The Global Automotive Industry Paul Nieuwenhuis, Peter Wells, 2015-08-06 The automotive industry is still one of the world s largest manufacturing sectors but it suffers from being very technology focused as well as being relatively short term focused There is little emphasis within the industry and its consultancy and analyst supply network on the broader social and economic impacts of automobility and of the sector that provides it The Global Automotive Industry addresses this need and is a first port of call for any academic official or consultant wanting an overview of the state of the industry An international team of specialist researchers both from academia and business review and analyse the key issues that make vehicle manufacturing still the world s premier manufacturing sector closely tied in with the

fortunes of both established and newly emerging economies In doing so it covers issues related to manufacturing both established practices as well as new developments issues relating to distribution marketing and retail vehicle technologies and regulatory trends and crucially labour practices and the people who build cars In all this it explains both how the current situation arose and also likely future trajectories both in terms of social and regulatory trends as the technological marketing and labour practice responses to those leading in many cases to the development of new business models Key features Provides a global overview of the automotive industry covering its current state and considering future challenges Contains contributions from international specialists in the automotive sector Presents current research and sets this in an historical and broader industry context Covers threats to the industry including globalization economic and environmental sustainability The Global Automotive Industry is a must have reference for researchers and practitioners in the automotive industry and is an excellent source of information for business schools governments and graduate and undergraduate students in automotive engineering

Volkswagen Beetle Richard Copping, 2014-09-10 Few cars have achieved the iconic status of Volkswagen's classic and much loved Beetle yet its origins are intertwined with the dark days of Nazism This book looks at those origins at the marque's initial post war rescue by the British and the effect of early VW Director General Heinz Nordhoff's forward looking desire to perfect one model rather than spread the company's talent over a range of designs at the impact of radical minded advertising campaigns and at the Beetle's never to be beaten production record for a single model of nearly 22 million cars Bringing the reader right up to the present day marque expert Richard A Copping recounts the Beetle's story in a lively and authoritative manner guaranteed to delight devotee and casual browser alike

The EU Competition Rules Floris O. W. Vogelaar, 2010 This book aims at providing the Legal Masters student throughout Europe's universities with a thorough

selection of case law that would be of direct help when studying the subject for the first time The primary criterion for selection has been whether a particular case has contributed to the development of one of the doctrines or notions that are so important to the understanding of EU competition law All cases and decisions have been incorporated with their key recitals and texts only so as to make the amount of text digestible in the context of an introductory course in EU competition law Furthermore for each case there is the mention of its relevance within the legal system and each case is accompanied with a short summary of its facts and circumstances The sequence of cases follows the logic order in which EU competition law may or in the author's view should be taught Wherever of practical use to the reader cross references are being made be these of a general
