Understanding The Present Science And The Soul Of Modern Man:

Understanding the Present Bryan Appleyard, 1994-02-01 In a brilliant and explosively controversial work the author attacks modern science for destroying our spiritual sense of self What is the role of science in present day society Should we be as dazzled as we are by the innovations the insights and the miraculous improvements in material life that science has wrought Or is there a darker more pernicious side to our scientific success Renowned British science columnist Bryan Appleyard thoroughly explores each of these provocative topics in a book that has incited the ire of the scientific community He points out that while scientists have shaped our lives and our beliefs they have consistently failed to explain human consciousness the soul or the meaning of life From Galileo to Darwin from Copernicus to Oppenheimer countless scientists have proclaimed a universe in which human beings are only an accidental presence The unwitting result is that science has cast humankind adrift paralyzing us with fear and cutting us off from personal or religious truth In Appleyard s view science has done us appalling spiritual damage These startling conclusions have prompted strong counterattacks from the scientific establishment Yet regardless of where one falls in the debate Understanding the Present forces readers to re examine society s blind faith in the benevolence of modern science An exposition that is dazzling for its concrete illustrations and examples The New York Times A withering indictment of modern science This should crack a few test tubes Kirkus Reviews

Understanding the Present Bryan Appleyard, 1992 Aims to make the wider issues and principal ideas of our age understandable to all The book refers to all spheres culture philosophy and politics and is split into five sections facts analysis connections perceptions and thesis The Identity of the History of Science and Medicine Andrew Cunningham, 2018-02-06 In these essays Andrew Cunningham is concerned with issues of identity what was the identity of topics disciplines arguments diseases in the past and whether they are identical with more usually how they are not identical with topics disciplines arguments or diseases in the present Historians usually tend to assume such continuous identities of present attitudes and activities with past ones and rarely question them the contention here is that this gives us a false image of the very things in the past that we went to look for The Environment and Christian Ethics Michael S. Northcott, 1996-09-28 This book is about the extent origins and causes of the environmental crisis Dr Northcott argues that Christianity has lost the biblical awareness of the interconnectedness of all life He shows how Christian theologians and believers might recover a more ecologically friendly belief system and life style The author provides an important corrective to secular approaches to environmental ethics including utilitarian individualism animal rights theories and deep ecology

Responsible Living Ron B. Epstein, PhD, 2018 Does genetic engineering have the potential to be as dangerous a nuclear holocaust Will playing games online lead to brain shrinkage These and other environmental and moral dilemmas of the modern world are discussed in a collection of essays which use Buddhist texts and academic resources to analyze problems in today s world Topics include pollution animal cruelty genetically modified foods and our addictions to digital and social

media Dr Epstein describes how outer environmental and social problems mirror humanity's inner struggle with selfishness, greed and desire. By connecting Buddhist concepts such as compassion, causation and moral precepts to these issues, this collection of essays provides guidance for ethical conduct in today's world. **The Quest**, 1994. *Science Today* Ralph Levinson, Jeffrey N. Give the little boy a gun, offer the little girl a doll: how many years of feminism would it take to uncover the meaning behind such assumptions? After decades of attacks on intractable sexual stereotypes, the time is right to ask what makes them so compelling and resistant to change. In *The Sexual Metaphor* Helen Haste does just that: exposing the deep cultural roots of our insistent distinctions between masculine and feminine. To understand changing sexual roles, Haste suggests that we recognize the role that gender plays in how we make sense of the world, particularly through the use of metaphor. As she demonstrates, the assault on traditional conceptions of gender is in fact a confrontation with the metaphor of dualism or polarity that underlies Western culture, informing our models of rationality and control. Here our anxieties about our own masculinity or femininity encounter a cultural tangle of opposites: public and private order and chaos, thinking and feeling, active and passive, hard and soft, positive and negative. Drawing on research in the fields of sociology, anthropology, the history of science, paleontology and philosophy, as well as her own field of psychology, Haste demonstrates the pervasiveness of the metaphor of dualism in large areas of our lives and our thinking, and of metaphor itself as a mode of thought expressing theories about the world in science and popular culture. Her work, accessible to social scientists and general readers alike, is a stimulating tour of the dark, divided territory that is the backdrop for our organization of everyday experience, society and sexual identity. Quotations from Gurdjieff's Teaching Georges Ivanovitch Gurdjieff, Meredith Wooldridge Thring, 1998. For a series of carefully selected words like Art, Conscience, Duty, Education, Understanding, the

author of this revised edition provides quotations not only from G I Gurdjieff's own works but also from the writings of Ouspensky Orage C S Knott and Kenneth Walker among others Quotations from students of Gurdjieff are all the more important as his own writings are sometimes difficult to understand Included are appendices setting out the author's interpretation of some of Gurdjieff's fundamental ideas such as the trogoautoegocratic process
