After the Shock City Tom Hulme, 2019 A comparative and trans national study of urban culture in Britain and the United States from the late nineteenth to the twentieth century Using the industrial cities of Manchester and Chicago as case studies this book traces the idea of citizenship across different areas of local life in the first half of the twentieth century from philosophy and festivals to historical re enactment and public housing Coalitions of voluntary associations municipal government and local elites lambasted modern urban culture as the cause of social disintegration But rather than simply decanting the population to new and smaller settlements they tried to re imagine a reformed city as a place that could foster loyal and healthy communities Celebrating civic progress in the period since the shock city of the nineteenth century they sought to create a sense of local pride that could bracket growing class and racial tensions The diverse individuals groups and communities of the city reacted in different ways to this message Some were happy to gather under the identity of one civic banner Others held back by discriminatory structures of society chose to shape their own idea of citizenship one that looked far beyond the city for a sense of belonging and rights Historians have tended to emphasise the rise of national identity state centralisation and popular patriotism at the expense of distinctive local identities municipal autonomy and expressions of civic pride This book aims to redress the imbalance demonstrating how local ideas of belonging could still exert a powerful hold on the making of modern citizenship TOM HULME is a lecturer in the School of History Anthropology Philosophy and Politics Queen s University Belfast

The Uses of Life Robert Bud, 1994-05-27 This book shows for the first time how modern biotechnology grew out of this century's hopes for a new relationship between biology and engineering. Long before recombinant DNA, these promised a new kind of technology. By exploring the rich and surprisingly overlooked complex of prophesies, industrial and scientific development and government programs, the book sheds new light on the expectations now held for biotechnology. A world wide view covering developments not just in America but also in Europe and Japan uncovers surprising links. This makes possible a coherent story to supersede the historical notes which have been available until now. This first history of biotechnology provides a readable and challenging account that will appeal to anyone interested in the development of this key component of modern industry. *Official Report, Annual Convention*, 1913 *Official Report, Annual Convention* National Brick Manufacturers' Association of the United States of America, 1911 *The Holy Name Journal*, 1917

The 1889-1891 microdata price quotes show: 1 a lower frequency of price changes, 2 a smaller average magnitude of price changes, 3 fewer small price changes, and 4 fewer temporary price reductions. These differences are consistent with the 1889-1891 period having a higher cost of changing prices, resulting in less adjustment to transitory price shocks. Changes in the retailing environment that may have led to a higher cost of changing prices in 1889-1891 are discussed. **Kansas City Daily Price Current**, 1913 **American Lumberman**, 1919 *The Northwestern Miller*, 1908 Outing: Sport, Adventure, Travel,
