School Choice and Social Controversy Stephen D. Sugarman, Frank R. Kemerer, 2011-12-01 In this important new volume distinguished legal and public policy scholars address issues that are critical to the successful drafting and implementation of school choice programs yet are usually overlooked in the choice debate They explore whether school choice is a threat or an opportunity to the many children who are largely deprived of choice today and they offer a variety of perspectives with some authors enthusiastic others more skeptical The book begins with a discussion of the types and extent of school choice what is known about its consequences and how politics has influenced its development It then focuses on three important public policy issues how school choice can revolutionize the way schools are financed what policy interventions are necessary to increase the supply of choice schools and how choice programs can be held accountable to parents and the state without undermining institutional autonomy The book addresses legal issues including whether public and private choice schools will be required to observe student and teacher rights generally recognized in traditional public schools how the religion and speech clauses of the First Amendment may affect the participation of religious schools in school choice programs whether school choice will enhance or aggravate opportunities for racial justice what the implications of school choice are for teacher unions and collective bargaining and whether children with disabilities will be accommodated in school choice programs under federal disability law Throughout the book the authors offer recommendations for public policy development The contributors are Jeffrey Henig Robert Bulman and David L Kirp Paul T Hill Robert M O Neil Jesse H Choper Betsy Levin William G Buss and Laura F Rothstein Stephen D Sugarman is Agnes Roddy Robb Professor of Law at the University of California Berkeley Frank R Kemerer is Regents Professor and director of the Center for

Special Interest Terry M. Moe, 2011-04-01 Why are America's public schools falling so short of the mark in educating the nation's children Why are they organized in ineffective ways that fly in the face of common sense to the point that it is virtually impossible to get even the worst teachers out of the classroom And why after more than a quarter century of costly education reform have the schools proven so resistant to change and so difficult to improve In this path breaking book Terry M Moe demonstrates that the answers to these questions have a great deal to do with teachers unions which are by far the most powerful forces in American education and use their power to promote their own special interests at the

expense of what is best for kids Despite their importance the teachers unions have barely been studied Special Interest fills that gap with an extraordinary analysis that is at once brilliant and kaleidoscopic shedding new light on their historical rise to power the organizational foundations of that power the ways it is exercised in collective bargaining and politics and its vast consequences for American education The bottom line is simple but devastating as long as the teachers unions remain powerful the nation s schools will never be organized to provide kids with the most effective education possible Moe sees light at the end of the tunnel however due to two major transformations One is political the other technological and the combination is destined to weaken the unions considerably in the coming years loosening their special interest grip and opening up a new era in which America s schools can finally be organized in the best interests of children *The SAGE Guide to Educational Leadership and Management* Fenwick W.
