Two Trips to Gorilla Land and the Cataracts of the Congo Vol I & Vol II Sir Richard Francis Burton, 2019-01-11 Excerpt The notes which form the ground work of these volumes have long been kept in the obscurity of manuscript my studies of South America of Syria and Palestine of Iceland and of Istria left me scant time for the labour of preparation Leisure and opportunity have now offered themselves and I avail myself of them in the hope that the publication will be found useful to more than one class of readers The many who take an interest in the life of barbarous peoples may not be displeased to hear more about the F n and the few who would try a fall with Mister Gorilla can learn from me how to equip themselves whence to set out and whither to go for the best chance Travelling with M Paul B du Chaillu s First Expedition in my hand I jealously looked into every statement and his numerous friends will be pleased to see how many of his assertions are confirmed by my experience

Francis Burton, 2020-06-28 During the hot season of 1863 Nanny Po as the civilized African calls this lofty and beautiful island had become a charnel house a dark and dismal tomb of Europeans The yellow fever of the last year which wiped out in

two months one third of the white colony more exactly 78 out of 250 had not reappeared but the conditions for its re appearance were highly favourable The earth was all water the vegetation all slime the air half steam and the difference between wet and dry bulbs almost nil Thoroughly dispirited for the first time I was meditating how to escape when H M Steamship Torch steamed into Clarence Cove and Commander Smith hospitably offered me a passage down south To hear was to accept Two days afterwards July 29 1863 I bade a temporary adios to the enemy The bitterness of death remained behind as we passed out of the baneful Bights Wind and wave were dead against us yet I greatly enjoyed the gradual emerging of the sun through his shroud of smokes the increasing consciousness that a moon and stars really exist the soft blue haze of the sky and the coolness of 73 F at 6 A M in the captain s cabin I had also time to enjoy these charms The Torch was not provided with despatch boilers she was profoundly worm eaten and a yard of copper occasionally clapped on did not prevent her making some four feet of water a day So we rolled leisurely along the well known Gaboon shore and faintly sighted from afar Capes Lopez and St Catherine and the fringing ranges of Mayumba land a blue line of heights based upon gently rising banks ruddy and white probably of shaly clay The seventh day August 5 placed us off the well known red hills of Loango land The country looks high and bold after the desperate flatness of the Bights and we note with pleasure that we have left behind us the impervious luxuriance of vegetation which crowns the lowlands covers the sides of the rises and caps their summits During the rains after October the grass now showing yellow stubble upon the ruddy rusty plain becomes a cane fence ten to twelve feet tall but instead of matted felted jungle knitted together by creepers of cable size we have scattered clumps of dark lofty and broad topped trees A nearer view shows great cliffs weather worked into ravines and basins ribs and ridges towers and pinnacles Above them is a joyful open land apparently disposed in two successive dorsa or steps with bright green tiers and terraces between and these are pitted with the crater like sinks locally called holes so frequent in the Gaboon country Southwards the beauty of eternal verdure will end and the land will become drier and therefore better fitted for Europeans the nearer it approaches Mossamedes Bay South of Little Fish again a barren tract of white sand will show the Last Tree an inhospitable region waterless and bulwarked by a raging sea **Nature** Sir Norman Lockyer, 1876 Encountering Gorillas James L. Newman, 2013-07-05 Gorillas the largest of the apes inhabiting our planet have been a source of fear awe and inspiration to humans In this book James L Newman brings a lifetime of study of Africa to his compelling story of the rich and varied interaction between gorillas and humans since earliest contact He illuminates the complex relationship over time through the interlinked themes of discovery exploitation understanding and continuing survival Tragically the number of free living gorillas facing habitat loss disease and poaching has declined dramatically over the course of the past century and the future of the few that remain is highly uncertain At the same time those in zoos and sanctuaries now lead much more secure lives than they did earlier Newman follows this transition highlighting the roles played by key individuals both humans and gorillas Among the former have been adventurers opportunists writers and

scientists The latter include real gorillas such as Gargantua and Koko and fictional ones notably King Kong and Mighty Joe Young This thoughtful and engaging book helps us understand how our image of gorillas has been both distorted and clarified through culture and science for centuries and how we now control the destiny of these magnificent great apes

Joseph Conrad and the Anthropological Dilemma John Wylie Griffith,1995 By situating Conrad s work in relation to other writings on primitive peoples John Griffith shows how his fiction draws on prominent anthropological and biological theories regarding the degenerative potential of contacts between European and other cultures At the same time however Conrad s work reflected an anthropological dilemma he constantly posed the question of how to bridge conceptual and cultural gaps between various peoples Catalogue of the Library of the Peabody Institute of the City of Baltimore
