Yearbook of European Environmental Law, 2007 Implementing the Precautionary Principle Nicolas de Sadeleer, 2012-05-04 From fisheries to persistent organic pollutants to climate change itself no other environmental principle in environmental law has produced as much controversy as the precautionary principle Unlike a preventive approach in which action is taken provided that the threats to the environment are tangible with a precautionary approach authorities are prepared to tackle risks for which there is no definitive proof that the damage will materialize The ramifications of this increasingly apparent approach are profound and cut across all areas of risk assessment and management environmental law policy and regulation in every major sector However to date little thought has been dedicated to the implementation of the precautionary principle in a wide array of environmental circumstances This authoritative handbook addresses the legal aspects of how the precautionary principle is implemented in different sectors and examines its successes failures strengths and weaknesses Sectors and subjects covered include chemicals GMOs marine pollution fisheries and nature conservation and the book draws on cases in the EU in the USA and Nordic countries where the use of precaution has been gathering momentum Ultimately the book provides an indispensable appraisal of the question increasingly important in the era of human induced climate change of whether the precautionary principle is relevant indeed essential to avert major environmental and health risks and how and when it can be used successfully Published with MARIE CURIE ACTIONS

The Habitats Directive in its EU Environmental Law Context Charles-Hubert Born, An

Cliquet, Hendrik Schoukens, Delphine Misonne, Geert Van Hoorick, 2014-11-27 This book analyses the Habitats Directive one of the most prominent piece of EU environmental legislation of the past decades Seen by some as the cornerstone of Europe's nature conservation policy among other measures the Directive established the so called Natura 2000 ecological network which covers more than 18% of the surface of the EU However despite the fact the Directive was adopted over twenty years ago only 17% of the protected habitats and species in Europe are being adequately protected while 10 60 % of animal species remain under threat In light of the limited success and the contested nature of the Habitats Directive so far this book examines the successes and failures of the Habitats Directive from a legal and political angle The book brings together international experts to consider the application implementation and future of the Habitats Directive in order to assess whether the Habitats Directive is resilient enough to tackle biodiversity loss in the twenty first century Particular emphasis is put on the legal regime attached to the Natura 2000 network and its possible impact on land development and the relationship between the Habitats Directive and other topics including liability for ecological damage and transboundary nature conservation

Revue Internationale de Droit Et Politique Du Développement Durable de McGill, 2007 **European Access**, 2000 *Current Publications in Legal and Related Fields*, 2006 *The Blame Game* Brendan Flynn, 2007 Dr Flynn covers all of the above questions and more in his new book The Blame Game A must read for anyone interested in environmental issues in Ireland Ireland's record in the field of environmental protection is one of the worst in Europe and this book explores

the reasons why It examines the evolution of Irish environmental policy over the so called Celtic Tiger years of Ireland s economic boom while looking to the future as well It considers why Ireland s environmental performance has been so lacklustre during this period and what scope exists for improvement The emphasis is placed primarily on institutional aspects of Irish environmental policy In particular this book offers a strong critique of the current Irish style of reaching environmental decisions an excessive dependence on legal instruments and a weak Irish local government system The author further argues that Ireland has developed an institutional style of policy making that urgently needs reform He suggest a number of discreet but related problems that need to be understood and addressed These include an excessive adversarial style of interaction between environmentalists the Irish state and business the blame game described in the title Also fatal is a complacency among the Irish policy elite who have chosen to downplay environmental problems and continue to think of environmental policy as merely about corrective regulation rather than adopting the wider and more ambitious vision of sustainable development Individual chapters cover a range of topics and the book will appeal to readers interested in comparative environmental policy and politics the role of institutions in environmental policy making or indeed anyone keen to understand the post Celtic Tiger politics and society of an Ireland in transition *Law Books in Print: Title index* Glanville Publishers, Incorporated,1997 *Global Competition and EU Environmental Policy* Jonathan Golub,1998-03-19 Global Competition and EU Environmental Policy is the first book to examine the relationship between economic competitiveness and environmental protection in European Union policy A wide range of international case studies addresses key agreements and policies including those dealing with ozone layer protection pesticide exports shipping climate The Yearbook of European Environmental Law Thijs F.
