companies to be more authentic and accountable in their actions and how it will continue to shape how companies communicate the importance of sustainability to all of society This book is a powerful guide for both communication and marketing professionals in business especially Fortune 500 FTSE 250 companies and agencies on how to use social media to communicate with their audiences and stakeholders in an authentic way It is also a guide text book for the growing field of sustainability communication in higher education
