United States Navy Aircraft Since 1911:

United States Navy Aircraft Since 1911 Gordon Swanborough, Peter M. Bowers, 1990 United States Navy Aircraft since 1911 has been completely revised and updated and like the earlier editions will become the standard reference work covering all the aircraft of the US Navy Marine Corps and Coast Guard United States Marine Corps Aircraft Since 1913 E.R. Johnson, Lloyd S. Jones, 2018-04-17 Among the world's military air arms United States Marine Corps Aviation occupies a unique tactical niche As the air component of a combined arms expeditionary force it exists primarily to support Marine combat forces on the ground in their amphibious assault mission From the Banana Wars of the 1920s to the present day War on Terror Marine aviation has undergone a lengthy fine tuning process not only in terms of warfare doctrines and tactics but also in the types of aircraft needed to accomplish the mission This comprehensive survey provides the history technical specifications drawings and photographs of every type of fixed and rotary wing aircraft used by Marine Air from its origins prior to World War I up to current operations **United States Naval Aviation, 1919-1941** E.R. Johnson, 2014-01-10 Within six months of the devastating attack on Pearl Harbor the U S Navy had checked the Japanese military advance in the Pacific to the extent that the United States could return to its original Defeat Germany First strategy That the Navy was able to accomplish this feat with only six fleet aircraft carriers and little more than 1 000 combat aircraft was not sheer luck but the culmination of more than two decades of determined preparation This thorough study with detailed drawings and photographs explains and illustrates the trial and error process which went into developing the aircraft airships and ships of the interwar period The critical factors that shaped Naval Aviation after World War I naval treaties fleet tactics government programs leadership and organization as well as the emergence of Marine Corps and Coast Guard aviation are discussed in depth *American Military Transport Aircraft Since 1925* E.R. Johnson, Lloyd S. Jones, 2013-04-06 Without the support of airlift the modern American military machine would be brought to a standstill Since World War II beginning with the Cold War and continuing up to the present day the U S armed forces have come increasingly to rely upon airlift for mobility The power to rapidly move and thereafter support a military operation anywhere in the world at any time has become a foundational element of American defense policy This work provides the reader with a comprehensive historical survey including technical specifications drawings and photographs of each type of fixed wing aircraft used by U S military forces over a nearly 90 year period to carry out the airlift mission American Attack Aircraft Since 1926 E.R. Johnson, 2012-05-28 This book provides a concise historical survey of the various types of aircraft used by the United States Army Air Corps Army Air Forces and Air Force and the Navy and Marine Corps to accomplish air attack missions since 1926 The text covers four types of fixed wing aircraft designated attack aircraft light medium and tactical bombers fighter bombers and adapted attack aircraft Reports on individual aircraft types include the aircraft's original military requirements production history and operational record usually accompanied by photographs illustrations and technical specifications Four appendices detail

aircraft designations and nomenclature used throughout the military the organizational structure of various military air units aircraft designs that never made it into official service and the evolution of attack aircraft weapons and tactics The United States in World War I James T. Controvich, 2023-05-08 With the centennial of the First World War rapidly approaching historian and bibliographer James T Controvich offers in The United States in World War I A Bibliographic Guide the most comprehensive up to date reference bibliography yet published Organized by subject this bibliography includes the full range of sources vintage publications of the time books pamphlets periodical titles theses dissertations and archival sources held by federal and state organizations as well as those in public and private hands including historical societies and museums As Controvich s bibliographic accounting makes clear there were many facets of World War I that remain virtually unknown to this day Throughout Controvich s bibliography tracks the primary sources that tell each of these stories and many others besides during this tense period in American history Each entry lists the author title place of publication publisher date of publication and page count as well as descriptive information concerning illustrations plates ports maps diagrams and plans The armed forces section carries additional information on rosters awards citations and killed and wounded in action lists The United States in World War I A Bibliographic Guide is an ideal research tool for students and scholars of World War I and American history

Technological Innovation and the Rise of Aviation, 1903-1941 Charles J. Gross, 2024-12-30 This book provides an overview of American aviation from 1903 to 1941 covering major developments in aviation technology It focuses on the role of the military and selected firms Under the fiscal constraints imposed by the post war military drawdown and the Great Depression the US military sacrificed quantity aircraft procurement for gains in quality Until foreign powers began huge rearmament programs US military aircraft were some of the most advanced in the world They held numerous international performance records before the US fell behind other powers that had gone on a war footing It offers new insights into the contributions of immigrants and foreign technologies to American aviation while examining the relationship between the government and the aviation industry It also highlights factors that enabled America to field some of the war s most advanced warplanes which ultimately helped win the Second World War U.S. Naval Institute Proceedings ,1919

United States Naval Institute Proceedings ,1919 United States Naval Fighters of World War II in Action Michael O'Leary, 1980 Beskriver forskellige amerikanske hangarskibsbaserede jagerfly fra 2 verdenskrig og beretter om deres indsats i Stillehavskrigen **U.S. Coast Guard Aircraft Since 1916** Arthur Percy, 1991 Building on the highly successful A History of U S Coast Guard Aviation this book details all aircraft used since the Coast Guard introduced its air arm in 1916

The U.S. Combat Aircraft Industry, 1909-2000 Mark A. Lorell, 2003 Drawing on primary and secondary sources on the aircraft industry this report provides a brief survey of industry structure innovation and competition in the U S fixed wing combat aircraft industry from its earliest days to the present It supports a much larger research effort examining the future of the structure innovation and competition of the U S military aircraft industrial base that responds to congressional

concerns about that future *U.S. and U.S.S.R. Military Aircraft and Missile Aerodynamics (1970-1980)* ,1981 **Journal of the Aeronautical Sciences** ,1940 *United States naval medical bulletin. v. 16, 1922* ,1922 **Encyclopedia of the American Military** John E. Jessup,1994 Annotation Spanning almost four centuries this set chronicles the evolution of the American military from Colonial times to the 1990s **Subject Catalog** Library of Congress, Historic Naval Aircraft Norman Polmar,2004 Discover the U S Navy s rich aviation heritage through its aircraft **The Wright Company** Edward J. Roach,2014-01-21 Fresh from successful flights before royalty in Europe and soon after thrilling hundreds of thousands of people by flying around the Statue of Liberty in the fall of 1909 Wilbur and Orville Wright decided the time was right to begin manufacturing their airplanes for sale Backed by Wall Street tycoons including August Belmont Cornelius Vanderbilt III and Andrew Freedman the brothers formed the Wright Company The Wright Company trained hundreds of early aviators at its flight schools including Roy Brown the Canadian pilot credited with shooting down Manfred von Richtofen the Red Baron during the First World War and Hap Arnold the commander of the U S Army Air Forces during the Second World War Pilots with the company s exhibition department thrilled crowds at events from Winnipeg to Boston Corpus Christi to Colorado Springs Cal Rodgers flew a Wright Company airplane in pursuit of the 50 000 Hearst Aviation Prize in 1911 But all was not well in Dayton a city that hummed with industry producing cash registers railroad cars and many other products The brothers found it hard to transition from running their own bicycle business to being corporate executives responsible for other people s money Their dogged pursuit of enforcement of their 1906 patent especially against Glenn Curtiss and his company helped hold back the development of the U S aviation industry When Orville Wright sold the company in 1915 more than three years after his brother s death he was a comfortable man but his company had built only 120 airplanes at its Dayton factory and Wright Company products were not in the U S arsenal as war continued in Europe Edward Roach provides a fascinating window into the legendary Wright Company its place in Dayton its management struggles and its effects on early U S aviation Astronautics & Aeronautics ,1981-07
