Georges Perec: A Life in Words David Bellos, 2010-11-30 It's hard to see how anyone is ever going to better this User's Manual to the life of Georges Perec Gilbert Adair Sunday Times Winner of the Prix Goncourt for Biography 1994 George Perec 1936-82 was one of the most significant European writers of the twentieth century and undoubtedly the most versatile and innovative writer of his generation David Bellos's comprehensive biography which also provides the first full survey of Perec's irreverent polymathic oeuvre explores the life of an anguished comical and endearingly modest man who worked quietly as an archivist in a medical research library The French son of Jewish immigrants from Poland he remained haunted all of his life by his father's death in the war fighting to defend France and his mother's in Auschwitz Birkenau His acclaimed novel *A Void* 1969 written without using the letter e has been seen as an attempt to escape from the words *pre mere* and even George Perec His career made an auspicious start with *Things A Story of the Sixties* 1965 which won the Prix Renaudot He then pursued an idiosyncratic and ambitious literary itinerary through the intellectual ferment of Paris in the 1960s and 1970s He belonged to the *Ouvrier de Littérature Potentielle* *OuLiPo* a radically inventive group of writers whose members included Raymond Queneau and Italo Calvino Perec achieved international celebrity with *Life A User's Manual* 1978 which won the Prix Medicis and was voted Novel of the Decade by the Salon du Livre He died in his mid forties after a short illness leaving a truly puzzling detective novel *53 Days* incomplete Professor Bellos's book enables us at once to relish the most wilfully bizarre aspects of Perec's oeuvre and to understand the whys and wherefores of his protean nature Jonathan Romney Literary Review

Isidore Kafui Dorpenyo, 2019-08-20 This book examines Ghana's use of the fingerprint biometric technology in order to further conversations about localization championed by technical communication scholars. Localization in this case refers to the extent to which users demonstrate their knowledge of use by subverting and reconfiguring the purpose of technology to solve local problems. Dorpenyo argues that the success of a technology depends on how it meets the users' needs and the creative efforts users put into use situations. In *User Localization Strategies in the Face of Technological Breakdown*, Dorpenyo advocates studying how users of technological systems construct knowledge about the technology and develop local strategies to solve technological breakdowns. By analyzing technical documents and interview transcripts, the author identifies and advances three user localization strategies: linguistic localization, subversive localization, and user heuristic experience localization, and considers how biometric systems can become a tool of marginalization.
