a growing interest in the use of ontologies for multi agent system app cations On the one hand the agent paradigm is
successfully employed in those applications where autonomous loosely coupled heterogeneous and distributed systems need
to interoperate in order to achieve a common goal On the other hand ontologies have established themselves as a powerful
tool to enable kno edge sharing and a growing number of applications have bene ted from the use of ontologies as a means to
achieve semantic interoperability among heterogeneous distributed systems In principle ontologies and agents are a match
made in heaven that has failed to happen What makes a simple piece of software an agent is its ability to communicate in a
social environment to make autonomous decisions and to be proactive on behalf of its user Communication ultimately
depends on und standing the goals preferences and constraints posed by the user Autonomy is
