Understanding Vulnerability South Asian Perspectives:

Understanding Vulnerability John Twigg, Mihir R. Bhatt, 1998 Each year more than 130 million people are affected by natural hazards such as floods earthquakes droughts and cyclones This book explores these issues from a South Asian standpoint presented in the form of case studies and essays by experts from India Nepal and Sri Lanka *DISASTER MITIGATION* PARDEEP SAHNI, ALKA DHAMEJA, UMA MEDURY, 2001-01-01 Human vulnerability to natural disasters is an age old phenomenon Besides nature s wrath human interventions too have led to many calamities in the recent past The heedless pace of development has left us ecologically barren Most of the world s people live in developing economies as do most of the world s poor They also face the most debilitating consequences in the form of economic and social disruption caused by disasters The long history of disasters and their intensity has brought the question of disaster management to the forefront Disaster mitigation is a major component of a disaster management plan Mitigation entails measures to reduce the physical economic and social vulnerability of a community to disasters Disaster management is still an untouched domain suffering for want of systematic and committed research and development inputs It is essential not only to consolidate its academic stature but also to infuse the requisite knowledge skills and attitudes in the personnel connected with this field This collection of articles from several contributors is an excellent analysis of different mitigation strategies It offers insight into the different dimensions of disaster preparedness and mitigation The underlying attempt in each chapter is to illuminate the pertinence of those mitigation efforts that would prepare everyone related with disaster management to comprehend and approach the problem more holistically Besides government agencies NGOs and community based bodies the book is suitable for students pursuing the certificate programme in Disaster Management developed by the Indira Gandhi National Open University New Delhi Environmental Change and Security Project Report ,2002 Trafficking in Women and Children in India P. M. Collins, 2009-09-10 Development to a large extent determines the way in which hazards impact on people Meanwhile the occurrence of disasters alters the scope of development Whilst a notion of the association of disaster and development is as old as development studies itself recent decades have produced an intensifying demand for a fuller understanding Evidence of disaster and development progressing together has attracted increased institutional attention This includes recognition through global accords of a need for disaster reduction in achieving Millennium Development Goals and of sustainable development as central to disaster reduction However varied interpretations of this linkage and accessible options for future human wellbeing remain unconsolidated for most of humanity This engaging and accessible text illuminates the complexity of the relationship between disaster and development It opens with an assessment of the scope of contemporary disaster and development studies highlighting the rationale for looking at the two issues as part of the same topic The second and third chapters detail development perspectives of disaster and the influence of disaster on development The fourth chapter exemplifies how human health is both a cause and consequence of disaster and development and the following chapter illustrates some of the learning and planning processes in disaster and development oriented practice Early warning risk management mitigation response and recovery actions provide the focus for the fifth and sixth chapters The final chapter indicates some of the likely future contribution and challenges of combined disaster and development approaches With an emphasis on putting people at the centre of disaster and development the book avoids confronting readers with no hope representations instead highlighting disaster reduction opportunities This book is an essential introduction for students from multiple disciplines whose subject area may variously engage with contemporary crises and for many other people interested in finding about what is really meant by disaster reduction They include students and practitioners of development environment sociology economics public health anthropology and emergency planning amongst others It provides an entry point to a critical yet diverse topic backed up by student friendly features such as boxed case studies from the geographical areas of America to Africa and parts of Europe to parts of the East summaries discussion questions suggested further reading and web site information **Social Protection in Asia** Sarah Cook, Naila Kabeer, Gary
