Thought Law Rights And Action In The Age Of Environmental Crisis:

Thought, Law, Rights and Action in the Age of Environmental Crisis Anna Grear, Evadne Grant, 2015-07-31 In the climate pressed Anthropocene epoch nothing could be more urgent than fresh engagements with the fractious relationships between humanity law and the living order This timely book intelligently combines theoretical reflections doctrinal and

The Routledge Handbook of Law and the Anthropocene Peter D. Burdon, James Martel, 2023-05-15 The Routledge Handbook of Law and the Anthropocene provides a critical survey into the function of law and governance during a time when humans have the power to impact the Earth system The Anthropocene is a crisis of the earth system This book addresses its implications for law and legal thinking in the twenty first century Unpacking the challenges of the Anthropocene for advocates of ecological law and politics this handbook pursues a range of approaches to the scientific fact of anthropocentrism with contributions from lawyers philosophers geographers and environmental and political scientists Rather than adopting a hubristic normativity the contributors engage methods concepts and legal instruments in a way that underscores the importance of humility and an expansive ethical worldview Contributors to this volume are leading scholars and future leaders in the field Rather than upholding orthodoxy the handbook also problematizes received wisdom and is grounded in the conviction that the ideas we have inherited from the Holocene must all be open to question Engaging such issues as the Capitalocene Gaia theory the rights of nature posthumanism the commons geoengineering and civil disobedience this handbook will be of enormous interest to academics students and others with interests in ecological law and the current environmental crisis

Law Unlimited Margaret Davies, 2017-01-20 This book engages with a traditional yet persistent question of legal theory what is law However instead of attempting to define and limit law the aim of the book is to unlimit law to take the idea of law beyond its conventionally accepted boundaries into the material and plural domains of an interconnected human and nonhuman world Against the backdrop of analytical jurisprudence the book draws theoretical connections and continuities between different experiences spheres and modalities of law Taking up the many forms of critical and socio legal thought it presents a broad challenge to legal essentialism and abstraction as well as an important contribution to more general normative theory Reading crystallising and extending themes that have emerged in legal thought over the past century this book is the culmination of the author's 25 years of engagement with legal theory Its bold attempt to forge a thoroughly contemporary approach to law will be of enormous value to those with interests in legal and socio legal theory

Human Rights and Ocean Governance Mara Ntona, 2023-12-12 This book argues for the utility of human rights in the practice of ocean governance Maritime spatial planning MSP has become the dominant marine management paradigm with MSP frameworks already at various stages of elaboration and implementation in more than half of all coastal states However as experience with MSP accrues a central systemic shortcoming has become apparent insofar as the normative frameworks that underpin MSP tend to be grounded in a rationalistic and economistic worldview The result

is a post political neoliberal approach to the implementation of MSP which favours technocratic fixes to complex societal problems over efforts to address underlying issues of power and inequality Building upon the new field of critical MSP studies this book offers a much neglected legal contribution More specifically it analyses the extent to which law and particularly human rights law can be utilised to meaningfully challenge the unjust patterns of human ocean interaction that MSP preserves or creates and so provide a vehicle for the formulation and realisation of transformative blue futures The book looks to human rights as norms that are uniquely capable of bringing into relief the values cause and effect relationships and uncertainties that prevailing capitalist industrial framings of the ocean tend to downplay or worse disregard And so from a more pragmatic viewpoint the book argues that the policy and advocacy tools associated with human rights can be used within MSP processes to foster patterns of human ocean interaction which are more conducive to social and environmental justice This book will be of interest to legal and planning scholars geographers and others concerned with ocean governance and the blue turn in the social sciences and humanities more generally

Environmental Justice in India Gitanjali Nain Gill, 2016-11-10 Modern environmental regulation and its complex intersection with international law has led many jurisdictions to develop environmental courts or tribunals Strikingly the list of jurisdictions that have chosen to do this include numerous developing countries including Bangladesh Kenya and Malawi Indeed it seems that developing nations have taken the task of capacity building in environmental law more seriously than many developed nations *Environmental Justice in India* explores the genesis operation and effectiveness of the Indian National Green Tribunal NGT The book has four key objectives First to examine the importance of access to justice in environmental matters promoting sustainability and good governance Second to provide an analytical and critical account of the judicial structures that offer access to environmental justice in India Third to analyse the establishment working practice and effectiveness of the NGT in advancing a distinctively Indian green jurisprudence Finally to present and review the success and external challenges faced and overcome by the NGT resulting in growing usage and public respect for the NGT's commitment to environmental protection and the welfare of the most affected people Providing an informative analysis of a growing judicial development in India this book will be of great interest to students and scholars of environmental justice environmental law development studies and sustainable development

Environmental Law and Governance for the Anthropocene Louis Kotzé, 2017-06-15 The era of eco crises signified by the Anthropocene trope is marked by rapidly intensifying levels of complexity and unevenness which collectively present unique regulatory challenges to environmental law and governance This volume sets out to address the currently under theorised legal and consequent governance challenges presented by the emergence of the Anthropocene as a possible new geological epoch While the epoch has yet to be formally confirmed the trope and discourse of the Anthropocene undoubtedly already confront law and governance scholars with a unique challenge concerning the need to question and ultimately re imagine environmental law and governance interventions in the light of a new socio ecological situation the

signs of which are increasingly apparent and urgent This volume does not aspire to offer a univocal response to Anthropocene exigencies and phenomena Any such attempt is in any case unlikely to do justice to the multiple implications and characteristics of Anthropocene forebodings What it does is to invite an unrivalled group of leading law and governance scholars to reflect upon the Anthropocene and the implications of its discursive formation in an attempt to trace some initial often radical future facing and imaginative implications for environmental law and governance *Research Methods in Environmental Law* Andreas Philippopoulos-Mihalopoulos,Victoria Brooks,2017-11-24 This timely Handbook brings innovative free thinking and radical approaches to research methods in environmental law With a comprehensive approach it brings together key concepts such as sustainability climate change activism education and Actor Network Theory It considers how the Anthropocene subjects environmental law to critique and to the needs of the variety of bodies human and non human that require its protection This much needed book provides a theoretically informed analysis of methodological approaches in the discipline such as constitutional analysis rights based approaches spatial geographical analysis immersive methodologies and autoethnography which will aid in the practical critique and re imagining of Environmental Law Courts and the Environment Christina Voigt,Zen Makuch, This discerning book examines the challenges opportunities and solutions for courts adjudicating on environmental cases It offers a critical analysis of the practice and judgments of courts from various representative and influential jurisdictions **Environmental Courts and Tribunals** Ceri Warnock,2021-01-07 The global phenomenon of the establishment of specialist courts is one of the most important recent developments in environmental law Although they are generally seen as a much needed innovation they do pose challenges particularly around questions of legitimacy This important book tackles these questions directly looking specifically at the courts in the common law world It argues that to fully understand the nature of the adjudication of these courts a bottom up approach must be taken ie the question before the court is determinative Despite its theoretical focus the book will also provide invaluable insights to practitioners engaging with these new courts for the first time An innovative study on a seismic change in how environmental law is adjudicated *Comparative Environmental Law* Tseming Yang,Anastasia Telesetsky,Sara K. Phillips,2025-07-15 Discussing the law in theory and in practice *Comparative Environmental Law* identifies the ways in which regulatory systems converge or diverge examining key developments in international legal frameworks from every continent Expert contributors review different comparative approaches and examine how these can be applied to the study of environmental law *From Environmental to Ecological Law* Kirsten Anker,Peter D. Burdon,Geoffrey Garver,Michelle Maloney,Carla Sbert,2020-12-30 This book increases the visibility clarity and understanding of ecological law Ecological law is emerging as a field of law founded on systems thinking and the need to integrate ecological limits such as planetary boundaries into law Presenting new thinking in the field this book focuses on problem areas of contemporary law including environmental law property law trusts legal theory and First Nations law and explains how ecological law provides solutions Written by ecological law experts

it does this by 1 providing an overview of shortcomings of environmental law and other areas of contemporary law 2 presenting specific examples of these shortcomings 3 explaining what ecological law is and how it provides solutions to the shortcomings of contemporary law and 4 showing how society can overcome some key challenges in the transition to ecological law Drawing on a diverse range of case study examples including Indigenous law ecological restoration and mining this volume will be of great interest to students scholars and policymakers of environmental and ecological law and governance political science environmental ethics and ecological and degrowth economics Sustainable Development, International Law, and a Turn to African Legal Cosmologies Godwin Eli Kwadzo Dzah, 2024-05-15 This original book analyses and reimagines the concept of sustainable development in international law from a non Western legal perspective Built upon the intersection of law politics and history in the context of Africa its peoples and their experiences customary law and other legal cosmologies this ground breaking study applies a critical legal analysis to Africa s interaction with conceptualising and operationalising sustainable development It proposes a turn to non Western legal normativity as the foundational principle for reimagining sustainable development in international law It highlights eco legal philosophies and principles in remaking sustainable development where ecological integrity assumes a central focus in the reimagined conceptualisation and operationalisation of sustainable development While this pioneering book highlights Africa as its analytical pivot its arguments and proposals are useful beyond Africa Connecting global discourses on nature the environment rights and development Godwin Eli Kwadzo Dzah illuminates our current thinking on sustainable development in international law

Rights for Robots Joshua C. Gellers, 2020-10-26 Bringing a unique perspective to the burgeoning ethical and legal issues surrounding the presence of artificial intelligence in our daily lives the book uses theory and practice on animal rights and the rights of nature to assess the status of robots Through extensive philosophical and legal analyses the book explores how rights can be applied to nonhuman entities This task is completed by developing a framework useful for determining the kinds of personhood for which a nonhuman entity might be eligible and a critical environmental ethic that extends moral and legal consideration to nonhumans The framework and ethic are then applied to two hypothetical situations involving real world technology animal like robot companions and humanoid sex robots Additionally the book approaches the subject from multiple perspectives providing a comparative study of legal cases on animal rights and the rights of nature from around the world and insights from structured interviews with leading experts in the field of robotics Ending with a call to rethink the concept of rights in the Anthropocene suggestions for further research are made An essential read for scholars and students interested in robot animal and environmental law as well as those interested in technology more generally the book is a ground breaking study of an increasingly relevant topic as robots become ubiquitous in modern society The Open Access version of this book available at <http://www.taylorfrancis.com/books/e> ISBN has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license **Culturally Sustainable Social Robotics** Marco

Nørskov, Johanna Seibt, Oliver Santiago Quick, 2021-01-15 The subject of social robotics has enormous projected economic significance. However, social robots not only present us with novel opportunities but also with novel risks that go far beyond safety issues. It is a potentially highly disruptive technology which could negatively affect the most valuable parts of the fabric of human social interactions in irreparable ways. Since engineering educations do not yet offer the necessary competences to analyze holistically, assess and constructively mitigate these risks, new alliances must be established between engineering and SSH disciplines with special emphasis on the humanities, i.e. disciplines specializing in the analysis of socio-cultural interactions and human experience. The Robophilosophy Conference Series was established in 2014 with the purpose of creating a new forum and catalyzing the research discussion in this important area of applied humanities research with focus on robophilosophy. Robophilosophy conferences have been the world's largest venues for humanities research in and on social robotics. The book at hand presents the proceedings of Robophilosophy Conference 2020 Culturally Sustainable Social Robotics, the fourth event in the international biennial Robophilosophy Conference Series which brought together close to 400 participants from 29 countries. The speakers of the conference whose contributions are collected in this volume were invited to offer concrete proposals for how the Humanities can help to shape a future where social robotics is guided by the goals of enhancing socio-cultural values rather than by utility alone. The book is divided into 3 parts: Abstracts of Plenaries which contains 6 plenary sessions; Session Papers with 44 papers under 8 thematic categories; and Workshops containing 25 items on 5 selected topics. Providing concrete proposals from philosophers and other SSH researchers for new models and methods, this book will be of interest to all those involved in developing artificial social agents in a culturally sustainable way that is also a fortiori ethically responsible. Historical Dictionary of Human Rights and Humanitarian Organizations

Thomas E. Doyle, II, Robert F. Gorman, Edward S. Mihalkanin, 2016-12-19 The Historical Dictionary of Human Rights and Humanitarian Organizations Third Edition defines the core concepts of human rights and humanitarian law. It relates the major international legal agreements related to human rights and names the diverse intergovernmental organizations which are responsible for implementing and maintaining these legal declarations, charters, conventions or treaties. It also names and describes the several international non-governmental organizations which lobby states and international organizations with respect to human rights which carry out programs of humanitarian assistance or relief and which have played such a significant role in the evolution of human rights and humanitarianism in the modern era. Finally, it features the names and biographical accounts of major figures in the history of human rights and humanitarianism along with figures that are active today on these issues. This third edition of Historical Dictionary of Human Rights and Humanitarian Organizations contains a chronology, an introduction, appendixes and an extensive bibliography. The dictionary section has over 700 cross-referenced entries on human rights concepts, major pieces of international law on human rights and humanitarian issues, major intergovernmental bodies responsible for implementing international laws on human rights and humanitarian issues, major

international non governmental organizations whose work focuses on human rights and humanitarian issues and the names of important historical and contemporary figures who have contributed to the establishment and progress of human rights and humanitarianism This book is an excellent access point for students researchers and anyone wanting to know more about Human Rights

Blue Legalities Irus Braverman, Elizabeth R. Johnson, 2020-01-17 The ocean and its inhabitants sketch and stretch our understandings of law in unexpected ways Inspired by the blue turn in the social sciences and humanities *Blue Legalities* explores how regulatory frameworks and governmental infrastructures are made reworked and contested in the oceans Its interdisciplinary contributors analyze topics that range from militarization and Maori cosmologies to island building in the South China Sea and underwater robotics Throughout *Blue Legalities* illuminates the vast and unusual challenges associated with regulating the turbulent materialities and lives of the sea Offering much more than an analysis of legal frameworks the chapters in this volume show how the more than human ocean is central to the construction of terrestrial institutions and modes of governance By thinking with the more than human ocean *Blue Legalities* questions what we think we know and what we don't know about oceans our earthly planet and ourselves Contributors Stacy Alaimo Amy Braun Irus Braverman Holly Jean Buck Jennifer L Gaynor Stefan Helmreich Elizabeth R Johnson Stephanie Jones Zsofia Korosy Berit Kristoffersen Jessica Lehman Astrida Neimanis Susan Reid Alison Rieser Katherine G Sammler Astrid Schrader Kristen L Shake Phil Steinberg

The Great Awakening Anna Grear, 2020 As we enter a time of climate catastrophe worsening inequality and collapsing market state systems can human societies transcend the old dysfunctional paradigms and build the world anew There are many signs of hope In *The Great Awakening* twelve cutting edge activists scholars and change makers probe the deep roots of our current predicament while reflecting on the social DNA for a post capitalist future We learn about seed sharing in agriculture blockchain technologies for networked collaboration cosmological peer production of houses and vehicles creative hacks on law and new ways of thinking and enacting a rich collaborative future This surge of creativity is propelled by the social practices of commoning new modes of life for creating and sharing wealth in fair minded ecologically respectful ways It is clear that the multiple entangled crises produced by neoliberal capitalism cannot be resolved by existing political and legal institutions which are imploding under the weight of their own contradictions Present and future needs can be met by systems that go beyond the market and state With experiments and struggle a growing pluriverse of commoners from Europe and the US to the Global South and cyberspace are demonstrating some fundamentally new ways of thinking being and acting This ontological shift of perspective is making new worlds possible

Posthuman Legal Subjectivity Jana Norman, 2021-08-12 This book provides a reimagining of how Western law and legal theory structures the human earth relationship As a complement to contemporary efforts to establish rights of nature and non human legal personhood this book focuses on the other subject in the human earth relationship the human Critical ecological feminism exposes the dualistic nature of the ideal human legal subject as a key driver in the dynamic of

instrumentalism that characterises the human earth relationship in Western culture This book draws on conceptual fields associated with the new sciences including new materialism posthuman critical theory and Big History to demonstrate that the naturalised hierarchy of humans over nature in the Western social imaginary is anything but natural It then sets about constructing a counternarrative The proposed Cosmic Person as alternative non dualised human legal subject forges a pathway for transforming the Western cultural understanding of the human earth relationship from mastery and control to ideal co habitation Finally the book details a case study highlighting the practical application of the proposed reconceptualisation of the human legal subject to contemporary environmental issues This original and important analysis of the legal status of the human in the Anthropocene will be of great interest to those working in legal theory jurisprudence environmental law and the environmental humanities as well as those with relevant interests in gender studies cultural studies feminist theory critical theory and philosophy

Contributions to Law, Philosophy and Ecology Ruth Thomas-Pellicer,Vito De Lucia,Sian Sullivan,2016-05-26 Contributions to Law Philosophy and Ecology Exploring Re Embodiments is a preliminary contribution to the establishment of re embodiments as a theoretical strand within legal and ecological theory and philosophy Re embodiments are all those contemporary practices and processes that exceed the epistemic horizon of modernity As such they offer a plurality of alternative modes of theory and practice that seek to counteract the ecocidal tendencies of the Anthropocene The collection comprises eleven contributions approaching re embodiments from a multiplicity of fields including legal theory eco philosophy eco feminism and anthropology The contributions are organized into three parts Beyond Modernity The Sacred Dimension and The Legal Dimension The collection is opened by a comprehensive introduction that situates re embodiments in theoretical context Whilst closely bound with embodiment and new materialist theory this book contributes a unique voice that echoes diverse political processes contemporaneous to our times Written in an elegant and accessible language the book will appeal to undergraduates postgraduates and established scholars alike seeking to understand and take re embodiments further both politically and theoretically

Living with the Sea Mike Brown,Kimberley Peters,2018-10-03 The seas and oceans are currently taking centre stage in academic study and public consciousness From the plastics littering our seas to the role of climate change on ocean currents from unequal access of marine resources to the treacherous experiences of seafarers who keep our global economy afloat now is a crucial time to examine how we live with the sea This ambitious book brings together an interdisciplinary and international cohort of contributors from within and beyond academia It offers a range and diversity of insights unlike previous collections An oceanic turn is taking place with a burgeoning of academic work that takes seriously the place of seas and oceans in understanding socio cultural and political life past and present Yet there is a significant gap concerning the ways in which we engage with seas and oceans with a will to enliven action and evoke change This book explores these challenges offering insights from spatial planning architectural design geography educational

studies anthropology and cultural studies An examination through these lenses can help us to better understand human relationships with the seas and oceans and promote an ethic of care for the future
