Threatened Children Rhetoric And Concern About Child Victims:

Threatened Children Joel Best, 1993 Child abuse incest child molestation Halloween sadism child pornography although clearly not new problems they have attracted more attention than ever before Threatened Children asks why Joel Best analyzes the rhetorical tools used by child advocates when making claims aimed at raising public anxiety and examines the media's role in transmitting reformers' claims and the public's response to the frightening statistics compelling examples and expanding definitions it confronts Drawing on a wide range of sources from criminal justice records to news stories from urban legends to public opinion surveys Best reveals how the cultural construction of social problems evolves Publisher's description

Overinvested Nina Bandelj, 2026-01-20 What happens when children become investment projects and child rearing becomes exhausting labor Parents are exhausted When did raising children become such all-consuming never-ending incredibly expensive and emotionally absorbing effort In this eye-opening book Nina Bandelj explains how we got to this point how we turned children into financial and emotional investments and child rearing into laborious work At the turn of the twentieth century children went from being economically useful often working to support families to being seen by their parents as vulnerable and emotionally priceless In the new millennium however parents have become overinvested in the emotional economy of parenting Analyzing in depth interviews with parents national financial datasets and decades of child rearing books Bandelj reveals how parents today spend save and even go into debt for the sake of children They take on parenting as the hardest but most important job and commit their entire selves to being a good parent The economization and emotionalization of society work together to drive parental overinvestment offering a dizzying array of products and platforms to turn children into human capital from financial instruments to extracurricular programs to therapeutic parenting advice And yet Bandelj warns the privatization of child rearing and devotion of parents' monies emotions and souls ultimately hurt the well-being of children parents and society Overinvested offers a compelling argument that we should reimagine children and what it means to raise them

The Satanism Scare Joel Best, 2017-09-29 Although there is growing concern over Satanism as a threat to American life the topic has received surprisingly little serious attention Recognizing this the editors of this volume have selected papers from a wide variety of disciplines broadly covering contemporary aspects of Satanism from the vantage points of studies in folklore cults religion deviance rock music rumor and the mass media All contributors are skeptical of claims that a large powerful satanic conspiracy can be substantiated Their research focuses instead on claims about Satanism and on the question of whose interests are served by such claims Several papers consider the impact of anti-Satanism campaigns on public opinion law enforcement and civil litigation child protection services and other sectors of American society The constructionist perspective adopted by the editors does not deny the existence of some activities by real Satanists and two papers describe the workings of satanic groups Whatever the basis of the claims examined and analyzed there is growing evidence that belief in the satanic menace will have real social

consequences in the years ahead Collective Morality and Crime in the Americas Christopher Birkbeck, 2012-12-07 This study examines the ways in which the moral community is talked into being in relation to crime and the objects of concern that typically occupy its attention It maps the imagined moral universe of the virtuous and the criminal and charts the relations between these two groups in the history of the present It examines the calls to action which symbolically endow the moral community with power And it looks at the character and content of collective moralizing The source materials are commentaries about crime and criminal justice appearing in selected newspapers across the Americas The moral talk found there is stylized routine trivial and occasionally dramatic It looks nothing like the weightier renderings of morality that derive from the reconstruction of a particular ethic or from the systematic probing of values and moral reasoning And its fuzzy offhand unexceptional and frequently unsystematic nature makes it a difficult candidate for explaining either stability or change in crime policies But moral talk has intrinsic importance as the creator and sustainer of an imagined moral community a community that symbolizes the existence and vigor of morality itself and confers a crucially important identity on its self proclaimed members And moral talk reveals inherent intersections between normative empirical and technical discourses highlighting the relationships between morality science and social engineering Thus a prosaic instrumental model of morality is particularly strong in North America but only found in a more abstract form in Latin America where it sits alongside a stirring vision of morality more directly anchored in virtue Research on social problems moral panics and the sociology of morality has largely overlooked the type of moral discourse studied here While emphasizing the culturally contingent nature of the findings the conclusion reflects on their significance for understanding the nature of moralizing the artifacts of talk and the construction of identity *What's Eating You?* Cynthia J. Miller, A. Bowdoin Van Riper, 2017-02-23 Explores the horrific side of consumption as it is portrayed in film and television from what and whom we eat to food that bites back **ABA Juvenile & Child Welfare Law Reporter** ,1992 **Encyclopedia of Children and Childhood** Paula S. Fass, 2004 This 3 vol set presents the social and cultural history of childhood from antiquity to the present Children and Childhood examines this history through articles on education parenting child labor economics images of childhood children's literature play toys and games health physiology law the criminal justice system and social welfare **Columbia Law Review** ,2001 **Sociological Perspectives** ,2008 *Denver University Law Review* ,1985 Criminal Justice Review ,1992 **Deviant Behavior** Erich Goode, 1997 Goode provides a comprehensive balanced exploration of the many different forms of deviant behavior as well as the major sociological perspectives and theories of deviance **Times, Places, Passages** International Society for Ethnology and Folklore. International Congress, Attila Paládi-Kovács, 2004 Times Places Passages Ethnological Approaches in the New Millennium was the theme expressed in the title of the Seventh International Congress of the Societ Internationale d'Ethnologie et de Folklore SIEF in Budapest This ethnological congress held at the beginning of the new millennium takes its inaugural role seriously What is demanded from us is that we should try to imagine

what will happen to human society and that we should be prepared for the historical moment of transition We should know where we have come from where we are now and where we are going in the new era we are entering These tasks require a critical and reflective discussion of the theoretical and methodological possibilities of ethnology including the new politics of forming ethnological knowledge in a global world This book is a selection of the papers presented at the congress and contains approximately 80 articles
