of America's leaders believed that free trade, modern finance, technology, and wise government policy had paved the way for a new era of prosperity. Then came a cascade of disasters: a bursting tech bubble, domestic terror attacks, a housing market implosion, a financial system crisis, a deadly global pandemic. These events led to serial recessions, deepened America's political fractures, and widened the divide between those best off and everyone else. Award-winning economics writer Jon Hilsenrath examines what happened, viewing events through the experiences of two historic figures. Janet Yellen was Treasury Secretary, Federal Reserve Chairwoman, and Chair of the White House Council of Economic Advisers. Her husband, George Akerlof, was an imaginative Nobel prize-winning economist. Long before the upheaval of the past two decades, Akerlof warned of flaws in modern economic thinking; then Yellen had to fix the economy on the fly as it cracked. In telling their story, Hilsenrath explores long-running intellectual battles over the fragile balance between unruly democratic government and unpredictable markets. He introduces readers to the cast of modern intellectuals and policy makers who deciphered, shaped, and steered these systems through prosperity, chaos, and reformation. And he explains what went wrong, why, and what might happen next. What emerges is an absorbing examination of how humans think and behave and how those actions shape markets, inform economic policy, and could determine the future of a now deeply divided nation. Hilsenrath reminds us that economics is neither science nor ideology, as some once wished or promised. Economics is an endeavor. Most good love stories are too.
