Thinking With Whitehead A Free And Wild Creation Of Concepts:

Thinking with Whitehead Isabelle Stengers, 2014-09 In *Thinking with Whitehead* Isabelle Stengers one of today's leading philosophers of science goes straight to the beating heart of Whitehead's thought Both an erudite yet accessible introduction and a highly advanced commentary it establishes the mathematician philosopher as a daring thinker on par with Deleuze Guattari and Foucault **Diffractioned Worlds - Diffractive Readings** Birgit M. Kaiser, Kathrin Thiele, 2018-10-18 Diffraction patterns in quantum physics evidence the fact that the behavior of matter is the result of its entanglements with measurement or as Karen Barad suggests the entanglement of matter and meaning In this sense therefore phenomena including texts cultural agents or life forms are the results of their relational onto epistemological entanglements and not individual entities that separately pre exist their joint becoming As such diffraction proposes a new understanding of difference no longer a dualist understanding but one going beyond binaries Diffraction is about patterns constellations relationalities From this angle the book explores diffraction which has begun to impact critical theories and humanities debates especially via new materialist feminisms STS and quantum thought but is often used without further reflection upon its implications or potentials Doing just that the book also pursues new routes for the onto epistemological and ethical challenges that arise from our experience of the world as relational and radically immanent because if we start from the ideas of immanence and entanglement our conceptions of self and other culture and nature cultural and sexual difference our epistemological procedures and disciplinary boundaries have to be rethought and adjusted The book offers an in depth consideration of diffraction as a quantum understanding of difference and as a new critical reading method It reflects on its import in humanities debates and thereby also on some of the most inspiring work recently done at the crossroads of science studies feminist studies and the critical humanities This book was originally published as a special issue of *Parallax* *On the Verge of a Planetary Civilization* Sam Mickey, 2014-09-18 *On the Verge of a Planetary Civilization* presents a philosophical contribution to integral ecology an emerging approach to the field that crosses disciplinary boundaries of the humanities and sciences In this original book Sam Mickey argues for the transdisciplinary significance of philosophical concepts that facilitate understandings of and responses to the boundaries involved in ecological issues Mickey demonstrates how much the provocative French philosopher Gilles Deleuze contributes to the development of such concepts situating his work in dialogue with that of his colleagues Felix Guattari and Jacques Derrida and with theorists who are adapting his concepts in contemporary contexts such as Isabelle Stengers Catherine Keller and the speculative realist movement of object oriented ontology The book focuses on the overlapping existential social and environmental aspects of the ecological problems pervading our increasingly interconnected planet It explores the boundaries between self and other humans and nonhumans sciences and humanities monism and pluralism sacred and secular fact and fiction the beginning and end of the world and much more **Deleuze and Design** Betti Marenko, 2015-06-08 Whether we are dealing with products or scenarios

packaging or experiences territories or digital platforms design is never a thing but a process of change invention and speculation that always has material tangible implications that affect behaviours and lives Drawing on a range of contributors case studies and examples this book examines ways in which we can think about design through Deleuze and how Deleuze's thought can be experimented upon and re designed to produce new concepts This book taps into the emerging networks between philosophy as an act of inventing concepts and design as the process of inventing the world **Eventful Bodies** Michael Schillmeier, 2016-04-22 Disrupting questioning and altering the taken for granted cosmos of everyday life the experiences of illness challenge the different ways in which social normalcy is remembered maintained and expected This book explores the manifold experiences of life threatening infectious or non curable illnesses that trouble the practices and relations of human and social life Challenging a mere deficit model of illness it examines how the cosmopolitics of illness require and initiate an ethos that cares for difference and diversity Eventful Bodies presents rich qualitative and ethnographic data alongside print and on line media sources from Germany and North America exploring case studies involving Alzheimer's disease stroke and the global threat of infectious diseases such as SARS The book engages with debates in cosmopolitics and exposes the agency of those overlooked by contemporary discourses of cosmopolitanism thus developing a new theory of illness and delineating a novel empirical agenda and conceptual space for sociological and anthropological research A rigorous examination of the changes wrought in the social world by illness and the implications of this for social and political theory Eventful Bodies will appeal to sociologists anthropologists social and political theorists geographers and scholars of science and technology studies with interests in medical sociology health illness and the body

The Review of Metaphysics, 2010 **Current Contents. Arts & Humanities** Institute for scientific information (Philadelphia, Pa), 2003 **Proceedings and Addresses of the American Philosophical Association** American Philosophical Association, 2011 List of members in v 1 **Creative Ecologies** Hélène Frichot, 2018-12-13 Architect and philosopher Hélène Frichot examines how the discipline of architecture is theorized and practiced at the periphery Eschewing a conventionally direct approach to architectural objects to iconic buildings and big name architects she instead explores the background of architectural practice to introduce the creative ecologies in which architecture exists only in relation to other objects and ideas Consisting of a series of philosophical encounters with architectural practice that are neither neatly located in one domain nor the other this book is concerned with other ways of doing architecture It examines architecture at the limits where it is muddled by alternative disciplinary influences whether art practice philosophy or literature Frichot meets a range of creative characters who work at the peripheries and who challenge the central assumptions of the discipline showing that there is no core of architecture there is rather architecture as a multiplicity of diverse concerns in engagement with local environments and worlds From an author well known in the disciplines of architecture and philosophy for her scholarship on Deleuze this is a radical accessible and highly original approach to design research deftly engaging with an

array of current topics from the Anthropocene to affect theory new materialism to contemporary feminism Western Wildlands, 1991 **Qui Parle**, 2015 **The Philosopher's Index** Richard H. Lineback, 1978 *Paperbound Books in Print*, 1992 Think, 1951 *The Play of the Imagination* Paul W. Pruyser, 1983 **Threshold Concepts Within the Disciplines** Ray Land, Jan Meyer, Jan Smith, 2008 *Threshold Concepts within the Disciplines* brings together leading writers from various disciplines and national contexts in an important and readable volume for all those concerned with teaching and learning in higher education The foundational principle of threshold concepts is that there are in each discipline conceptual gateways or portals that must be negotiated to arrive at important new understandings In crossing the portal transformation occurs both in knowledge and subjectivity Such transformation involves troublesome knowledge a key concern for contributors to this book who identify threshold concepts in their own fields and suggest how to deal with them Part One extends and enhances the threshold concept framework containing chapters that articulate its qualities its links to other social theories of learning and other traditions in educational research Part Two encompasses the disciplinary heart of the book with contributions from a diversity of areas including computing engineering biology design modern languages education and economics In the many empirical case studies educators show how they have used the threshold concept framework to inform and evaluate their teaching contexts Other chapters emphasise the equally important being and becoming dimension of learning Part Three suggests pedagogic directions for those at the centre of the education project with contributions focusing on the socialisation of academics and their continuing quest to be effective teachers The book will be of interest to disciplinary teachers educational researchers and educational developers It also is of relevance to issues in quality assurance and professional accreditation **A.N. Whitehead's Thought through a New Prism** Aljoscha Berve, Helmut Maassen, 2017-01-06 This volume brings together the proceedings of the European Summer School for Process Thought which took place in M lheim Germany in August 2012 It explores Alfred North Whitehead s thinking in different fields of science connecting his philosophical writings with physics religion education psychology and aesthetics The first part of the book is concerned with Whitehead s philosophical methodology discussing a plethora of subjects including the interdependence between some of Whitehead s works the role of logic in his style of argument concepts of time the role of symbolism and the relation between specialized terminology and the colloquial in Whitehead s philosophy The second part explores applications for the concepts of Whitehead s thinking in a broader context In scientific fields as diverse as physics theological and classical Chinese religious thought concepts of education and psychological theories of embodiment Whitehead s basic philosophical concepts have been implemented in various different ways As such this book holds an interdisciplinary appeal for Whitehead scholars from different scientific backgrounds **Alfred North Whitehead** Alfred North Whitehead, 1961 Donated by Sydney Harris *The Two Worlds*, 1934 **New Scientist**, 2007
