Fino, 2017-11-01 How did American fighter pilots respond to the challenges posed by increasing automation Spurred by their commanders during the Korean War to be tigers aggressive and tenacious American fighter pilots charged headlong into packs of fireball spewing enemy MiGs relying on their keen eyesight piloting finesse and steady trigger fingers to achieve victory But by the 1980s American fighter pilots vanquished their foes by focusing on a four inch square cockpit display manipulating electromagnetic waves and launching rocket propelled guided missiles from miles away In this new era of automated long range air combat can fighter pilots still be considered tigers Aimed at scholars of technology and airpower aficionados alike Steven A Fino s Tiger Check offers a detailed study of air to air combat focusing on three of the US Air Force s most famed aircraft the F 86E Sabre the F 4C Phantom II and the F 15A Eagle Fino argues that increasing fire control automation altered what fighter pilots actually did during air to air combat Drawing on an array of sources as well as his own decade of experience as an F 15C fighter pilot Fino unpacks not just the technological black box of fighter fire control equipment but also fighter pilots attitudes toward their profession and their evolving aircraft He describes how pilots grappled with the new technologies acutely aware that the very systems that promised to simplify their jobs while increasing their lethality in the air also threatened to rob them of the quintessential albeit mythic fighter pilot experience Finally Fino explains that these new systems often required new unique skills that took time for the pilots to identify and then develop Eschewing the typical great machine or great pilot perspectives that dominate aviation historiography Tiger Check provides a richer perspective on humans and machines working and evolving together in the air The book illuminates the complex interactions between human and machine that accompany advancing automation in the workplace *US Navy F-4 Phantom II MiG Killers*

1965-70 Brad Elward, Peter E. Davies, 2012-11-20 For every American fighter pilot involved in the Vietnam War the ultimate goal was to kill a MiG. In eight years of conflict 43 Vietnamese Peoples Air Force aircraft were claimed by US Navy and US Marine Corps Phantom II crews and one single ace crew produced. Navy Phantom IIs scored the first kills of the Vietnam War in April 1965 as well as scoring the last in January 1973. Featuring photographs as well as stunning aircraft profiles this volume charts the successes of the navy fighter crews as they encountered MiGs, Missiles and AAA over the jungles of North Vietnam.

USAF McDonnell Douglas F-4 Phantom II Peter E. Davies, 2013-04-20 A definitive technical guide to the USAF and foreign variants of the McDonnell Douglas F4 Phantom. In many respects the most successful, versatile and widely used combat aircraft of the post war era, the F 4 Phantom II was quickly adopted by the USAF after its spectacular US Navy introduction. Its introduction to USAF squadrons happened just in time for the Vietnam conflict where USAF F 4Cs took over MiG fighting duties from the F 100 Super Sabre. Although the F 4 was never intended as a dog fighter to tangle with light nimble gun armed MiGs, it was responsible for destroying 109 MiGs in aerial combat. At the end of their careers many of the survivors from the 3 380 land based Phantoms were converted into target drones for training purposes. New aircraft were also built for West Germany, Iran and Israel. As Peter Davies outlines in this illustrated history, the USAF's experience with the Phantom showed clearly that the air to air fighter was still a necessity. Its decision to fund its successor, the McDonnell Douglas F 15 Eagle, as well as the F 16 Fighting Falcon and F 22A Raptor, was heavily influenced by the lessons of US and other Phantom pilots in combat.

Spy Planes, Intruders, and Wild Weasels Thomas Wildenberg, 2025-10-28 *Spy Planes, Intruders and Wild Weasels* examines the emergence of electronic warfare and SEAD as critical components of air strategy during the Vietnam War. Utilizing declassified documents and firsthand accounts, Thomas Wildenberg provides a scholarly analysis of technological innovation, operational adaptation and interagency coordination in the evolution of modern aerial warfare. The air war over Vietnam, often termed the first high tech air war, was the first to feature electronic warfare (EW) in a decisive role. EW served not only as a means of defeating the surface to air missile which was also used extensively for the first time during this conflict, but also as a way to improve the offensive and defensive capabilities of U S fighters in air combat. *Spy Planes, Intruders and Wild Weasels* provides a comprehensive account of this heretofore neglected aspect of air combat history. Thomas Wildenberg draws from a wealth of declassified CIA and NSA documents as well as compelling accounts from veterans and technical experts to describe the tactics, innovations and impacts of electronic warfare in air combat in Vietnam. From the wide scale use of airborne jamming to the creation of aircraft like the EA 6B, the first aircraft designed specifically for electronic warfare, this definitive work illustrates the importance of EW in the history of the Vietnam War and the development of modern electronic warfare. The author traces the impact of EW technologies through key phases of the war, including Rolling Thunder, Linebacker I and Linebacker II. As the war progressed so did the sophistication of electronic warfare techniques. It was the first conflict in which the suppression of enemy air defenses and the aircraft

dedicated for this purpose called Wild Weasels became a major component of operational planning and use The book analyzes how U S forces adapted with advanced aircraft and equipment to counter North Vietnam s increasingly sophisticated air defenses Drawing from primary sources the author offers a clear analysis of how electronic warfare changed military tactics intelligence operations and the future of conflict **MiG-21 “FISHBED”** István Toperczer,2023-08-17 Using archival photographs sourced directly from Vietnam specially commissioned diagrams and combat accounts from veterans István Toperczer reveals how the MiG 21 defended Vietnam between 1966 and 1968 One of the most successful communist jet fighters ever built the MiG 21 Fishbed was involved in a series of deadly duels with American fighters over North Vietnam as the USAF and US Navy ramped up strike missions during Operation Rolling Thunder culminating in the destruction of over 70 US aircraft for the loss of 35 Fishbeds Having honed their skills on the subsonic MiG 17 pilots of the Vietnam People s Air Force received their first examples of the legendary MiG 21 supersonic fighter in 1966 Soon thrown into combat over North Vietnam the guided missile equipped MiG 21 proved a deadly opponent for the American crews striking at targets deep into communist territory Although the communist pilots initially struggled to come to terms with the fighter s air search radar and weapons systems the ceaseless cycle of combat operations quickly honed their skills The best fighter then available to the VPAF more than 200 MiG 21s of various sub types were supplied to the North Vietnamese In this study leading VPAF authority István Toperczer analyzes the tactics used by the MiG 21 pilots over the bitter fighting in North Vietnam during Rolling Thunder The highspeed hit and run attacks employed by the communist pilots proved to be very successful with both R 3S air to air missiles and heavy caliber cannon inflicting a rising toll on American jets Using first hand accounts from MiG 21 pilots battlescene artwork combat ribbon diagrams and armament views the author details the important role played by the Fishbed in the defense of North Vietnam **MiG-17/19 Aces of the Vietnam War** István Toperczer,2016-10-20 At the beginning of the Vietnam War the Vietnam People s Air Force VPAF were equipped with slow old Korean War generation fighters a combination of MiG 17s and MiG 19s types that should have offered little opposition to the cutting edge fighter bombers such as the F 4 Phantom II F 105 Thunderchief and the F 8 Crusader Yet when the USAF and US Navy unleashed their aircraft on North Vietnam in 1965 the inexperienced pilots of the VPAF were able to shatter the illusion of US air superiority Taking advantage of their jet s unequalled low speed maneuverability small size and powerful cannon armament they were able to take the fight to their missile guided opponents with a number of Vietnamese pilots racking up ace scores Packed with information previously unavailable in the west and only recently released from archives in Vietnam this is the first major analysis of the exploits of Vietnamese pilots in the David and Goliath contest with the US over the skies of Vietnam **F-4 Phantom II vs MiG-21** Peter E. Davies,2013-05-20 A gripping account of the mighty F 4 Phantom II icon of the Cold War and ultimate American fighter of the 1960s versus the nimble agile and abundant MiG 21 which was a communist icon of the period Influential leaders and tacticians are profiled to

provide a comparative evaluation of their contrasting skills This book also reveals the technical specifications of each jet with an analysis of the weaponry avionics and survival devices of the F 4 Phantom II as flown by the USAF and the MiG 21 The fighters strengths and weaknesses are also compared including turn radius performance at altitude range and structural integrity Featuring first person extracts reflect on the dangers of these aerial duels as USAF pilots and their counterparts struggled to overcome each plane s shortcomings this book draws us into the dangerous world braved by American and North Vietnamese airmen in the skies over Vietnam *MiG-21 Aces of the Vietnam War* István Toperczer,2017-09-21

Having learned their trade on the subsonic MiG 17 pilots of the Vietnamese People s Air Force VPAF received their first examples of the legendary MiG 21 supersonic fighter in 1966 Soon thrown into combat over North Vietnam the guided missile equipped MiG 21 proved a deadly opponent for the US Air Force US Navy and US Marine Corps crews striking at targets deep in communist territory Although the communist pilots initially struggled to come to terms with the fighter s air search radar and weapons systems the ceaseless cycle of combat operations quickly honed their skills Indeed by the time the last US aircraft a B 52 was claimed by the VPAF on 28 December 1972 no fewer than 13 pilots had become aces flying the MiG 21 Fully illustrated with wartime photographs and detailed colour artwork plates and including enthralling combat reports this book examines the many variants of the MiG 21 that fought in the conflict the schemes they wore and the pilots that flew them **Anti-Aircraft Artillery in Combat, 1950-1972** Mandeep Singh,2020-04-30

An in depth look at the combat performance of ground based air defenses during the Korean War Vietnam War Middle East conflicts and other campaigns Though anti aircraft artillery was extensively used in combat in the First World War it wasn t until World War II that it came into prominence shooting down more aircraft than any other weapon and seriously degrading the conduct of air operations In the battle between the attackers and anti aircraft artillery the latter had the upper hand when the war ended The post war years saw a decline in anti aircraft artillery as peace prevailed and the advent of the jet aircraft seemed to tilt the balance in favor of the aircraft as they flew faster and higher seemingly beyond the reach of anti aircraft artillery It would take all the hi tech equipment and the guile and cunning that anti aircraft artillery could muster to try and reclaim pole position It is that story of the tug of war between the aircraft and artillery that forms the narrative of this book as it traces the history of combat employment of anti aircraft artillery from the Korean War in effect the first Jet Age war to the War of Attrition between Arab states and Israel when the missiles came of age sending the aircraft scurrying for cover Mandeep Singh s book is the first attempt to look at the performance of anti aircraft artillery incorporating the views analyses and experiences of Soviet Arab and South Asian Armies through the major wars between 1950 and 1972 [MiG-17 and MiG-19 Units of the Vietnam War](#) István Toperczer,2012-11-20 A detailed history of the MiG 17 and MiG 19 units of the Vietnamese People s Air Force packed with first hand accounts and colour profiles The erstwhile enemy of the USAF and US Navy during the nine years of American involvement in the Vietnam War the Vietnamese Peoples Air Force VPAF quickly grew from an ill

organised rabble of poorly trained pilots flying antiquated communist aircraft into a highly effective fighting force that more than held its own over the skies of North Vietnam As this book explores flying Soviet fighters like the MiG 17 and 19 the VPAF produced over a dozen aces whilst the Americans managed just two pilots and three navigators in the same period

US Marine Corps and RAAF Hornet Units of Operation Iraqi Freedom Tony Holmes, 2006-02-28 Some 84 of the 250 Hornets committed by Central Command to Operation Iraqi Freedom 2003 present proudly bore MARINE titling on their rear fuselages A further 14 were marked with the distinctive kangaroo roundel of the Royal Australian Air Force RAAF The exploits achieved by the units that flew these jets into combat is detailed in this volume the third of three titles published in the Combat Aircraft series on what has been dubbed by many TACAIR insiders the Hornet s War Although the bulk of this book deals with the major hostilities phase of OIF I which ran from 20 March to 20 April 2003 the decade of pre war OSW missions and ongoing post war OIF II operations are also covered in significant detail from the Marine Corps perspective Profusely illustrated with rare frontline photography and more than 30 specially commissioned colour artworks this book also features the combat experiences of 24 pilots and Weapons Systems Officers

US Navy F-4 Phantom II Units of the Vietnam War 1964-68 Peter E. Davies, 2016-08-25 The F 4 Phantom II is perhaps the most famous post war fighter Primarily used as a land based fighter bomber and reconnaissance platform its naval origins and the immense contribution made to the US war effort in Vietnam by its original carrier based versions began its legend This title examines the unique aspects of the Phantom that made it so crucial to US Navy pilots during the Vietnam War its massive engine power long range speed the most powerful airborne search and fire control radar installed in a fighter at the time and of course its versatility as a ground attack and air to air platform Packed with first hand accounts unique profile artwork and rare photographs this is the history of one of the most important aircraft to be stationed on carriers off Southeast Asia during the war

F-104 Starfighter Units in Combat Peter E. Davies, 2014-11-20 This title covers the technical characteristics of the F 104 Starfighter one of the most widely used and popular aircraft in history Although built in small numbers for the USAF the F 104C fought and survived for almost three years in Vietnam There it was engaged in some of the war s most famous battles including the legendary operation Bolo where seven North Vietnamese MiGs were destroyed without the loss of a single US fighter This small tough and very fast fighter dubbed The Missile with a Man in It was called upon to do things it was not specifically designed for and did them admirably Featuring illustrations and photographs detailing the variety of nose paint schemes and weapons configurations this comprehensive appraisal of the F 104 Starfighter is ideal for modelling and aviation enthusiasts alike

USAF F-105 Thunderchief vs VPAF MiG-17 Peter E. Davies, 2019-07-25 The F 105D Thunderchief was originally designed as a low altitude nuclear strike aircraft but the outbreak of the Vietnam War led to it being used instead as the USAF s primary conventional striker against the exceptionally well defended targets in North Vietnam and Laos F 105 crews conducted long distance missions from bases in Thailand refuelling in flight several times and carrying heavy external

bombloads The MiG 17 was the lightweight highly manoeuvrable defending fighter it encountered most often in 1965-68 during Operation Rolling Thunder. A development of the MiG 15 which shocked UN forces during the Korean War its emphasis was on simplicity and ease of maintenance in potentially primitive conditions. Fully illustrated with stunning artwork this book shows how these two aircraft totally different in design and purpose fought in a series of duels that cost both sides dearly. *USN F-4 Phantom II vs VPAF MiG-17/19* Peter E. Davies, 2011-12-20. A fully illustrated account of the duels between the carrier borne interceptor of the US Navy and the agile MiG during the height of the Vietnam air war. The Vietnam War placed unexpected demands upon American military forces and equipment. The principal US naval fighter the McDonnell F 4 Phantom had originally been designed to defend the Fleet from air attack at long range. However its tremendous power and bomb carrying capacity made it an obvious candidate for the attack mission in Vietnam from 1965 onwards. Its opponent was the MiG 17 a direct descendant of the MiG 15 which had given USAF Sabre jets a hard fight in the Korean War. This book brings to life their dangerous duels and includes detailed cockpit views and other specially commissioned artwork to highlight the benefits and shortcomings of each plane type. It was in the skies over Vietnam that many of the techniques of air combat evolved as pilots learned how to use and to defeat supersonic fighters for the first time.

F-4 Phantom II vs MiG-21 - Válka ve Vietnamu Peter E. Davies, 2009. *Rolling Thunder 1965-68* Richard P. Hallion, 2018-02-22. Operation Rolling Thunder was the campaign that was meant to keep South Vietnam secure and dissuade the North from arming and supplying the Viet Cong. It pitted the world's strongest air forces against the MiGs and missiles of a small Soviet client state. But the US airmen who flew Rolling Thunder missions were crippled by a badly thought out strategy, rampant political interference in operational matters and aircraft optimised for Cold War nuclear strikes rather than conventional warfare. Ironically Rolling Thunder was one of the most influential episodes of the Cold War its failure spurring the 1970s US renaissance in professional fighter design and combat pilot training. Dr Richard P. Hallion one of America's most eminent air power experts explains how Rolling Thunder was conceived and fought and why it became shorthand for how not to fight an air campaign. F-105 Thunderchief MiG Killers of the Vietnam War Peter E. Davies, 2014-10-20. An illustrated history of the F 105's success against MiGs a relatively little known aspect of the Vietnam War and a testament to the jet's versatility and the skill of the pilots involved. Despite its F for fighter designation the F 105 was designed and purchased to give the USAF an aircraft capable of the delivery of nuclear weapons at very high speed long range and below the radar altitudes. However when the Vietnam War began it also emerged as USAF's best available tactical bomber for a limited conventional war as well. Extensively targeted by MiG 17s and MiG 21s the F 105 pilots developed innovative tactics that allowed them to compete in air to air duels with their smaller more manoeuvrable enemies. Illustrated throughout with extensive photographs detailing weapon loads internal features and action shots of actual engagements this volume examines the conduct of the Rolling Thunder strike missions and the tactics used for attack and defence by the attack escort fighter.
