Private Security Companies during the Iraq War Scott Fitzsimmons, 2015-07-16 This book explores the use of deadly force by private security companies during the Iraq War The work focuses on and compares the activities of the US companies Blackwater and Dyncorp Despite sharing several important characteristics such as working for the same client the US State Department during the same time period the employees of Blackwater fired their weapons far more often and killed and seriously injured far more people in Iraq than their counterparts in DynCorp In order to explain this disparity the book undertakes the most comprehensive analysis ever attempted on the use of violence by the employees of these firms Based on extensive empirical research it offers a credible explanation for this difference Blackwater maintained a relatively bellicose military culture that placed strong emphasis on norms encouraging its personnel to exercise personal initiative proactive use of force and an exclusive approach to security which together motivated its personnel to use violence quite freely against anyone they suspected of posing a threat Specifically Blackwater's military culture motivated its personnel to fire upon suspected threats more quickly at greater distances and with a greater quantity of bullets and to more readily abandon the people they shot at when compared to DynCorp's personnel who maintained a military culture that encouraged far less violent behaviour Utilizing the Private Security Company Violent Incident Dataset PSCVID created by the author in 2012 the book draws upon data on hundreds of violent incidents involving private security personnel in Iraq to identify trends in the behaviour exhibited by the employees of different firms Based on this rich and original empirical data the book provides the definitive study of contemporary private security personnel in the Iraq War This book will be of much interest to students of the Iraq War Private Security Companies Military Studies War and Conflict Studies and IR in general

*Village Gone Viral* Marit Tolo Østebø, 2021-02-16 In 2001 Ethiopian Television aired a documentary about a small rural village called Awra Amba where women ploughed men worked in the kitchen and so called harmful traditional practices did not exist The

documentary radically challenged prevailing images of Ethiopia as a gender conservative and aid dependent place and Awra Amba became a symbol of gender equality and sustainable development in Ethiopia and beyond Village Gone Viral uses the example of Awra Amba to consider the widespread circulation and use of modeling practices in an increasingly transnational and digital policy world With a particular focus on traveling models policy models that become viral through various vectors ranging from NGOs and multilateral organizations to the Internet Marit Tolo steb critically examines the hidden dimensions of models and model making While a policy model may be presented as a best practice one that can be scaled up and successfully applied to other places the local impacts of the model paradigm are far more ambivalent potentially increasing social inequalities reinforcing social stratification and concealing injustice With this book steb ultimately calls for a reflexive critical anthropology of the production circulation and use of models as instruments for social change
